8. Energy Demand Calculations

This page intentionally left blank.

Building Energy Demand Worksheet

Land Use	Electricity (kWh/yr)	Natural Gas: Building Envelope (kBTU/yr)	Natural Gas: Fireplace (kBTU/yr)[1]	Total (kiloBTU/yr)
LDR-Single Family	3,518,140	*10,754,000*	*2,025,000*	12,779,000
MDR-Condo/Townhouse	3,141,010	*10,728,500*	*2,925,000*	13,653,500
Surface Parking Lot	22,680	*0*	*0*	0
Total	**6,681,830**	***21,482,500***	***4,950,000***	**26,432,500**

Land Use	Number of DU	Hours Per Day	Days Per Year
LDR - Single Family	450	3	25
MDR - Condo/Townhouse	650	3	25
Total	**1,100**	**n/a**	**n/a**

Source: CalEEMod Version 2020.4.0.

Notes: kWh/yr=kilowatt hour per year; kBTU/yr=kilo-British Thermal Unit per year.

[1] *Assumes all units would have a natural gas fireplace. Total natural gas usage based on the number of fireplaces, a rate of 60,000 BTU/hour/fireplace, 25 days of use per year, and 3 hours per day.*

Natural Gas Amount from Natural Gas Fireplaces = (# of Natural Gas Fireplaces x # of Hours of Fireplace Operation/Day x # of Days of Fireplace Operation/Year x 60,000 BTU/hr/fireplace) ÷ 1,000 BTU/KBTU

Number of Natural Gas Fireplaces: 1,100 DUs
Number of Hours of Fireplace Operation/Day: 3 hrs/day (CalEEMod default)
Number of Days of Operation/Yr: 25 days/yr (CalEEMod default)
Average Heating Rate:* 60,000 BTU/hr/fireplace

**Based on CalEEMod methodology*

Model Output: OFFROAD2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: Orange (SC)
Calendar Year: 2023
Scenario: All Adopted Rules - Exhaust
Vehicle Classification: OFFROAD2021 Equipment Types
Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

Region	Calendar Year	Vehicle Category	Model Year	Horsepower B	Fuel	HC_tpd	ROG_tpd	TOG_tpd	CO_tpd	NOx_tpd	CO2_tpd	PM10_tpd	PM2.5_tpd	SOx_tpd	NH3_tpd	Fuel Consumptio	Total_Activity_	Total_Population	Horsepower_Hours_hhpy

Model Output: OFFROAD2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: Orange (SC)
Calendar Year: 2024
Scenario: All Adopted Rules - Exhaust
Vehicle Classification: OFFROAD2021 Equipment Types
Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

Region	Calendar Year	Vehicle Category	Model Year	Horsepower B	Fuel	HC_tpd	ROG_tpd	TOG_tpd	CO_tpd	NOx_tpd	CO2_tpd	PM10_tpd	PM2.5_tpd	SOx_tpd	NH3_tpd	Fuel Consumptio	Total_Activity	Total_Population	Horsepower_Hours_hhpy

Model Output: OFFROAD2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: Orange (SC)
Calendar Year: 2025
Scenario: All Adopted Rules - Exhaust
Vehicle Classification: OFFROAD2021 Equipment Types
Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

Model Output: OFFROAD2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: Orange (SC)
Calendar Year: 2026
Scenario: All Adopted Rules - Exhaust
Vehicle Classification: OFFROAD2021 Equipment Types
Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

Model Output: OFFROAD2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: Orange (SC)
Calendar Year: 2027
Scenario: All Adopted Rules - Exhaust
Vehicle Classification: OFFROAD2021 Equipment Types
Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

Model Output: OFFROAD2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: Orange (SC)
Calendar Year: 2028
Scenario: All Adopted Rules - Exhaust
Vehicle Classification: OFFROAD2021 Equipment Types
Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

Model Output: OFFROAD2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: Orange (SC)
Calendar Year: 2029
Scenario: All Adopted Rules - Exhaust
Vehicle Classification: OFFROAD2021 Equipment Types
Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

Region	Calendar Year	Vehicle Category	Model Year	Horsepower B	Fuel	HC_tpd	ROG_tpd	TOG_tpd	CO_tpd	NOx_tpd	CO2_tpd	PM10_tpd	PM2.5_tpd	SOx_tpd	NH3_tpd	Fuel Consumptio	Total_Activity	Total_Population	Horsepower_Hours_hhpy

Model Output: OFFROAD2021 (v1.0.1) Emissions Inventory
Region Type: Sub-Area
Region: Orange (SC)
Calendar Year: 2030
Scenario: All Adopted Rules - Exhaust
Vehicle Classification: OFFROAD2021 Equipment Types
Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

Region	Calendar Year	Vehicle Category	Model Year	Horsepower B	Fuel	HC_tpd	ROG_tpd	TOG_tpd	CO_tpd	NOx_tpd	CO2_tpd	PM10_tpd	PM2.5_tpd	SOx_tpd	NH3_tpd	Fuel Consumptio	Total_Activity_	Total_Population	Horsepower_Hours_hhpy

APPENDIX A/B - FLORAL/FAUNAL COMPENDIUM

INTRODUCTION

The following biological resources technical report describes a detailed assessment of potential sensitive natural resources located within and immediately adjacent to the Brea 265 Specific Plan Project Site. Specifically, the report has been prepared to support the preparation of an Environmental Impact Report (EIR) to ensure compliance with the California Environmental Quality Act (CEQA), State and Federal Endangered Species Acts (CESA and FESA), the Federal Clean Water Act (CWA), California Fish and Game Codes, and review process conducted by the City of Brea, Orange County, California.

As discussed below, the assessment includes a thorough literature review, site reconnaissance characterizing baseline conditions (including floral and faunal and dominant vegetation communities), focused sensitive species surveys, impact analysis, and proposed mitigation measures. As appropriate, this report is consistent with accepted scientific and technical standards and survey guideline requirements issued by the U.S. Fish and Wildlife Service (USFWS), the California Department of Fish and Wildlife (CDFW), the California Native Plant Society (CNPS), and other applicable agencies/organizations.

PROJECT LOCATION/DESCRIPTION

The 262.10-acre Brea 265 Specific Plan project site, Assessor's Parcel Numbers (APNs) 320-073-08, 320-071-29, 308-011-23, 322-031-24, 322-031-12, 322-031-11, 322-031-13, 322-031-14, 322-031-20, 322-031-21, 320-072-02 and 322-031-19 (Project Site) is located in the central region of the City of Brea and City of Brea Sphere of Influence, Orange County, California as illustrated in Figure 1, *Regional Location Map* and Figure 2, *Project Site Map*. This report also evaluates impacts to an offsite 0.45-acre (APN 306-032-01) north of the Project Site.

Specifically, the Project Site is located within an unsectioned area of Township 2, Range 5 west, of the U.S. Geological Survey (USGS) 7.5" quadrangle map Yorba Linda (dated 1964 and photorevised in 1981). The Project Site is bordered by Carbon Canyon Dam to the east, bordered and bisected by Carbon Canyon (State Route 142)/East Lambert Roads to the north and bordered/bisected by Valencia Avenue and North Rose Drive in the central and southwest region. With the exception Carbon Canyon Regional Park extending from the northeast Project Site boundary, the balance of the property is bounded by residential developments and institutional facilities (The Olinda Elementary School, the Brea Sports Park, and the mixed-use community of La Floresta) as illustrated in Figure 2, *Project Site Map*.

The majority of the Project Site is an active oil operations site operated by Aera Energy LLC and the southern region (APN's 322-031-14, 322-031-20, 322-031-21, and 322-031-19) is an active agricultural area. The Project Site has been used for oil production continuously since the early 1900s. Of the approximately 190 wells drilled on the site 110 remain in operation and produce approximately 500 barrels per day. The majority of the site is relatively flat with elevations gradually increasing in the north-eastern portions of the project, falling into the 0-10% slope range.

N

1 inch = 600 feet

The Brea 265 Specific Plan proposes a master planned residential community of low-, medium-, and high-density residential neighborhoods, parks, recreational amenities and open space, linked together by an extensive trail network that connects to the Tracks at Brea and other regional systems. At buildout, the Proposed Project would provide low density units, medium-density units, and high-density units, totaling 1,100 units with an overall average density of approximately 4 dwelling units per acre, provide up to 15.1-acres of parks/recreations uses (including up to 13 acres of Sports Park uses adjacent to the existing Brea Sports Park and a 2.0-acre Trail Staging Area) and approximately 47.50-acres of open space. These acreages include an approximately 1.4-acre site on the northeast corner of Valencia and Rose Dr. option for additional landscaped open space.

Once the project entitlements are complete, all on-site oil operations would be discontinued and abandoned, and wells and production facilities would be remediated in accordance with Federal, State and local regulations. No residual oil operations will remain in the proposed residential community. The Brea 265 Specific Plan would change its existing HR and LDR General Plan land use designations to Brea 265 Specific Plan, and change the current HR Hillside Residential and R-1 Single-Family Residential zoning designations to "Brea 265 Specific Plan."

PROJECT BACKGROUND

Interagency Meetings

The following outline summarizes interagency meetings held to present/discuss the existing biological conditions, anticipated impacts to sensitive resources, critical habitat, jurisdictional features, and mitigation approaches. Representative agencies/jurisdictions included the United States Army Corps of Engineers (USACE) and United States Fish and Wildlife Service (USFWS).

- July 9th, 2019. USFWS/Aera Energy, Inc./ Glenn Lukos Associates (GLA) – site visit
- August 8th, 2019. USACE/Aera Energy, Inc./GLA – site visit

Collectively the interagency meetings resulted in directives to achieve the following goals.

- Mitigate for impacts to occupied coastal California gnatcatcher habitat
- Mitigate for impacts to coastal California Gnatcatcher USFWS designated critical habitat.
- Verify jurisdictional delineation and review proposed mitigation options.

The preceding agency directives/goals have been achieved and incorporated into the overall project design as presented in the following biological resources technical report.

LITERATURE REVIEW

Existing biological resource conditions within and adjacent to the Project Site were initially investigated through review of pertinent scientific literature. Federal register listings, protocols, and species data provided by the USFWS were reviewed in conjunction with anticipated Federally listed species potentially occurring within the Project Site. The California Natural Diversity Database (CNDDB 2022a), a CDFW Natural Heritage Division species account database, was also reviewed for all pertinent information regarding the locations of known occurrences of sensitive species in the vicinity of the property. In addition, numerous regional floral and faunal field guides were utilized in the identification of species and suitable habitats. Combined, the reviewed sources provided an excellent baseline from which to inventory and review the biological resources potentially occurring in the area. Other sources of information included the review of unpublished biological resource letter reports and assessments.

Other CDFW reports and publications consulted include the following:

- Special Animals (CDFW 2022b);
- Special Vascular Plants and Bryophytes List (CDFW 2022c);
- Endangered, Threatened, and Rare Plants of California (CDFW 2022d); and
- State and Federally Listed Endangered and Threatened Animals of California (CDFW 2022e);

FIELD SURVEYS

The field study focused on a number of primary objectives that would comply with CEQA requirements, including (1) general reconnaissance survey and vegetation mapping; (2) general biological surveys; (3) habitat assessments for special-status plant species; (4) focused surveys for special-status plants; (5) habitat assessments for special-status wildlife species; (6) focused surveys for special-status animals; and (7) jurisdictional delineation. Specifically, the focus of the biological surveys was determined through initial site reconnaissance, a review of the CNDDB [CDFW 2022a], CNPS 8th edition online inventory (CNPS 2022), Natural Resource Conservation Service (NRCS) soil data, other pertinent literature, and knowledge of the region. Site-specific general surveys within the Project Site were conducted on foot in the proposed development areas for each target plant or animal species identified below. Biological studies were conducted in order to identify and analyze potential direct, indirect and cumulative impacts to biological resources associated with development of the Project Site.

Observations of all plant and wildlife species were recorded during each of the above-mentioned survey efforts [Appendix A: Floral Compendium and Appendix B: Faunal Compendium].

As outlined in Table 1, *Summary of Biological Surveys for the Project Site*, the studies conducted include the following:

- Performance of vegetation mapping;
- Performance of site-specific habitat assessments and associated focused biological surveys to evaluate the potential presence/absence of special-status species (or potentially suitable habitat) to the satisfaction of CEQA and federal and state regulations; and
- Delineation of aquatic resources (including the potential for wetlands and riparian habitat) potentially subject to the jurisdiction of the USACE, Regional Water Quality Control Board (RWQCB), and CDFW.

Individual plants and wildlife species are evaluated in this report based on their "special-status." For the purpose of this report, plants were considered "special-status" based on one or more of the following criteria:

- Listing through the Federal and/or State Endangered Species Act (FESA, CESA);
- Occurrence in the CNPS Rare Plant Inventory (Rank 1A/1B, 2A/2B, 3, or 4);
- Occurrence in the CNDDB inventory.

Wildlife species were considered "special-status" based on one or more of the following criteria:

- Listing through the FESA and/or CESA;
- Designation by the State as a Species of Special Concern (SSC) or California Fully Protected (CFP) species.

Vegetation communities and habitats were considered "special-status" based on one or more of the following criteria:

- Global (G) and/or State (S) ranking of category 3 or less based on CDFW;
- Riparian habitat;
- Occurrence of vegetation community or habitat in the CNDDB inventory.

Floral Resources

A site-specific survey program was designed to accurately document the botanical resources within the Project Site, and consisted of five components: (1) a literature search; (2) preparation of a list of target special-status plant species and sensitive vegetation communities that could occur within the Project Site; (3) general field reconnaissance surveys; (4) vegetation mapping according to the List of Vegetation Alliances and Associations; and (5) habitat assessments and focused surveys for special-status plants.

Prior to conducting fieldwork, pertinent literature on the flora of the region was examined. A thorough archival review was conducted using available literature and other historical records. These resources included the following:

- California Native Plant Society, Rare Plant Program. 2018/2019. Inventory of Rare and Endangered Plants of California (online edition, v8-03 0.39) for the USGS 7.5' quadrangles: Yorba Linda, San Dimas, Ontario, Prado Dam, Black Star Canyon, Orange, Anaheim, La Habra, and Baldwin Park (CNPS 2022); and

- CNDDB for the USGS 7.5' quadrangles: Yorba Linda, San Dimas, Ontario, Prado Dam, Black Star Canyon, Orange, Anaheim, La Habra, and Baldwin Park (CNDDB 2022a).

Vegetation alliances within the Project Site were mapped in accordance with A Manual of California Vegetation, Second Edition or MCV II, which is the California expression of the National Vegetation Classification. Where necessary, deviations were made when areas were not consistent with the "membership rules" set forth in the MCV II. Such modifications to the vegetation alliances were designated based on the dominant plant species. Vegetation alliances were mapped in the field directly onto a 200-scale (1" = 200') aerial photograph.

Based on this information, vegetation profiles and a list of target sensitive plant species and habitats that could occur within the Project Site were developed and incorporated into a mapping and survey program to achieve the following goals: (1) characterize the vegetation associations and land use; (2) prepare a detailed floristic compendium; (3) identify the potential for any special status plants that may occur within the Project Site; and (4) prepare a map showing the distribution of any sensitive botanical resources associated with the Project Site.

All faunal surveys were conducted by GLA biologists Dave Moskovitz, Tony Bomkamp, Jillian Stephens, and Kevin Livergood on April 17th, April 19th, April 25th, May 11th, and June 18th, 2018 to conduct general and focused plant surveys. Surveys were conducted in accordance with accepted botanical survey guidelines (CDFG 2009, CNPS 2001, USFWS 2000). As applicable, surveys were conducted at appropriate times based on precipitation and flowering periods. An aerial photograph, a soil map, and/or a topographic map were used to determine the community types and other physical features that may support sensitive and uncommon taxa or communities within the Project Site. Surveys were conducted by following meandering transects within target areas of suitable habitat. All plant species encountered during the field surveys were identified and recorded following the above-referenced guidelines adopted by CNPS (2010) and CDFW by Nelson (1984). A complete list of the plant species observed is provided in Appendix A, Floral Compendium. Scientific nomenclature and common names used in this report follow Baldwin et al (2012), Munz (1974), and Allen and Roberts (2013).

Faunal Resources

Faunal species were evaluated and detected during field surveys by sight, call, tracks, and scat. Site reconnaissance was conducted in such a manner as to allow inspection of the entire Project Site by direct observation, including the use of binoculars. Observations of physical evidence and direct sightings of wildlife were recorded in field notes during the visit. A complete list of wildlife species observed within the Project Site is provided in Appendix B: Faunal Compendium. Scientific nomenclature and common names for vertebrate species referred to in this report follow the Complete List of Amphibian, Reptile, Bird, and Mammal Species in California (CDFG 2008), Standard Common and Scientific Names for North American Amphibians, Turtles, Reptiles, and Crocodilians 6th Edition, Collins and Taggert (2009) for amphibians and reptiles, and the American Ornithologists' Union Checklist 7th Edition (2009) for birds. The methodology (including any applicable survey protocols) utilized to conduct general surveys, habitat assessments, and/or focused surveys for special-status animals are included below.

General Surveys

Birds - During the general biological and reconnaissance surveys within the Project Site, birds were detected by direct observation and/or by vocalizations, with identifications recorded in field notes.

Mammals - During general biological and reconnaissance surveys within the Project Site, mammals were identified and detected by direct observations and/or by the presence of diagnostic sign (i.e., tracks, burrows, scat, etc.). In addition, focused

surveys were conducted for special-status bats as well as common bat species that could potentially roost on the site.

Focused bat surveys were conducted by GLA biologists Jeff Ahrens, Stephanie Cashin and Tony Bomkamp on July 3rd and July 9th, 2018. All surveys were conducted approximately 30 minutes before dusk and extended between three and four hours. Bat surveys were comprised of a combination of acoustic and emergence surveys from throughout the Project Site. Areas determined to support the best bat roosting habitat (including Eucalyptus and palm trees) were visually inspected for evidence of roosting (e.g., urine staining, guano concentrations, and/or audible bats) and were visually and acoustically surveyed for bat emergence.

Two ultrasonic acoustic recording devices were deployed throughout the bat Project Site. Recording devices included two Wildlife Acoustics EchoMeter 2 Pro microphones attached to an Apple iTouch and an Apple iPad. A Seek Compact Pro Thermal imager attached to an iPhone or iPad was used to assist in detecting heat signatures of bats within and exiting from potential roost areas. A combination of walking and driving transects with the ultrasonic devices were also employed throughout the Project Site. Driving transects averaged 5 miles per hour.

All acoustic data was recorded in full spectrum and was processed and analyzed with Sonobat 4.2.2 bat call analysis software using the California Southwest classifier. All acoustic calls were manually reviewed and vetted using multiple Sonobat acoustic reference libraries and reference materials including Echolocation Call Characteristics of California Bats (Humboldt State University, 2018) and Echolocation Call Characteristics of Western U.S. Bats (Humboldt State University, 2018).

Reptiles and Amphibians - During general biological and reconnaissance surveys within the Project Site, reptiles and amphibians were identified incidentally during surveys. Habitats were examined for diagnostic reptile sign, which include shed skins, scat, tracks, snake prints, and lizard tail drag marks. All reptiles and amphibian species observed, as well as diagnostic sign, were recorded in field notes.

Special Status Species

A literature search was conducted to obtain a list of special-status wildlife species with the potential to occur within the Project Site. Species were evaluated based on two factors: 1) species identified by the CNDDB as occurring (either currently or historically) on or in vicinity of the Project Site, and 2) any other special-status animals that are known to occur within the vicinity of the Project Site, or for which potentially suitable habitat occurs on the Project Site. Biologists Tony Bomkamp, Kevin Livergood, and Dave Moskovitz conducted habitat assessments for special-status animal species. An aerial photograph, soil map and/or topographic map were used to determine the community types and other physical features that may support special-status and uncommon taxa within the Project Site.

Burrowing Owls

Glenn Lukos Associations biologist Jeff Ahrens conducted focused surveys for the burrowing owl (*Athene cunicularia*) within all suitable habitat areas within the Project

Site. Surveys were conducted in accordance with survey guidelines described in the 2012 California Department of Fish and Game (CDFG) Staff Report on Burrowing Owl Mitigation. The guidelines stipulate that four (4) focused survey visits should be conducted between February 15th and July 15th, with the first visit occurring between February 15th and April 15th. The remaining three (3) visits should be conducted three weeks apart, with at least (1) one visit occurring between June 15th and July 15th. Focused surveys were conducted on April 9th, May 2nd, May 25th and July 3rd, 2018. As recommended by the survey guidelines, the survey visits were conducted between morning civil twilight and 10:00 AM. Weather conditions during the surveys were conducive to avian activity, including burrowing owl.

Surveys were conducted by walking meandering transects throughout areas of suitable habitat. Transects were spaced between 7 meters (m) and 20 m apart, adjusting for vegetation height and density, to ensure adequate visual coverage of the survey areas. At the start of each transect, and at least every 100 m along transects, the survey area was scanned for burrowing owls using binoculars. All suitable burrows were inspected for diagnostic owl sign (e.g., pellets, prey remains, whitewash, feathers, bones, and/or decoration) to identify potentially occupied burrows. Table 2, Summary of Burrowing Owl Surveys, summarizes the burrowing owl survey visits.

Table 2.
Summary of Burrowing Owl Surveys

Survey Date	Biologist	Start/End Time	Start/End Temperature (°F)	Start/End Wind Speed (mph)	Cloud Cover

Source: GLA 2019

Coastal California Gnatcatcher

Glenn Lukos Associations biologist Kevin Livergood (TE-172638-2) conducted focused surveys for the coastal California gnatcatcher (*Polioptila californica californica*) for all suitable habitat areas within the Project Site. Surveys were conducted in accordance with the 1997 USFWS survey guidelines, which during the breeding season (March 15th through June 30th) require a minimum of six (6) surveys (per survey polygon) with at least one week separating each survey visit. The survey guidelines limit individual biologists to surveying a maximum of 80 acres per day. The Project Site contains approximately 13.49 acres of suitable scrub habitat for the coastal California gnatcatcher. Therefore, the survey area was not divided into multiple survey polygons.

Updated focused surveys were conducted on April 6th, April 13th, April 19th, May 4th, May 11th, and May 18th, 2018. Initial protocol surveys were conducted in 2017 in accordance with USFWS survey guidelines (USFWS 1997). Pursuant to the survey guidelines, the surveys were conducted between sunrise and 12:00 p.m. Weather conditions during the surveys were conducive to avian activity. Table 3, *Summary of Coastal California Gnatcatcher Surveys,* summarizes the gnatcatcher survey visits.

Table 3.
Summary of Coastal California Gnatcatcher Surveys

Survey Date	Biologist	Start/End Time	Start/End Temperature (°F)	Start/End Wind Speed (mph)	Cloud Cover
4/6/18	K. Livergood	0700-1130	53-66	2-5	Partly Cloudy

Source: GLA 2019

Crotch Bumblebee

Focused surveys for were conducted by GLA senior biologists Jeff Ahrens and Tony Bomkamp on April 11 and May 7, 2020 and by Mr. Ahrens on July 6, 2020. Weather conditions during the surveys were conducive to a high level of bee activity. The timing for each survey was adjusted based on the phenology of pollinator host plants available during the field season. Surveys generally took place on sunny days when temperatures were generally above 60° F, wind speeds were calm to low (less than 8 mph).

Due to the fragmented nature of the potential suitable habitat, during each focused survey, the biologists surveyed all suitable flowering areas within the Project site. The surveyor scanned suitable flowering areas for bumble bee activity and focused on those areas. Minimal time was spent in lesser quality habitat. Pursuant to the survey guidelines, focused surveys did not begin for at least two hours after sunrise (or unless bumble bees or other bee species were detected earlier) and were completed no later than two hours before sunset.

Jurisdictional Resources

Prior to beginning the field delineation, a 200-scale color aerial photograph and the previously cited USGS topographic maps were examined to determine the locations of potential areas of USACE/CDFW/Regional Board jurisdiction. Suspected jurisdictional areas were field checked for the presence of definable channels and/or wetland vegetation, soils, and hydrology. Specifically, on April 25th, 2018, April 22nd, 2019, and May 4th and May 18th, 2020 regulatory specialists of Glenn Lukos Associates, Inc. examined the project site to determine the limits of. Potential wetland habitats at the subject site were evaluated using the methodology set forth in the U.S. Army Corps of Engineers 1987 Wetland Delineation Manual[1] (Wetland Manual) and the 2008 Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Arid West Supplement (Arid West Supplement)[2]. The presence of an Ordinary High Water Mark

[1] Environmental Laboratory. 1987. Corps of Engineers Wetlands Delineation Manual, Technical Report Y-87-1, U.S. Army Engineer Waterways Experimental Station, Vicksburg, Mississippi.

[2] U.S. Army Corps of Engineers. 2008. Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Arid West Supplement (Version 2.0). Ed. J.S. Wakeley, R.W. Lichvar, and C.V. Noble. ERDC/EL TR-06-16. Vicksburg, MS: U.S. Army Engineer Research and Development Center.

(OHWM) was determined using the 2008 Field Guide to Identification of the Ordinary High Water Mark (OHWM) in the Arid West Region of the Western United States[3] in conjunction with the Updated Datasheet for the Identification of the Ordinary High Water Mark (OHWM) in the Arid West Region of the Western United States.[4] While in the field the limits of the OHWM, wetlands as appropriate, and CDFW and Regional Board jurisdiction were recorded using GPS technology and/or on ortho-rectified aerial photographs. Other data were recorded onto the appropriate datasheets.

EXISTING ENVIRONMENTAL SETTING

The following section (Existing Environmental Setting) has been extracted, reviewed and updated from the GLA baseline studies report and modifications have been made to the GLA text to ensure consistency with this document.

This section provides the results of general biological surveys, vegetation mapping, habitat assessments and a jurisdictional delineation for Waters of the United States (including wetlands) subject to the jurisdiction of the USACE, RWQCB, and streams (including riparian vegetation) and lakes subject to the jurisdiction of CDFW.

The Project Site is not located within or adjacent to an existing or proposed Natural Community Conservation Plan/Habitat Conservation Plan (NCCP/HCP) including the NCCP/HCP Central and Coastal Subregion of Orange County.

SURROUNDING LAND USES/TOPOGRAPHY/SOILS

Surrounding Land Uses

The Project Site includes portions on the west and east sides of Valencia Avenue with the area west of Valencia Avenue further divided by East Lambert Road. The Project Site on the east side of Valencia Avenue consists of land associated with oil operations including oil fields, roads and paths, and related equipment and infrastructure. Disturbed, undeveloped land occurs scattered within the oilfield operations. Areas east of Valencia Avenue also support agricultural fields and operations bordering North Rose Drive as shown in Figure 3, *Vegetation Communities Map* and Figure 4 to 7, *Current Project Site Photographs*. The areas west of Valencia Avenue includes active and abandoned nursery facilities while still containing active oil operations. Three (3) ephemeral, disturbed drainages traverse the Project Site including a single drainage in the western region and a drainage with a tributary on the eastern region. Surrounding land uses include residential properties, businesses, and several parks including Carbon Canyon Regional Park to the east and Wildcatters Park to the north.

[4] Curtis, Katherine E. and Robert Lichevar. 2010. Updated Datasheet for the Identification of the Ordinary High Water Mark (OHWM) in the Arid West Region of the Western United States. ERDC/CRREL TN-10-1. Hanover, NH: U.S. Army Engineer Research and Development Center, Cold Regions Research and Engineering Laboratory.

The western region of the Project Site is relatively flat, whereas the eastern region has slopes ranging from 2 to 75 percent. Elevations range from approximately 400 to 590 feet above sea level.

Soils

The Natural Resource Conservation Service (NRCS) identifies the following soil types (series) as occurring (currently or historically) within the Project Site as shown in Figure 8, *Soils Association Map*.

- Alo clay, 15 to 30 percent slopes (101)
  This well-drained soil type consists of 85 percent Alo soils and 15 percent minor components. The parent material is residuum weathered from sedimentary rock, and slopes range from 15 to 30 percent. A typical profile for this soil is clay from 0 to 22 inches and weathered bedrock from 22 to 59 inches.
- Anaheim loam, 30 to 50 percent slopes (107)
  This well-drained soil type was formed in fine grained residuum weathered from sandstone and shale. It consists of 85 percent Anaheim soils and 15 percent minor components. The common landform is hillslopes ranging from 30 to 50 percent slope. A typical profile consists of loam from 0 to 26 inches and bedrock from 26 to 54 inches.
- Balcom clay loam, 15 to 30 percent slopes (112), 30 to 50 percent slopes (113)
  This well-drained soil type was formed in calcareous residuum weathered from sandstone and shale. It consists of 85 percent Balcom soils and 15 percent minor components. The common landform is hillslopes ranging from 15 to 30 percent slopes. A typical profile consists of clay loam from 0 to 34 inches and bedrock from 34 to 44 inches.
- Calleguas clay loam, 50 to 75 percent slopes, eroded (134)
  This well-drained soil type consists of 85 percent Calleguas soils and 15 percent minor components. The parent material is residuum weathered from calcareous shale. Hillslopes with 50 to 75 percent slopes are the most common landform. A typical profile consists of clay loam from 0 to 11 inches, channery clay loam from 11 to 15 inches, and bedrock from 15 to 42 inches.
- Metz loamy sand (163)
  This soil type consists of 80 percent Metz soils and 20 percent minor components. The associated landform is alluvial fans with 0 to 2 percent slope. A typical profile consists of loamy sand from 0 to 17 inches, and stratified sand to fine sandy loam from 17 to 63 inches.
- Mocho loam, 2 to 9 percent slopes (167)
  This well-drained soil type consists of 85 percent Mocho soils and 15 percent minor components. The parent material is alluvium derived from sedimentary rock. Alluvial fans with 2 to 9 percent slopes are the most common landform. A typical profile consists of loam from 0 to 60 inches.
- Myford sandy loam, 2 to 30 percent slopes, eroded (173, 175, 176 and 177)
  This soil type is moderately well-drained and commonly occurs on terraces with slopes ranging from 2 to 30 percent. It consists of 75 to 85 percent Myford soils and 15 to 25 percent minor components. The parent material is alluvium derived from sandstone. A typical profile consists of a combination of sandy loam, sandy clay, and sandy clay loam from 0 to 79 inches.

- Pits - Omni clay, drained (187)
  This poorly-drained soil type consists of 85 percent Omni soils and 15 percent minor components. The associated landform is depressions with 0 to 2 percent slope. A typical profile consists of clay from 0 to 17 inches, and silty clay or clay from 17 to 60 inches.
- San Emigdio fine sandy loam, 2 to 9 percent slopes (195)
  This well-drained soil type consists of 85 percent San emigdio soils and 15 percent minor components. The parent material is mixed alluvium derived from igneous, metamorphic, and sedimentary rock. The common landform is alluvial fans ranging from 2 to 9 percent slope. A typical profile for this soil is fine sandy loam from 0 to 7 inches, and stratified gravelly loamy coarse sand to very fine sandy loam from 7 to 61 inches.
- Sorrento loam, 2 to 9 percent slopes (207)
  This well-drained soil type consists of 85 percent Sorrento soils and 15 percent minor components. The parent material is alluvium derived from sedimentary rock. The common landform is alluvial fans ranging from 2 to 9 percent slope. A typical profile for this soil is loam from 0 to 12 inches, silty clay loam from 12 to 62 inches, and sandy loam from 72 to 72 inches.
- Yorba cobbly sandy loam, 30 to 50 percent slopes (223 and 226)
  This well-drained soil type consists of 85 percent Yorba soils and 15 percent minor components. The parent material is sandy and gravelly alluvium derived from mixed substrates. The common landform is terraces with slopes ranging from 30 to 50 percent. A typical profile for this soil is cobbly sandy loam from 0 to 11 inches, gravelly sandy clay loam from 11 to 40 inches, and gravelly sandy loam from 40 to 63 inches.

VEGETATION COMMUNITIES

During vegetation alliance mapping of the Project Site, a total of 34 different vegetation alliances or land-cover types were identified. Table 4, Vegetation Community Acreages, provides a summary of vegetation alliances/land uses and the corresponding acreage; detailed descriptions of each alliance/land use is provided in the following section as shown in Figure 3, *Vegetation Communities* and Figure 4 to 7, *Current Project Site Photographs*. The table below includes CNDDB Rarity Rankings and as appropriate, the threat code listed by the California Invasive Plant Council (Cal-IPC) for invasive plant species.

Coastal Sage Scrub Habitats

California sagebrush scrub (*Artemisia californica* Shrubland Alliance) - Approximately 9.84-acres, primarily in the areas of the Project Site east of Valencia Avenue, consist of California sagebrush scrub (*Artemisia californica*). These areas, which generally occur in small isolated patches, match the membership rule for the *Artemisia californica* Shrubland Alliance in the MCV II which requires greater than 60 percent relative cover of California sagebrush in the shrub canopy. This alliance has a G5 S5 rarity ranking which defines this vegetation type as demonstrably secure in both its global and California range. Other commonly occurring species include California buckwheat, laurel sumac, summer mustard, Russian thistle, and annual grasses.

California buckwheat scrub (*Eriogonum fasciculatum* Shrubland Alliance) - California buckwheat (*Eriogonum fasciculatum*) scrub accounts for approximately 2.94-acres along the northern edge of the portion of the Project Site east of Valencia Avenue. This native vegetation community matches the membership rule for the *Eriogonum fasciculatum* Shrubland Alliance in the MCV II which requires greater than 5 percent absolute cover of California buckwheat in the shrub canopy. The *Eriogonum fasciculatum* shrubland alliance has a G5 S5 rarity ranking which is defined as demonstrably secure in both its global and California range.

Coyote brush scrub (*Baccharis pilularis* Shrubland Alliance) - Coyote brush (*Baccharis pilularis*) scrub accounts for approximately 0.34-acre throughout the entire Project Site. In these areas, coyote brush covers over 50 percent of the shrub layer; however, other occurring species include California sagebrush, Russian thistle, and summer mustard. This vegetation cover is part of the *Baccharis pilularis* Shrubland Alliance which has a G5 S5 rarity ranking. This rarity ranking is defined as secure in both its global and California range.

Coast prickly pear scrub (*Opuntia littoralis* Shrubland Alliance) - In the portion of the Site east of Valencia Avenue and at the southern end of the site, approximately 0.27-acre consists of coast prickly pear (*Opuntia littoralis*) scrub, which occurs in small isolated patches. This native vegetation alliance matches and is classified as the *Opuntia littoralis* Shrubland Alliance in the MCV II which has a rarity ranking of G3 S3. However, however, none of the small patches meets the minimum mapping unit as set forth in the CNDDB. Specifically, the Survey of California Vegetation and Mapping Standards (CDFW, 2020) specifies that the minimum mapping unit (MMU) is usually 1 or 2 acres, varying with the size of the project. Wetlands and other special vegetation types are mapped at ¼ acre, but none of the cactus patches onsite cover the 0.25-acre minimum and is thus below the MMU standards identified.

Brittle bush scrub (*Encelia farinosa* Shrubland Alliance) - Approximately 0.05-acre near the central-eastern boundary of the area of the Project Site east of Valencia Avenue consists of a patch of brittle bush (*Encelia farinosa*) scrub. This vegetation type matches the *Encelia farinosa* Shrubland Alliance which has a rarity ranking of G5 S4 which is defined as secure within and outside of California. This alliance a desert alliance and has been introduced in this area. Summer mustard is also common in this alliance.

Chaparral Habitats

Laurel sumac scrub (*Malosma laurina* Shrubland Alliance) - Laurel sumac scrub covers approximately 16.99-acres primarily in the portion of the Project Site east of Valencia Avenue. In these areas, laurel sumac exhibits greater than 50 percent relative cover in the shrub canopy, which fits the MCV II requirement for the *Malosma laurina* Shrubland Alliance (G4 S4). This alliance has a rarity ranking of G4 S4 which is defined as secure throughout its range. Other commonly occurring species include California sagebrush, southern California black walnut, California buckwheat, eucalyptus, Peruvian pepper, blue elderberry, summer mustard, and Russian thistle.

Woodland & Savannah Habitats

Blue elderberry stands (*Sambucus nigra* Shrubland Alliance) - Approximately 1.54-acres scattered throughout the eastern parcel of the Project Site consist of blue elderberry stands. In these areas, blue elderberry covers greater than 50-percent of the shrub overstory and cover a minimum of 0.20-acre. Other species include Russian thistle, California sagebrush, California walnut, laurel sumac, and pepper tree. Due to the dominance of blue elderberry, this vegetation type belongs to the *Sambucas nigra* Shrubland Alliance which has a G3 S3 rarity ranking. S3 alliances are defined as susceptible to becoming extirpated in the state, and may be, if additional populations are destroyed. In addition to these stands, additional areas consist of individual or small groupings that account for less than 0.20-acre and do not meet the minimum mapping unit of 0.25-acre recognized by the CNDDB for special-status vegetation alliances. Specifically, the Survey of California Vegetation and Mapping Standards (CDFW, 2020) specifies that the minimum mapping unit (MMU) is usually 1 or 2 acres, varying with the size of the project. Wetlands and other special vegetation types are mapped at ¼ acre, but many of the patches of elderberry shrubs onsite are well below the 0.25-acre threshold which is below both of the MMU standards identified.

Blue elderberry savannah (*Sambucus nigra* Shrubland Alliance) - Blue elderberry savannahs account for 2.56-acres in the central-portion of the Project Site east of Valencia Avenue. These areas have well below 50-percent cover of blue elderberry in the shrub overstory, occurring within areas dominated by upland mustard species and areas that include California brittlebush (*Encelia californica*) as an understory component. This alliance does not fit the membership requirement for the *Sambucas nigra* Shrubland Alliance described above.

Blue elderberry woodland (*Sambucus nigra* Shrubland Alliance) - Approximately 1.37 acres scattered throughout the eastern parcel of the Project Site consist of blue elderberry stands. In these areas, blue elderberry covers greater than 50-percent of the shrub overstory. Other species include Russian thistle, California sagebrush, southern California black walnut, laurel sumac, and pepper tree. Due to the dominance of blue elderberry, this vegetation type belongs to the *Sambucas nigra* Shrubland Alliance which has a G3 S3 rarity ranking. S3 alliances are defined as susceptible to becoming extirpated in the state, and may be, if additional populations are destroyed.

Walnut Grove Habitats

Southern California black walnut groves (*Juglans californica* Woodland Alliance) - On the northeastern edge of the Project Site, east of Valencia Avenue, approximately 0.07-acre consists of a southern California black walnut (*Juglans californica*) grove. This area matches the membership rule for the *Juglans californica* Woodland Alliance in the MCV II which requires greater than 50 percent relative cover of southern California black walnut in the tree canopy; however, the 0.07-acre area does not meet the minimum mapping unit as set forth in the CNDDB. Specifically, the Survey of California Vegetation and Mapping Standards (CDFW, 2020) specifies that the minimum mapping unit (MMU) is usually 1 or 2 acres, varying with the size of the project. Wetlands and other special vegetation types are mapped at ¼ acre, but the patch of walnut trees onsite encompasses well under the 0.25-acre minimum and is thus below the MMU standards identified[5]. . While the *Juglans californica* Woodland Alliance has a rarity ranking of G3 S3.2 given the limited size, would not be considered walnut grove as discussed in the impact section below. Also, as noted above, S3 ranked species are not yet susceptible to becoming extirpated in the state, and may be, if additional populations are destroyed. Other species occurring include California sagebrush (*Artemisia californica*) and California buckwheat (*Eriogonum fasciculatum*).

Riparian Habitats

Mule fat thickets (*Baccharis salicifolia* Shrubland Alliance) - Primarily in the ephemeral drainage west of Valencia Avenue, approximately 0.11-acre consists of mule fat (*Baccharis salicifolia*) thickets. According to the MCV II, these areas fit the *Baccharis salicifolia* Shrubland Alliance which has a rarity ranking of G5 S4 which is defined as secure within and outside of California. Other co-occurring species include non-native Spanish sunflower (*Pulicaria paludosa*) and Russian thistle.

Black Willow thickets (*Salix gooddingii* Woodland Alliance) - Approximately 0.03-acre near the northeastern boundary of the Site east of Valencia Avenue consists of two patches of black willow (*Salix gooddingii*) thickets. Due to the extent of black willow cover in the canopy, this vegetation type is best described as *Salix goodinggii* Woodland Alliance; however, the 0.03-acre area does not meet the minimum mapping unit as set forth in the CNDDB. Specifically, the Survey of California Vegetation and Mapping Standards (CDFW, 2020) specifies that the minimum mapping unit (MMU) is usually 1 or 2 acres, varying with the size of the project. Wetlands and other special vegetation types are mapped at ¼ acre, but the patch of black willow onsite encompasses well under the 0.25-acre minimum and is thus below the MMU standards identified[6].. This alliance has a G4 S3 rarity ranking which is defined as secure outside of California, and susceptible to becoming extirpated in the state, and may be, if additional populations are destroyed. Other dominating species in these areas include eucalyptus trees.

[5] California Department of Fish and Wildlife: Vegetation Classification and Mapping Program (VegCAMP). June 22, 2020. *Survey of California Vegetation Classification and Mapping Standards.*
[6] Ibid.

Non-native Grassland Habitats

Red brome or Mediterranean grass grasslands (*Bromus rubens-Schismus* (*arabicus, barbatus*) Semi-Natural Herbaceous Stands) - Approximately 16.36-acres throughout the Project Site are dominated by exotic, annual brome grasses. These areas most closely match the *Bromus rubens-Schismus* (*arabicus, barbatus*) Semi-Natural Herbaceous Stands vegetation description in the MCV II.

Ruderal Habitats

Upland mustards (*Brassica* (*nigra*) and Other Mustards Semi-Natural Herbaceous Stands) - Disturbed areas dominated by invasive, non-native upland mustard species (*Hirschfeldia incana* and *Brassica nigra*) account for approximately 36.48-acres throughout the Project Site. These vegetation alliances belong to the *Brassica* (*nigra*) and Other Mustards Semi-Natural Herbaceous Stands classification in the MCV II.

Russian thistle stands (*Salsola tragus* Semi-Natural Herbaceous Stands) - Approximately 18.01-acres throughout the Project Site are dominated by Russian thistle, a non-native, invasive species. Other species occurring in these areas are upland mustards, yellow star-thistle, and exotic, annual grasses. This vegetation cover type does not have a close analog in the MCV II.

Filaree Fields - Filaree fields cover approximately 5.10-acres primarily in the portion of the Project Site west of Valencia Avenue. Some patches also occur in the southern portion of the Project Site east of Valencia Avenue, near the agricultural fields. These areas are dominated by long beaked filaree (*Erodium botrys*); however, red stemmed filaree (*Erodium cicutarium*) and white stemmed filaree (*Erodium moschatum*) also occur. None of the *Erodium* species are native to this area. This vegetation cover type does not have a close analog in the MCV II.

Poison hemlock or fennel patches (*Conium maculatum-Foeniculum vulgare* Semi-Natural Herbaceous Stands) - Poison hemlock (*Conium maculatum*), a non-native, invasive species, dominates several areas in the portion of the Project Site east of Valencia Avenue. These areas cover approximately 0.90-acres and match the *Conium maculatum-Foeniculum vulgare* Semi-Natural Herbaceous Stands description in the MCV II.

Castor bean thickets (*Ricinus communis* Semi-Natural Shrubland Alliance) - Castor bean (*Ricinus communis*) is a non-native, invasive species that was introduced and has naturalized in the wild. This species occurs on approximately a total of 0.85-acre scattered throughout the Project Site. This vegetation type does not have an analog in the MCV II.

Yellow star-thistle fields (*Centaurea* (*solstitialis, melitensis*) Semi-Natural Herbaceous Stands) - A patch of yellow star-thistle, a non-native, invasive species, covers approximately 0.30-acre on the eastern side Project Site west of Valencia Avenue. This stand includes tocalote (*Centaurea melitensis*) and matches the membership rule for the *Centaurea* (*solstitialis, melitensis*) Semi-Natural Herbaceous Stands classification in the MCV II.

Fountain grass swards (*Pennisetum setaceum* Semi-Natural Herbaceous Stands) - The northern portion of the Project Site east of Valencia Avenue contains an approximately 0.06-acre patch of fountain grass swards. This highly invasive non-native species was introduced ornamentally and has naturalized in the wild. According to the MCV II, this area fits the vegetation description for the *Pennisetum setaceum* Semi-Natural Herbaceous Stands classification.

Ornamental Habitats

Pepper tree groves (*Schinus* (*molle, terebinthifolius*) Semi-Natural Woodland Stands - Within the western and eastern parcels of the Project Site, approximately 8.05-acres consist of Brazilian pepper tree (*Schinus terebinthifolius*) and Peruvian pepper tree (*Schinus molle*) groves. These areas match the requirements for the *Schinus* (*molle, terebinthifolius*)-*Myoporum laetum* Semi-Natural Woodland Stands vegetation classification. The understory includes intermittently occurring laurel sumac and California sagebrush individuals along with non-native herbs and grasses.

Eucalyptus groves (*Eucalyptus* (*globulus, camaldulensis*) Semi-Natural Woodland Stands) - Approximately 6.86-acres, primarily in the central and northern areas of the Project Site east of Valencia Avenue, are dominated by non-native eucalyptus species that have naturalized in the environment. Within these areas, the herbaceous layer includes non-native grasses and forbs. The shrub strata include intermittently occurring laurel sumac (*Malosma laurina*) and coyote brush (*Baccharis pilularis*). According to the MCV II, this vegetation cover fits the following description: *Eucalyptus* (*globulus, camaldulensis*) Semi-Natural Woodland Stands.

Pepper tree or Laurel sumac groves (*Schinus* (*molle, terebinthifolius*)-*Malosma laurina* Semi-Natural Woodland Stands) - Approximately 3.13-acres in the Project Site east of Valencia Avenue contain groves dominated by Peruvian pepper tree and laurel sumac. These areas are considered disturbed, non-native vegetation communities; however, they have assimilations with the following two alliances in the MCV II: *Schinus* (*molle, terebinthifolius*)-*Myoporum laetum* Semi-Natural Woodland Stands and *Malosma laurina* Shrubland Alliance – Laurel Sumac Scrub (G4 S4).

Pepper tree individuals (*Schinus* (*molle, terebinthifolius*) Semi-Natural Woodland Stand) - Pepper tree individuals account for 1.83 acres in the western and eastern portions of the Project Site, collectively. Although these areas are not considered groves, they most closely match the following alliance in the MCV II: *Schinus* (*molle, terebinthifolius*)-*Myoporum laetum* Semi-Natural Woodland Stands.

Giant reed breaks (*Arundo donax* Semi-Natural Herbaceous Stands) - Giant reed (*Arundo* donax) is a non-native, invasive species. Near the northern boundary of the Project Site east of Valencia Avenue, approximately 0.17-acre of consists of a giant reed thicket. According to the membership rules in the MCV II, this area matches the *Arundo donax* Semi-Natural Shrubland Alliance. Surrounding habitat includes California sagebrush scrub.

Other Ornamental - In the northwest corner of the Project Site, east of Valencia Avenue, approximately 0.07-acre consists of escaped non-native ornamental species.

Mexican fan palm (*Washingtonia robusta* Semi-Natural Woodland Alliance) - Mexican fan palms (*Washingtonia robusta*) cover approximately 0.03-acre in both the western and eastern portions of the Project Site. This vegetation cover type is non-native and does not have a close analog in the MCV II.

Tree of Heaven Groves (*Ailanthus altissima* Semi-Natural Woodland Stands) - Tree of heaven (*Ailanthus altissima*) is a non-native, invasive species that was introduced and has naturalized in the wild. This species occurs on approximately 0.01 acre along East Lambert Road in the portion of the Project Site west of Valencia Avenue. This vegetation alliance does not have a close analog in the MCV II.

Developed/Disturbed

Oil Field Roads and Pads - Existing oilfield operations, including roads, paths, and infrastructure, account for approximately 83.52-acres throughout the Project Site.

Agriculture - Existing agriculture fields and operations account for approximately 27.71-acres. This area is located in the southern half of the portion of the Project Site East of Valencia Avenue.

Developed - Developed areas account for approximately 10.61-acres, primarily consisting of adjacent roads and structures throughout the Project Site.

Active Nursery - In the area west of Valencia Avenue and north of East Lambert Road, an active nursery accounts for approximately 4.61-acres.

Bare - Bare ground accounts for approximately 1.37-acres, primarily in the southern portion of the Project Site east of Valencia Avenue, adjacent to the agricultural operations.

Concrete Flood Control Channel - The concrete flood control channel is located between the agricultural areas in the southern portion of the Project Site east of Valencia Avenue. This channel accounts for approximately 0.16-acre.

GENERAL PLANT & WILDLIFE SPECIES

General plant species documented within the Project Site are presented in the previous section.

A total of 65, species, including reptiles, birds, and mammals were recorded from within the Project Site. Two species of reptiles were observed including the western fence lizard (*Sceloporus occidentalis*) and the side blotched lizard (*Uta stansburiana*). Mammal species observed and/or detected onsite include mule deer (*Odocoileus hemionus*), coyote (*Canius latrans*), brush rabbit (*Sylvilagus bachmani*), bobcat (*Lynx rufus*), dusky woodrat (*Neotoma fuscipes*), Mexican free-tailed bat (*Tadarida brasiliensis*), canyon bat (*Parastrellus hesperus*), and California ground squirrel (*Otospermophilus beecheyi*). Birds were the most commonly observed wildlife, with 57 species observed. These include the acorn woodpecker (*Melanerpes formicivorus*), Allen's hummingbird (*Selasphorus sasin*), American crow (*Corvus brachyrhynchos*), American kestrel (*Falco sparverius*), American pipit (*Anthus rubescens)*, Anna's

hummingbird (*Calypte anna*), ash-throated flycatcher (*Myiarchus cinerascens*), brown-headed cowbird (*Molothrus ater*), blue-gray gnatcatcher (*Polioptila caerulea*), barn swallow (*Hirundo rustica),* Bewick's wren (*Thryomanes bewickii*), black phoebe (*Sayornis nigricans*), black-headed grosbeak (*Pheucticus melanocephalus*), blue grosbeak (*Passerina caerulea*), bushtit (*Psaltriparus minimus*), Bullock's oriole (*Icterus bullockii*), California quail (*Callipepla californica*), California scrub-jay (*Aphelocoma californica*), California thrasher (*Toxostoma redivivum*), California towhee (*Melozone crissalis*), Canada goose (*Branta canadensis*), cliff swallow (*Hirundo pyrrhonota*), common raven (*Corvus corax*), common yellowthroat (*Geothlypis trichas*), European starling (*Sturnus vulgaris*), greater roadrunner (*Geococcyx californianus*), hooded oriole (*Icterus cucullatus*), house finch (*Carpodacus mexicanus*), house wren (*Troglodytes aedon*), killdeer (*Charadrius vociferus*), lesser goldfinch (*Carduelis psaltria*), northern mockingbird (*Mimus polyglottos*), Nuttall's woodpecker (*Picoides nuttallii*), mourning dove (*Zenaida macroura*), northern rough-winged swallow (*Stelgidopteryx serripennis*), olive-sided flycatcher (*Contopus cooperi*), orange-crowned warbler (*Oreothlypis celata*), pacific-slope flycatcher (*Empidonax difficilis*), phainopepla (*Phainopepla nitens*), red-tailed hawk (*Buteo jamaicensis*), Say's phoebe (*Sayornis saya*), song sparrow (*Melospiza melodia*), spotted towhee (*Pipilo maculatus*), turkey vulture (*Cathartes aura*), Vaux's swift (*Chaetura vauxi*), western bluebird (*Sialia mexicana*), western kingbird (*Tyrranis verticalis*), western meadowlark (*Sturnella neglecta*), whimbrel (*Numenius phaeopus*), white-crowned sparrow (*Zonotrichia leucophrys*), white-throated swift (*Aeronautes saxatalis*), Wilson's warbler (*Cardellina pusilla*), wrentit (*Chamaea fasciata*), yellow warbler (*Setophaga petechia*), and yellow-rumped warbler (*Setophaga coronata*).

A complete list of floral and faunal species documented onsite is included in Appendix A–Floral/Faunal Compendia.

JURISDICTIONAL RESOURCES

United States Army Corps of Engineers/Regional Water Quality Control Board

United States Army Corps of Engineer and RWQCB jurisdiction on the Project Site is associated with four ephemeral drainage features, one of which traverses the western portion of the Project Site and one which traverses the eastern portion of the site and are designated as the "Drainage A" and "Drainage B." Drainage B includes a small tributary "Drainage C". The southern portion of the Project Site includes a concrete channelized segment of Carbon Canyon Creek ("Drainage D") as summarized in Table 5, *USACE/RWQCB Jurisdictional Resources Acreages*, and shown in Figure 9, *USACE/RWQCB Jurisdictional Resources Map*.

Table 5. USACE/RWQCB Jurisdictional Resource Acreages

Drainage Feature	Type	Acres	Linear Feet
Drainage A	Non-Wetland Channel	0.363	2,422
Drainage B	Non-Wetland Ephemeral Channel	0.043	241
Drainage C	Non-Wetland Ephemeral Channel	0.086	1,149
Drainage D	Concrete Ephemeral Channel	0.159	687
	Total	**0.651**	**4,499**

Source: GLA 2022.

Drainage A

Drainage A, which accounts for 0.363 acre of non-wetland waters, originates on the portion of the site north of East Lambert Road, where an offsite drainage ditch discharges to the site, and extends eastward, where the channel enters a 48-inch concrete pipe and is carried beneath an oil field road, turning to the south. The drainage, at this point, is depicted as a blue-line drainage on the U.S. Geological Survey (USGS) topographic map Yorba Linda, California. For the segment north of East Lambert, the drainage varies from five to ten feet in width and the banks and channel support dense stands of non-native invasive castor bean (*Ricinus communis*, FACU), summer mustard (*Hirschfeldia incana*, UPL), with a few small patches of mulefat (*Baccharis salicifolia*, FAC). The OHWM was indicated by the presence of an incised channel with debris wrack and shelving, and terracing. The drainage crosses under Lambert Road through a 13-foot paved tunnel constructed for oil operations that allows trucks and other vehicles to travel under East Lambert Road. South of East Lambert Road, the channel ranges from three to 12 feet in width, exhibits a sand and cobble bottom and supports mostly non-native species including Russian thistle (*Salsola tragus*, FACU), Canada horseweed (*Conyza canadensis*, FACU), summer mustard (*Hirschfeldia incana*, UPL), Spanish sunflower (*Pulicaria paludosa*, FAC), and a few small patches of mulefat. For the drainage segment south of East Lambert Road, the OHWM was indicated by the presence of an incised channel with debris wrack and shelving, changes in the character of the soil, and terracing and in some areas clear lines impressed on the banks. This segment of Drainage A is crossed by numerous active and inactive oilfield pipes, many of which are buried.

The hydrology source for this drainage does not represent “ordinary” conditions as the watershed for the drainage includes the Olinda Landfill, which includes large detention basins that discharge episodically, once the basins reach capacity, resulting in stream flows much larger than under a condition of normal runoff, where the water enters the drainage courses gradually. Such episodic discharges, combined with the highly erodible soils has caused substantial down cutting and the need for historic armoring of portions of the drainage that include the use of buried cable, broken concrete and asphaltic material derived from historic oil operations.

Drainage B

Drainage B, which is located on the portion of the site east of Valencia Avenue, accounts for 0.043-acre of non-wetland, ephemeral waters. This drainage feature originates at the northern site boundary, where a 24-inch culvert discharges to the site beneath Carbon Canyon Road. This drainage feature is not depicted as a blue-line drainage on the USGS topographic map Yorba Linda, California. This drainage feature also includes a tributary, which is described below.

Drainage B exhibits an OHWM only intermittently and generally ranges from four to ten feet in width, where an OHWM is discernible as illustrated in Figure 9, *USACE/RWQCB Jurisdictional Resources Map*. Much of the flow associated with this drainage occurs as sheet flow that moves across flat areas in the canyon bottom that are not sufficiently concentrated to form a definable channel that exhibits characteristics associated with an OHWM. The drainage sheet flows where an OHWM is lacking and traverses areas with a canopy of blue-gum eucalyptus (*Eucalyptus globulus*, UPL), Peruvian pepper

(*Schinus mole*, UPL), laurel sumac (*Malosma laurina*, UPL), and areas with summer mustard (*Hirschfeldia incana*, UPL). Sheet flows associated with Drainage B ultimately discharge to Drainage C below which the OHWM is no longer evident.

As noted for Drainage A, Drainage B has been subject to historic armoring of portions of the drainage that include the use of broken concrete and asphaltic material derived from historic oil operations.

Drainage C

Drainage C is located on the portion of the site east of Valencia Avenue, and accounts for 0.086-acre of non-wetland, ephemeral waters. This drainage feature originates in the north-central portion of the site, where a culvert discharges to a ravine. This drainage feature is not depicted as a blue-line drainage on the USGS topographic map Yorba Linda, California. Drainage C ranges from two to four feet in width and traverses an area with a canopy of laurel sumac (*Malosma laurina*, UPL). The drainage becomes indistinct at an oilfield pad and road, and there is no OHWM discernible for approximately 610 feet with the drainage again discernible on the south side of an oilfield access road. From that point the drainage extends another 190 feet beneath a canopy of eucalyptus before discharging to a storm drain at the site boundary.

Drainage D

Drainage D is a channelized concrete segment of Carbon Canyon Creek that originates at the base of Carbon Canyon Dam, extending approximately 687 feet, across the property where it enters a concrete box that carries flows downstream. The RWQCB jurisdiction for this feature totals 0.159-acre.

California Department of Fish and Wildlife

California Department of Fish and Wildlife jurisdiction is associated with the four (4) drainage features described above and as summarized in Table 6, *CDFW Jurisdictional Resources Acreages*, below followed by site-specific descriptions, and shown in Figure 10, *CDFW Jurisdictional Resources Map*.

.

Table 6.
CDFW Jurisdictional Resource Acreages

Drainage Feature	Non-Riparian Streambed	Riparian	Total Acres	Linear Feet
Drainage A	0.699	0.032	0.731	2,422
Drainage B	0.048	0.031	0.079	241
Drainage C	0.086	0.0	0.086	1,149
Drainage D	0.159	0.0	0.159	687
Total	**0.992**	**0.063**	**1.055**	**4,499**

1 inch = 600 feet

Drainage A

Drainage A accounts for 0.699-acre of streambed plus an additional 0.032-acre of mulefat scrub. The channel originates on the portion of the site north of East Lambert Road, where a drainage ditch along the northern boundary of the Project site receives waters via offsite sheet flows and discharges to the site. This drainage is depicted as a blue-line drainage on the USGS topographic map Yorba Linda, California. For the segment north of East Lambert Road, the drainage varies from ten to twenty-two feet in width and the banks and channel support dense stands of non-native invasive castor bean (*Ricinus communis*) with a few small patches of mulefat (*Baccharis salicifolia*). The presence of a stream was indicated by an incised channel with debris wrack and shelving and terracing. The drainage crosses under Lambert through a 13-foot tunnel constructed for oil operations that allows trucks and other vehicles to travel under East Lambert Road. South of East Lambert Road, the channel ranges from six to seventeen feet in width, exhibits a sand and cobble bottom and supports mostly non-native species including Russian thistle (*Salsola tragus*), Spanish sunflower (*Pulicaria paludosa*), and a few small patches of mule fat.

Drainage B

Drainage B is located on the portion of the site east of Valencia Avenue and accounts for 0.048-acre of ephemeral waters of which includes a small patch willow accounting for 0.031-acre. This drainage feature originates at the northern site boundary, where a 24-inch culvert discharges to the site beneath Carbon Canyon Road. This drainage feature is not depicted as a blue-line drainage on the USGS topographic map Yorba Linda, California. This drainage feature also includes a tributary described below. Drainage B generally ranges from four to ten feet in width and only exhibits a bed, bank, and channel intermittently, traversing an area with a canopy of blue-gum eucalyptus (*Eucalyptus globulus*, UPL), Peruvian pepper (*Schinus molle*), laurel sumac, and areas with summer mustard (*Hirschfeldia incana*). The drainage terminates above the confluence with the Drainage C where the streambed is no longer evident.

Drainage C

The Drainage C is located on the portion of the site east of Valencia Avenue, and accounts for 0.086-acre of ephemeral waters with no riparian habitat. This drainage feature originates in the north-central portion of the site, where a culvert discharges to a ravine. This drainage feature is not depicted as a blue-line drainage on the USGS topographic map Yorba Linda, California. Drainage C ranges from two to five feet in width and traverses an area with a canopy of laurel sumac. The drainage becomes indistinct at an oilfield pad and road, and there is no OHWM discernible for approximately 610 feet with the drainage again discernible on the south side of an oilfield access road. From that point the drainage extends another 190 feet beneath a canopy of eucalyptus before discharging to a storm drain at the site boundary.

Drainage D

Drainage D is a channelized concrete segment of Carbon Canyon Creek that originates at the base of Carbon Canyon Dam, extending approximately 687 feet, across the

property where it enters a concrete box that carries flows downstream. CDFW jurisdiction for this feature totals 0.159-acre.

SENSITIVE BIOLOGICAL RESOURCES

The following discussion describes the plant and wildlife species present, or potentially present within the property boundaries, that have been afforded special recognition by federal, state, or local resource conservation agencies and organizations, principally due to the species' declining or limited population sizes, usually resulting from habitat loss. Also discussed are habitats that are unique, of relatively limited distribution, or of particular value to wildlife. Protected sensitive species are classified by state and/or federal resource management agencies, or both, as threatened or endangered, under provisions of the state and federal endangered species act. Vulnerable or "at-risk" species that are proposed for listing as threatened or endangered (and thereby for protected status) are categorized administratively as "candidates" by the USFWS. CDFW uses various terminology and classifications to describe vulnerable species. There are additional sensitive species classifications applicable in California. These are described below.

Sensitive biological resources are habitats or individual species that have special recognition by federal, state, or local conservation agencies and organizations as endangered, threatened, or rare. The CDFW, USFWS, and special groups like the CNPS maintain watch lists of such resources. For the purpose of this assessment sources used to determine the sensitive status of biological resources are:

Plants: USFWS (2019), CDFW (2019d), CNDDB (CDFW 2019a), CNPS (2019), and Skinner and Pavlik (1994),

Wildlife: California Wildlife Habitat Relationships (2008), USFWS (2019), CDFW (2019b, 2019e), and CNDDB (CDFW 2019a),

Habitats: CNDDB (CDFW 2019a).

FEDERAL PROTECTION AND CLASSIFICATIONS

The Federal Endangered Species Act of 1973 (FESA) defines an endangered species as "any species that is in danger of extinction throughout all or a significant portion of its range..." Threatened species are defined as "any species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range." Under provisions of Section 9(a)(1)(B) of the FESA it is unlawful to "take" any listed species. "Take" is defined as follows in Section 3(18) of the FESA: "...harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct." Further, the USFWS, through regulation, has interpreted the terms "harm" and "harass" to include certain types of habitat modification as forms of a "take." These interpretations, however, are generally considered and applied on a case-by-case basis and often vary from species to species. In a case where a property owner seeks permission from a federal agency for an action that could affect a Federally listed plant and animal species, the property owner and agency are

required to consult with USFWS. Section 9(a)(2)(b) of the FESA addresses the protections afforded to listed plants. Recently, the USFWS instituted changes in the listing status of former candidate species. Former C1 (candidate) species are now referred to simply as candidate species and represent the only candidates for listing. Former C2 species (for which the USFWS had insufficient evidence to warrant listing at this time) and C3 species (either extinct, no longer a valid taxon or more abundant than was formerly believed) are no longer considered as candidate species. Therefore, these species are no longer maintained in list form by the USFWS, nor are they formally protected. However, some USFWS field offices have issued memoranda stating that former C2 species are henceforth to be considered Federal Species of Concern. This term is employed in this document, but carries no official protections. All references to Federally protected species in this report (whether listed, proposed for listing or candidate) include the most current published status or candidate category to which each species has been assigned by USFWS.

For purposes of this assessment, the following acronyms are used for federal status species:

FE	Federal Endangered
FT	Federal Threatened
FPE	Federal Proposed Endangered
FPT	Federal Proposed Threatened
FC	Federal Candidate for Listing

When a species is listed under the FESA, USFWS must designate critical habitat for the species in most cases, unless there are specific reasons for not designating critical habitat (e.g., such designation poses risks for the subject species). Critical habitat designations by USFWS are intended to guide federal agency action, and critical habitat is defined in Section 3 of the FESA as:

> (1) The specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the [FESA], on which [the USFWS believes] are found those physical or biological features
> (a) Essential to the conservation of the species and
> (b) Which may require special management considerations or protection; and
> (2) Specific areas outside the geographical area occupied by a species at the time it is listed, upon a determination [by the USFWS] that such areas are essential for the conservation of the species.

The FESA is designed to provide a certain level of protection to USFWS designated critical habitat only in those instances in which a federal agency is considering whether to grant an authorization, fund or take any other federal agency action that may destroy or adversely modify the designated critical habitat. Section 7(a)(2) of FESA requires federal agencies to consult with USFWS (or National Marine Fisheries Service (NMFS), as applicable) on federal agency actions that have the potential to destroy or adversely modify critical habitat. The designation of critical habitat does not affect land ownership or establish a refuge, wilderness, reserve, preserve, or other conservation area. The designation does not place any restrictions on a non-federal agency landowner or on State or local agencies or governments; nor does the designation restrict a non-federal

agency landowner from removing or otherwise adversely modifying land containing the critical habitat designation. Such designation does not allow the government or public to access private lands. Such designation does not require implementation of restoration, recovery, or enhancement measures by private landowners. Where a landowner seeks or requests Federal agency funding or authorization for an activity likely to negatively impact one or more members of a listed species or critical habitat, the consultation requirements of ESA Section 7(a)(2) generally apply.

Critical habitat designations are the USFWS's method of identifying for federal agencies (to the extent known using information available at the time of such designation) those physical or biological features ("PBFs") believed essential to the conservation of the species (such as space, food, cover, and protected habitat), focusing on the principal biological or physical constituent elements (formerly designated as primary constituent elements) within an area considered essential to the conservation of the species (such as roost sites, nesting grounds, seasonal wetlands, water quality, tide, soil type). Primary constituent elements (PCE's), now referred to as PBFs are the elements of physical or biological features which, when laid out in the appropriate quantity and spatial arrangement to provide for a species' life-history processes, the USFWS believes to be essential to the conservation of the species. Critical habitat designations are intended as a tool to be used by the USFWS in helping federal agencies comply with their obligations under Section 7 of the FESA.

Migratory birds including resident raptors and passerines are protected under the federal CDFG Code Section 3503.

The Bald Eagle and Golden Eagle Protection Act explicitly protects the bald eagle and golden eagle and imposes its own prohibition on any taking of these species. As defined in this act, take means to pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, or molest or disturb. Current USFWS policy is not to refer the incidental take of bald eagles for prosecution under the Bald Eagle and Golden Eagle Protection Act (16 U.S.C. 668-668d).

STATE PROTECTION AND CLASSIFICATIONS

California's Endangered Species Act (CESA) defines an endangered species as "...a native species or subspecies of a bird, mammal, fish, amphibian, reptile, or plant which is in serious danger of becoming extinct throughout all, or a significant portion, of its range due to one or more causes, including loss of habitat, change in habitat, overexploitation, predation, competition, or disease." The State defines a threatened species as "...a native species or subspecies of a bird, mammal, fish, amphibian, reptile, or plant that, although not presently threatened with extinction, is likely to become an endangered species in the foreseeable future in the absence of the special protection and management efforts required by this chapter. Any animal determined by the commission as rare on or before January 1, 1985 is a threatened species." Candidate species are defined as "...a native species or subspecies of a bird, mammal, fish, amphibian, reptile, or plant that the commission has formally noticed as being under review by the department for addition to either the list of endangered species or the list of threatened species, or a species for which the commission has published a notice of proposed regulation to add the species to either list." Candidate species may be afforded temporary protection as though they were already listed as threatened or

endangered at the discretion of the Fish and Game Commission. Unlike FESA, CESA does not include listing provisions for invertebrate species.

Article 3, Sections 2080 through 2085, of CESA addresses the taking of threatened or endangered species by stating “No person shall import into this state, export out of this state, or take, possess, purchase, or sell within this state, any species, or any part or product thereof, that the commission determines to be an endangered species or a threatened species, or attempt any of those acts, except as otherwise provided...” Under CESA, “take” is defined as “...hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill.” Exceptions authorized by the state to allow “take” require “...permits or memorandums of understanding...” and can be authorized for “...endangered species, threatened species, or candidate species for scientific, educational, or management purposes.” Sections 1901 and 1913 of the California Fish and Game Code provide that notification is required prior to disturbance.

Additionally, some sensitive mammals and birds are protected by the State as Fully Protected Mammals or Fully Protected Birds, as described in the California Fish and Game Code, Sections 4700 and 3511, respectively. SSC (“special” animals and plants) listings include special status species, including all state and federal protected and candidate taxa. This list is primarily a working document for the CDFW's CNDDB project. Informally listed taxa are not protected per se, but warrant consideration in the preparation of biotic assessments. For some species, the CNDDB is only concerned with specific portions of the life history, such as roosts, rookeries, or nest sites.

For the purposes of this assessment, the following acronyms are used for State status species:

SE	State Endangered
ST	State Threatened
SCE	State Candidate Endangered
SCT	State Candidate Threatened
SFP	State Fully Protected
SP	State Protected
SR	State Rare
SSC	California Species of Special Concern
CWL	California Watch List

Nesting birds, including raptors, are protected under California Fish and Game Code Section 3503, which reads, “It is unlawful to take, possess, or needlessly destroy the nest or eggs of any bird, except as otherwise provided by this code or any regulation made pursuant thereto.” In addition, under California Fish and Game Code Section 3503.5, “it is unlawful to take, possess, or destroy any birds in the orders Falconiformes or Strigiformes (birds-of-prey) or to take, possess, or destroy the nest or eggs of any such bird except as otherwise provided by this code or any regulation adopted pursuant thereto”. Passerines and non-passerine land birds are further protected under California Fish and Game Code 3513. As such, CDFW typically recommends surveys for nesting birds that could potentially be directly (e.g., actual removal of trees/vegetation) or

indirectly (e.g., noise disturbance) impacted by project-related activities. Disturbance during the breeding season could result in the incidental loss of fertile eggs or nestlings, or otherwise lead to nest abandonment. Disturbance that causes nest abandonment and/or loss of reproductive effort is considered “take” by CDFW.

The CNPS is a private plant conservation organization dedicated to the monitoring and protection of sensitive species in the State. This organization has compiled an inventory comprised of the information focusing on geographic distribution and qualitative characterization of rare, threatened, or endangered vascular plant species of California (Tibor 2001). The list serves as the candidate list for listing as threatened and endangered by CDFW. The CNPS has developed six (6) categories of rarity (CRPR):

CRPR 1A	Presumed extinct in California.
CRPR 1B	Rare, threatened, or endangered in California and elsewhere.
CRPR 2A	Plants presumed extirpated in California but common elsewhere
CRPR 2B	Plants rare, threatened, or endangered in California but more common elsewhere
CRPR 3	Plants about which we need more information – a review list.
CRPR 4	Species of limited distribution in California (i.e., naturally rare in the wild), but whose existence does not appear to be susceptible to threat.

As stated by the CNPS:

> “*Threat Rank is an extension added onto the California Rare Plant Rank and designates the level of endangerment by a 1 to 3 ranking with 1 being the most endangered and 3 being the least endangered. A Threat Rank is present for all California Rare Plant Rank 1B's, 2's, 4's, and the majority of California Rare Plant Rank 3's. California Rare Plant Rank 4 plants are seldom assigned a Threat Rank of 0.1, as they generally have large enough populations to not have significant threats to their continued existence in California; however, certain conditions exist to make the plant a species of concern and hence be assigned a California Rare Plant Rank. In addition, all California Rare Plant Rank 1A (presumed extinct in California), and some California Rare Plant Rank 3 (need more information) plants, which lack threat information, do not have a Threat Rank extension.” (CNPS 2010)*

0.1	Seriously threatened in California (over 80% of occurrences threatened / high degree and immediacy of threat)
0.2	Fairly threatened in California (20-80% occurrences threatened / moderate degree and immediacy of threat)
0.3	Not very threatened in California (<20% of occurrences threatened / low degree and immediacy of threat or no current threats known)

The CNDDB provides global and state rankings for species and communities based on a system developed by The Nature Conservancy to measure rarity of a species. The ranking provides a shorthand formula regarding the rarity of a species or community

and is based on the best information available from multiple sources, including state and federal listings, and other groups that recognize species as sensitive (e.g., Bureau of Land Management, Audubon Society, etc.). State and global rankings are used to prioritize conservation and protection efforts so that the rarest species/communities receive immediate attention. In both cases, the lower ranking (i.e., G1 or S1) indicates extreme rarity. Rare species are given a ranking from 1 to 3. Species with a ranking of 4 or 5 has been determined to be common. If the exact global/state ranking is undetermined, a range is generally provided. For example, a global ranking of "G1G3" indicates that a species/community global rarity is between G1 and G3. A ranking with "?" such as S4? indicates that that the ranking is considered provisional and more information is required. If the animal being considered is a subspecies of a broader species, a "T" ranking is attached to the global ranking. The following are descriptions of global and state rankings:

Global Rankings

- G1 – Critically imperiled globally because of extreme rarity (5 or fewer occurrences), or because of some factor(s) making it especially vulnerable to extinction.
- G2 – Imperiled globally because of rarity (6-20 occurrences), or because of some other factor(s) making it very vulnerable to extinction throughout its range.
- G3 – Either very rare and local throughout its range (21 to 100 occurrences), or found locally (even abundantly at some of its locations) in a restricted range (e.g., a physiographic region), or because of some other factor(s) making it vulnerable to extinction throughout its range.
- G4 – Uncommon but not rare; some cause for long-term concern due to declines or other factors.
- G5 – Common, widespread and abundant.

State Rankings

- S1 – Extremely rare; five or fewer viable occurrences in the state; or less than 1,000 individuals; or less than 1,280 acres; and may be especially vulnerable to extirpation.
- S2 – Very rare; between 6 and 20 viable occurrences; or less than 3,000 individuals, or between 1,280 and 6,400 acres and may be susceptible to becoming extirpated.
- S3 – Rare to uncommon; 21 to 100 viable occurrences; or 3,000 to 10,000 individuals, or between 6,400 and 32,000 acres; S3 ranked species are not yet susceptible to becoming extirpated in the state but may be if additional populations are destroyed.
- S4 - Uncommon but not rare; some cause for long-term concern due to declines or other factors.
- S5 - Common, widespread, and abundant in the state.

The Native Plant Protection Act (NPPA) enacted a process by which plants are listed as rare or endangered. The NPPA regulates collection, transport, and commerce in plants that are listed. The CESA follows the NPPA and covers both plants and wildlife

determined to be threatened with extinction or endangered. Plants listed as rare under the NPPA are designated as threated under the CESA.

STATE AND FEDERAL TAKE AUTHORIZATION FOR LISTED SPECIES

Federal or state authorizations of impacts to or incidental take of a listed species by a private individual or other private entity would be granted in one of the following ways:

- Section 7 of the FESA stipulates that any federal action that may affect a species listed as threatened or endangered requires a formal consultation with USFWS to ensure that the action is not likely to jeopardize the continued existence of the listed species or result in destruction or adverse modification of designated critical habitat. 16 U.S.C. 1536(a)(2).
- In 1982, the FESA was amended to give private landowners the ability to develop Habitat Conservation Plans (HCP) pursuant to Section 10(a) of the FESA. Upon development of an HCP, the USFWS can issue incidental take permits for listed species where the HCP specifies at minimum, the following: (1) the level of impact that will result from the taking, (2) steps that will minimize and mitigate the impacts, (3) funding necessary to implement the plan, (4) alternative actions to the taking considered by the applicant and the reasons why such alternatives were not chosen, and (5) such other measures that the Secretary of the Interior may require as being necessary or appropriate for the plan.
- Sections 2090-2097 of the CESA require that the state lead agency consult with CDFW on projects with potential impacts on state-listed species. These provisions also require CDFW to coordinate consultations with USFWS for actions involving Federally listed as well as State-listed species. In certain circumstances, Section 2080.1 of the California Fish and Game Code allows CDFW to adopt the federal incidental take statement or the 10(a) Permit as its own based on its findings that the federal permit adequately protects the species under state law.

SENSITIVE HABITATS

The CNDDB identifies the following ten (10) special-status vegetation alliances/communities for Yorba Linda, San Dimas, Ontario, Prado Dam, Black Star Canyon, Orange, Anaheim, La Habra, and Baldwin Park quadrangle maps:

1. California Walnut Woodland
2. Riversidean Alluvial Fan Sage Scrub
3. Southern California Arroyo Chub/Santa Ana Sucker Stream
4. Southern Coast Live Oak Riparian Forest
5. Southern Cottonwood Willow Riparian Forest
6. Southern Interior Cypress Forest
7. Southern Riparian Scrub
8. Southern Sycamore Alder Riparian Woodland
9. Southern Willow Scrub
10. Walnut Forest

The Project Site contains the following special-status vegetation alliances/communities:

1. Southern California Black Walnut Woodland

2. Blue Elderberry Stands (not listed in CNDDB for the subject quads)
3. Goodding's Black Willow Forest (not listed in CNDDB for the subject quads)
4. Coast Prickly Pear (not listed in CNDDB for the subject quads)

The location(s) for each of these habitats is provided on Figure 3, *Vegetation Communities Map* and acreages tabulated in Table 4, *Vegetation Community Acreages*.

SENSITIVE PLANTS

The following special-status plant was detected within the Project Site: Southern California black walnut, a CRPR List 4.2 taxon.

Southern California Black Walnut (*Juglans californica*)

This species is not Federal or State listed as threatened or endangered; however, it is on the California Rare Plant Rank List 4.2 meaning that the species is of limited distribution throughout its range in California. The approximate number of southern California black walnut trees documented within the Project Site is 126. These individuals are scattered throughout the northern half of the eastern Project Site in relatively disturbed areas among eucalyptus trees, pepper trees, and laurel sumac shrubs as shown in Figure 11, *Sensitive Floral Species Observation Map*.

No other special-status plants were detected within the Project Site (GLA 2022).

Table 7, *Sensitive Plant Species with Potential to Occur Onsite*, provides a list of special-status plants evaluated for the Project Site through general biological surveys, habitat assessments, and focused surveys. Species were evaluated based on the following factors: 1) species identified by the CNDDB and CNPS as occurring (either currently or historically) on or in vicinity of the Project Site, and 2) any other special-status plants that are known to occur within the vicinity of the Project Site, or for which potentially suitable habitat occurs within the Project Site.

Table 7.
Sensitive Plant Species with Potential to Occur Onsite.

Species Name Scientific Name	Status	Habitat Requirements	Potential for Occurrence
Allen's pentachaeta *Pentachaeta aurea* ssp. *allenii*	Federal: None State: None CRPR: List 1B.1	Openings in coastal sage scrub and valley and foothill grassland. Blooming period Mar-Jun. Elevation range 75-520m.	Does not occur
Brand's star phacelia *Phacelia stellaris*	Federal: None State: None CRPR: List 1B.1	Coastal dunes and coastal sage scrub. Blooming period Mar-Jun. Elevation range 1-400m.	Does not occur
Braunton's milkvetch *Astragalus brauntonii*	Federal: FE State: None CRPR: List 1B.1	Chaparral, coastal scrub, and valley and foothill grassland in recently burns or disturbed areas. Usually occurs in sandstone with carbonate layers.	Potential to occur

Species Name Scientific Name	Status	Habitat Requirements	Potential for Occurrence
Brewer's calandrinia *Calandrinia breweri*	Federal: None State: None CRPR: List 4.2	Chaparral, Coastal scrub. Blooming period (Jan)Mar-Jun.	Does not occur
California androsace *Androsace elongata ssp. acuta*	Federal: None State: None CRPR: List 4.2	Chaparral, Cismontane woodland, Coastal scrub, Meadows and seeps, Pinyon and juniper woodland, Valley and foothill grassland. Blooming period Mar-Jun	Does not occur
California beardtongue *Penstemon californicus*	Federal: None State: None CRPR: List 1B.2	Chaparral, lower montane coniferous forest, pinyon and juniper woodland/sandy. Blooming period May-Jun (Aug). Elevation range 1170-2300m.	Does not occur
California muhly *Muhlenbergia californica*	Federal: None State: None CRPR: List 4.3	Chaparral, Coastal scrub, Lower montane coniferous forest, Meadows and seeps. Blooming period Jun-Sep.	Does not occur
California saw-grass *Cladium californicum*	Federal: None State: None CRPR: List 2B.2	Meadows and seeps, Marshes and swamps Alkaline or Freshwater. Blooming period Jun-Sep.	Does not occur
Catalina mariposa lily *Calochortus catalinae*	Federal: None State: None CRPR: List 4.2	Chaparral, Cismontane woodland, Coastal scrub, Valley and foothill grassland. Blooming period (Feb) Mar-Jun.	Potential to occur but not detected
Chaparral nolina *Nolina cismontana*	Federal: None State: None CRPR: List 1B.2	Chaparral, coastal scrub (sandstone or gabbro).	Potential to occur but not detected
Chaparral ragwort Senecio aphanactis	Federal: None State: None CRPR: List 2B.2	Chaparral, Cismontane woodland, Coastal scrub. Blooming period Jan-Apr (May).	Does not occur
Chaparral sand verbena *Abronia villosa* var. *aurita*	Federal: None State: None CRPR: List 1B.1	Sandy soils in chaparral, coastal sage scrub.	Does not occur
Coulter's goldfields *Lasthenia glabrate ssp. coulteri*	Federal: None State: None CRPR: List 1B.1	Playas, vernal pools, marshes and swamps (coastal salt). Blooming period Feb-Jun. Elevation range 1-1220m.	Does not occur
Coulter's matilija poppy *Romneya coulteri*	Federal: None State: None CRPR: List 4.2	Chaparral, Coastal scrub. Blooming period Mar-Jul (Aug).	Potential to occur but not detected
Coulter's saltbush *Atriplex coulteri*	Federal: None State: None CRPR: List 1B.2	Coastal bluff scrub, coastal dunes, coastal sage scrub, valley and foothill grassland. Occurring on alkaline or clay soils.	Does not occur
Davidson's saltscale *Atriplex serenana var. davidsonii*	Federal: None State: None CRPR: List 1B.2	Coastal bluff scrub, Coastal scrub. Blooming period Apr-Oct.	Does not occur

Species Name Scientific Name	Status	Habitat Requirements	Potential for Occurrence
Engelmann oak *Quercus engelmannii*	Federal: None State: None CRPR: List 4.2	Chaparral, Cismontane woodland, Riparian woodland, Valley and foothill grassland. Blooming period Mar-Jun	Does not occur
Fish's milkwort *Polygala cornuta var. fishiae*	Federal: None State: None CRPR: List 4.3	Chaparral, Cismontane woodland, Riparian woodland. Blooming period May-Aug	Does not occur
Gambel's water cress *Nasturtium gambelii*	Federal: FE State: ST CRPR: List 1B.1	Freshwater or brackish marches and swamps. Blooming period Apr-Oct. Elevation range 5-330m.	Does not occur
Heart-leaved pitcher sage *Lepechinia cardiophylla*	Federal: None State: None CRPR: List 1B.2	Closed-cone coniferous forest, chaparral, and cismontane woodland. Occurring on gabbroic, metavolcanic, or serpentinite soils. Blooming period Apr-Jul. Elevation range 520-1370m.	Does not occur
Hubby's phacelia *Phacelia hubbyi*	Federal: None State: None CRPR: List 4.2	Chaparral, Coastal scrub, Valley and foothill grassland. Blooming period Apr-Jul	Potential to occur but not detected
Intermediate mariposa lily *Calochortus weedii* var. *intermedius*	Federal: None State: None CRPR: List 1B.2	Rocky soils in chaparral, coastal sage scrub, valley and foothill grassland.	Does not occur
Intermediate monardella *Monardella hypoleuca ssp. intermedia*	Federal: None State: None CRPR: List 1B.3	Chaparral, Cismontane woodland, Lower montane coniferous forest (sometimes). Blooming period Apr-Sep.	Does not occur
Jokerst's monardella *Monardella australis ssp. jokerstii*	Federal: None State: None CRPR: List 1B.1	Chaparral, Lower montane coniferous forest. Blooming period Jul-Sep.	Does not occur
Lewis' evening-primrose *Camissoniopsis lewisii*	Federal: None State: None CRPR: List 3	Coastal bluff scrub, Cismontane woodland, Coastal dunes, Coastal scrub, Valley and foothill grassland. Blooming period Mar-May (Jun).	Does not occur
Long-spined spineflower *Chorizanthe polygonoides* var. *longispina*	Federal: None State: None CRPR: List 1B.2	Clay soils in chaparral, coastal sage scrub, meadows and seeps, and valley and foothill grasslands. Blooming period Apr-Jul. Elevation range 30-1530m.	Does not occur
Lucky morning-glory *Calystegia felix*	Federal: None State: None CRPR: List 1B.1	Meadows and seeps (sometimes alkaline), Riparian scrub (alluvial). Blooming period Mar-Sep	Does not occur

Species Name Scientific Name	Status	Habitat Requirements	Potential for Occurrence
Malibu baccharis *Baccharis malibuensis*	Federal: None State: None CRPR: List 1B.1	Chaparral, cismontane woodland, coastal sage scrub, riparian woodland. Blooming period August. Elevation range 150-305m.	Does not occur
Many-stemmed dudleya *Dudleya multicaulis*	Federal: None State: None CRPR: List 1B.2	Chaparral, coastal sage scrub, valley and foothill grassland. Often occurring in clay soils.	Does not occur
Mesa horkelia *Horkelia cuneata ssp. puberula*	Federal: None State: None CRPR: List 1B.1	Chaparral, cismontane woodland, and coastal scrub. Occurring on sandy or gravelly soils. Blooming period Feb-Jul (Sept). Elevation range 70-810m.	Does not occur
Ocellated Humboldt lily *Lilium humboldtii ssp. ocellatum*	Federal: None State: None CRPR: List 4.2	Chaparral, Cismontane woodland, Coastal scrub, Lower montane coniferous forest, Riparian woodland. Blooming period Mar-Jul (Aug)	Does not occur
Palmer's grapplinghook *Harpagonella palmeri*	Federal: None State: None CRPR: List 4.2	Chaparral, Coastal scrub, Valley and foothill grassland. Blooming period Mar-May.	Does not occur
Paniculate tarplant *Deinandra paniculata*	Federal: None State: None CRPR: List 4.2	Coastal scrub, Valley and foothill grassland, Vernal pools. Blooming period (Mar)Apr-Nov	Potential to occur but not detected
Parish’s brittlescale *Atriplex parishii*	Federal: None State: None CRPR: List 1B.1	Chenopod scrub, playas, vernal pools. Blooming period Jun-Oct. Elevation range 25-1900m.	Does not occur
Parry's spineflower *Chorizanthe parryi var. parryi*	Federal: None State: None CRPR: List 1B.1	Chaparral, Cismontane woodland, Coastal scrub, Valley and foothill grassland. Blooming period Apr-Jun	Does not occur
Plummer’s mariposa lily *Calochortus plummerae*	Federal: None State: CSC CRPR: List 4.2	Found in coastal sage scrub and chaparral habitats. In Orange County the species is known to occur in the Chino-Puente Hills.	Does not occur
Prostrate vernal pool navarretia *Navarretia prostrata*	Federal: None State: None CRPR: List 1B.1	Coastal sage scrub, meadows and seeps, valley and foothill grassland (alkaline), vernal pools. Occurring on mesic soils. Blooming period Apr-Jul. Elevation range 15-700m.	Does not occur
Rigid fringe pod *Thysanocarpus rigidus*	Federal: None State: None CRPR: List 1B.2	Pinyon and juniper woodland. Dry rocky slopes. Blooming period Feb-May.	Does not occur
Robinson's pepper grass *Lepidium virginicum* var. *robinsonii*	Federal: None State: None CRPR: List 1B.2	Chaparral, coastal sage scrub. Blooming period Jan-Jul. Elevation range 1-885m.	Potential to occur but not detected

Species Name Scientific Name	Status	Habitat Requirements	Potential for Occurrence
Salt spring checkerbloom *Sidalcea neomexicana*	Federal: None State: None CRPR: List 2B.2	Mesic, alkaline soils in chaparral, coastal sage scrub, lower montane coniferous forest, Mojavean desert scrub, and playas.	Does not occur
San Bernardino aster *Symphyotrichum defoliatum*	Federal: None State: None CRPR: List 1B.2	Cismontane woodland, coastal scrub, lower montane coniferous forest, meadows and seeps, marshes and swamps, valley and foothill grassland (vernally mesic)/near ditches, streams, and springs. Blooming period Jul-Nov. Elevation range 2-2040m.	Does not occur
San Fernando Valley spineflower *Chorizanthe parryi* var. *fernandina*	Federal: Candidate State: SE CRPR: List 1B.1	Coastal sage scrub, valley and foothill grassland. Occurring on sandy soils. Blooming period Apr-Jul. Elevation range 150-1220m.	Does not occur
Santa Ana River woolly star *Eriastrum densifolium* ssp. *sanctorum*	Federal: FE State: SE CRPR: List 1B.1	Alluvial fan sage scrub, chaparral. Occurring on sandy or rocky soils.	Does not occur
Slender-horned spineflower *Dodecahema leptoceras*	Federal: FE State: SE CRPR: List 1B.1	Sandy soils in alluvial fan coastal scrub, chaparral, cismontane woodland. Blooming period Apr-Jun. Elevation range 200-760m.	Does not occur
Small-flowered morning-glory *Convolvulus simulans*	Federal: None State: None CRPR: List 4.2	Chaparral (openings), Coastal scrub, Valley and foothill grassland. Blooming period Mar-Jul	Does not occur
Smooth tarplant *Centromadia pungens ssp. laevis*	Federal: None State: None CRPR: List 1B.1	Chenopod scrub, meadows and seeps, playas, Riparian woodland, valley and foothill grassland. Blooming period Apr-Sep	Does not occur
South coast branching phacelia *Phacelia ramosissima var. austrolitoralis*	Federal: None State: None CRPR: List 3.2	Chaparral, Coastal dunes, Coastal scrub, Marshes and swamps (coastal salt). Blooming period Mar-Aug	Does not occur
Southern California black walnut *Juglans californica*	Federal: None State: None CRPR: List 4.2	Occurs in grasslands, floodplains and sage scrub/chaparral habitats. The Chino Hills are an important distributional center for this species.	126 individuals Observed on site including 0.07 Southern California black walnut grove
Southern tarplant *Centromadia parryi* ssp. *australis*	Federal: None State: None CRPR: List 1B.1	Disturbed habitats, margins of marshes and swamps, vernally mesic valley and foothill grassland, vernal pools.	Does not occur
Tecate cypress *Hesperocyparis forbesii*	Federal: None State: None CRPR: List 1B.1	Occurs in clayey or alkali substrates, usually in grasslands or in alkali meadow habitats.	Does not occur

Species Name Scientific Name	Status	Habitat Requirements	Potential for Occurrence
Vernal barley *Hordeum intercedens*	Federal: None State: None CRPR: List 3.2	Coastal dunes, Coastal scrub, Valley and foothill grassland (saline flats and depressions), Vernal pools. Blooming period Mar-Jun	Does not occur
Western spleenwort *Asplenium vespertinum*	Federal: None State: None CRPR: List 4.2	Chaparral, Cismontane woodland, Coastal scrub. Blooming period Feb-Jun.	Does not occur
White rabbit-tobacco *Pseudognaphalium leucocephalum*	Federal: None State: None CRPR: List 2B.2	Chaparral, cismontane woodland, coastal scrub, and riparian woodland in sandy and gravelly soils. Blooming period (Jul)Aug-Nov (Dec). Elevation range 0-2100m.	Does not occur
Woolly chaparral-pea *Pickeringia montana var. tomentosa*	Federal: None State: None CRPR: List 4.3	Chaparral. Blooming period May-Aug	Does not occur

California Native Plant Society (CNPS): California Rare Plant Rank (CRPR)
CRPR 1A – plants presumed extinct in California
CRPR 1B – plants rare, threatened, or endangered in California, but more common elsewhere
CRPR 2A – plants presumed extirpated in California but common elsewhere
CRPR 2B – plants rare, threatened, or endangered in California but more common elsewhere
CRPR 3 – plants about which we need more information, a review list
CRPR 4 – plants of limited distribution, a watch list
.1 – Seriously endangered in California
.2 – Fairly endangered in California
.3 – Not very endangered in California

Federal (USFWS) Protection and Classification
FE – Federally Endangered
FT – Federally Threatened
FC – Federal Candidate for Listing

State (CDFW) Protection and Classification
SE – State Endangered
ST – State Threatened

Occurrence
- Does not occur – The site does not contain habitat for the species and/or the site does not occur within the geographic range of the species.
- Absent – The site contains suitable habitat for the species, but the species has been confirmed absent through focused surveys.
- Not expected to occur – The species is not expected to occur onsite due to low habitat quality, however absence cannot be ruled out.
- Potential to occur – The species has a potential to occur onsite based on suitable habitat, however its presence/absence could not be confirmed.
- Present = The species was detected onsite incidentally or through focused surveys

SENSITIVE WILDLIFE

The following five (5) special-status animals were detected at the Project Site:

Coastal California Gnatcatcher (*Polioptila californica californica*)

Two breeding pairs of coastal California gnatcatchers (Federally threatened, State species of special concern (SSC)) were detected onsite during focused survey efforts as shown in Figure 12, *Sensitive Faunal Species Observation Map*. One (1) pair was associated with a 0.26-acre patch of California sagebrush in the central-western portion of the Project Site east of Valencia Avenue. This was the same area where a breeding pair was detected during 2017 protocol surveys. A second breeding pair was detected on a knoll approximately 750 feet northeast of the first pair in California sagebrush. During the 2017 survey a single gnatcatcher was observed in this area. The Project Site contains approximately 10.33-acres of suitable coastal scrub habitat within the close proximity to the coastal California gnatcatcher observations.

Least Bell's Vireo (*Vireo bellii pusillus*)

During protocol gnatcatcher surveys in 2018 an early-season migrant least Bell's vireos (LBV) passing through the survey area as shown in Figure 12, *Sensitive Faunal Species Observation Map*. This bird is a State- and federally listed endangered species. It occurs in dense riparian habitats with a stratified canopy, including southern willow scrub, mule fat scrub, and riparian forest, which does not occur on the site. Detections were of single birds and observation locations were not repeated during the early season observations, with one exception. The exception was a repeated observation of a single bird located in a eucalyptus woodland located south of the active oil field and north of the active agricultural area. Based on the timing of the LBV observations (late May to early June) it was most likely an unpaired male. The location is vegetated with a canopy of eucalyptus trees and understory of sparse mulefat, blue elderberry, and poison oak. During crotch bumblebee surveys on April 11th, 2020 migrating LBV were detected in eucalyptus on the project site and a single LBV was detected during subsequent surveys singing in elderberry immediately adjacent to the location where LBV was observed in 2018.

Yellow Warbler (*Setophaga petechia*)

A yellow warbler (state species of special concern) was documented foraging on the Project Site near the southwest corner of the parcel east of Valencia Avenue, as shown in Figure 12, *Sensitive Faunal Species Observation Map*. This species is a migratory songbird that breeds in riparian habitats in southern California. The yellow warbler exhibits habitat requirements similar to the yellow-breasted chat and least Bell's vireo. Suitable habitat typically consists of multi-layered riparian scrub or willow woodland corridors along flowing streams.

California horned lark (*Eremophila alpestris actia*)

The California horned lark is a CDFW Watch List species. The California horned lark breeds and resides in the coastal region of California from Sonoma County southeast to the United States/Mexican border, including most of the San Joaquin Valley, and

eastward to the foothills of the Sierra Nevada (Grinnell and Miller 1944; AOU 1998). The California horned lark is a common to abundant resident in a variety of open habitats, usually where trees and large shrubs are absent (Zeiner, *et al*. 1990). Range-wide, California horned larks breed in level or gently sloping shortgrass prairie, montane meadows, "bald" hills, open coastal plains, fallow grain fields, and alkali flats (Grinnell and Miller 1944). The California horned lark was observed foraging within the grassland portions of the Project.

Cooper's Hawk (*Accipiter cooperii*)

Cooper's hawk is a CDFW Watch List species when nesting. This species occurs in riparian areas and oak woodlands, and most commonly in montane canyons. This species is also known to use urban areas, occupying mature trees associated with residential and commercial development and using utility poles as perches. Cooper's hawk was observed foraging within the Project Site and the mature Eucalyptus trees represent suitable nesting habitat.

Table 8, *Sensitive Wildlife Species with Potential to Occur Onsite,* provides a list of special-status animals evaluated for the Project Site through general biological surveys, habitat assessments, and focused surveys. Species were evaluated based on the following factors, including: 1) species identified by the CNDDB as occurring (either currently or historically) on or in vicinity of the Project Site, and 2) any other special-status animals that are known to occur within the vicinity of the Project Site, for which potentially suitable habitat occurs on the Project Site.

Table 8.
Sensitive Wildlife Species with Potential to Occur Onsite

Species Name	Status	Habitat Requirements	Potential for Occurrence
American badger *Taxidea taxus*	Federal: None State: None CDFW: SSC	Occurs drier shrub, forest, and herbaceous habitats. Needs open, uncultivated ground and friable soils for digging burrows. Preys on burrowing rodents.	Not expected to occur
American peregrine falcon *Falco peregrinus anatum*	Federal: None State: None CDFW: FP	Wetlands near cliffs, coastal areas and inland mountains.	Not expected to occur
Arroyo chub *Gila orcuttii*	Federal: None State: None CDFW: SSC	Slow-moving or backwater sections of warm to cool streams with substrates of sand or mud.	No potential to occur on site
Bald eagle *Haliaeetus leucocephalus*	Federal: None State: SE CDFW: FP	Primarily in or near seacoasts, rivers, swamps, and large lakes. Perching sites consist of large trees or snags with heavy limbs or broken tops.	No potential to occur on site
Bank swallow *Riparia riparia*	Federal: None State: ST CDFW: None	Colonial nester; nests primarily in riparian and other lowland habitats west of the desert. Requires vertical banks/cliffs with fine textured	No potential to occur on site

Species Name	Status	Habitat Requirements	Potential for Occurrence
		sandy soils near streams, rivers, lakes, or ocean in order to dig nesting holes.	
Big free-tailed bat *Nyctinomops macrotis*	Federal: None State: None CDFW: SSC	Occurs in low-lying arid areas in Southern California. Roosts in high cliffs or rocky outcrops.	Not expected to occur – not detected during focused surveys
Burrowing owl *Athene cunicularia*	Federal: None State: None CDFW: SSC	Shortgrass prairies, grasslands, lowland scrub, agricultural lands (particularly rangelands), coastal dunes, desert floors, and some artificial, open areas as a year-long resident. Occupies abandoned ground squirrel burrows as well as artificial structures such as culverts and underpasses.	Absent. Not observed on site during focused surveys.
California black rail *Laterallus jamaicensis coturniculus*	Federal: None State: ST CDFW: FP	Nests in high portions of salt marshes, shallow freshwater marshes, wet meadows, and flooded grassy vegetation.	No potential to occur on site due to lack of suitable habitat
California diplectronan caddisfly *Diplectrona californica*	Federal: None State: None CDFW: None	Larvae live in fast-flowing, cool streams.	No potential to occur on site due to lack of suitable habitat
California glossy snake *Arizona elegans occidentalis*	Federal: None State: None CDFW: SSC	Inhabits arid scrub, rocky washes, grasslands, chaparral.	Not expected to occur
California horned lark *Eremophila alpestris actia*	Federal: None State: None CDFW: WL	Occupies a variety of open habitats, usually where trees and large shrubs are absent.	Detected onsite.
Coast patch-nosed snake *Salvadora hexalepis virgultea*	Federal: None State: None CDFW: SSC	Occurs in coastal chaparral, desert scrub, washes, sandy flats, and rocky areas.	Not expected to occur
Coast horned Lizard *Phrynosoma blainvillii*	Federal: None State: None CDFW: SSC	Chaparral and coastal sage scrub	Moderate potential to occur on site. Not observed.
Coast Range newt *Taricha torosa*	Federal: None State: None CDFW: SSC	Wet forests, oak forests, chaparral, and rolling grasslands.	No potential to occur on site
Coastal cactus wren *Campylorhynchus brunneicapillus sandiegensis*	Federal: BBC State: None CDFW: SSC	Occurs almost exclusively in cactus (cholla and prickly pear) dominated coastal sage scrub.	Limited potential to occur on site. Not observed during focused surveys.
Coastal California gnatcatcher *Polioptila californica californica*	Federal: FT State: None CDFW: SSC	Low elevation coastal sage scrub and coastal bluff scrub.	Observed breeding on site.
Coastal whiptail *Aspidoscelis tigris stejnegeri*	Federal: None State: None CDFW: SSC	Open, often rocky areas with little vegetation, or sunny microhabitats within shrub or grassland associations.	Potential to occur on site. Not observed.

Species Name	Status	Habitat Requirements	Potential for Occurrence
Cooper's hawk *Accipiter cooperii*	Federal: None State: None CDFW: WL	Primarily occurs in riparian areas and oak woodlands, most commonly in montane canyons. Known to use urban areas, occupying trees among residential and commercial.	Detected onsite.
Golden eagle *Aquila chrysaetos*	Federal: BCC State: None CDFW: FP	In southern California, occupies grasslands, brushlands, deserts, oak savannas, open coniferous forests, and montane valleys. Nests on rock outcrops and ledges.	Not expected to occur – not observed during surveys
Grasshopper sparrow *Ammodramus savannarum*	Federal: None State: None CDFW: SSC	Occurs in dense grasslands on rolling hills, lowland plains, in valleys, and on hillsides on lower mountain slopes. Favors native grasslands with a mix of grasses, forbs, and scattered shrubs. Loosely colonial when nesting.	Not expected to occur – not observed during surveys
Great blue heron *Ardea herodias*	Federal: None State: None CDFW: None	Saltwater and freshwater habitats, from open coasts, marshes, sloughs, riverbanks, and lakes to backyards. Forages in grasslands and agricultural fields. Nests in trees or high places.	Potential to occur for occasional foraging
Hoary bat *Lasiurus cinereus*	Federal: None State: None CDFW: None	Prefers open habitats or habitat mosaics, with access to trees for cover and open areas or habitat edges for feeding. Roosts in dense foliage of medium to large trees. Feeds primarily on moths. Requires water.	Potential to occur. Not detected during focused bat surveys
Least Bell's vireo *Vireo bellii pusillus*	Federal: FE State: SE CDFW: None	Dense riparian habitats with a stratified canopy, including southern willow scrub, mule fat scrub, and riparian forest.	Observed migrating through site. Low potential for breeding due to marginal habitat quality.
Long-eared owl *Asio otus*	Federal: None State: None CDFW: SSC	Riparian habitats are required by the long-eared owl, but it also uses live-oak thickets and other dense stands of trees.	Not expected to occur
Merlin *Falco columbarius*	Federal: None State: None CDFW: WL	Nest in forested openings, edges, and along rivers. Winter in open forests, grasslands, and especially coastal areas with flocks of small songbirds or shorebirds.	Not expected to occur – would only occur as wintering or migrant

Species Name	Status	Habitat Requirements	Potential for Occurrence
Northern leopard frog *Lithobates pipiens*	Federal: None State: None CDFW: SSC	Inhabits grassland, wet meadows, potholes, forests, woodland, brushlands, springs, canals, bogs, marshes, reservoirs. Generally, prefers permanent water with abundant aquatic vegetation.	No potential to occur on site
Northwestern San Diego pocket mouse *Chaetodipus fallax fallax*	Federal: None State: None CDFW: SSC	Coastal sage scrub, sage scrub/grassland ecotones, and chaparral.	Not expected to occur
Orange-throated whiptail *Aspidoscelis hyperythra*	Federal: None State: None CDFW: SSC	Coastal sage scrub, chaparral, non-native grassland, oak woodland, and juniper woodland.	Potential to occur on site
Pallid Bat *Antrozous pallidus*	Federal: None State: None CDFW: SSC	Habitats with rocky, outcropped areas.	Potential to occur for foraging. Not detected during surveys.
Pocketed free-tailed bat *Nyctinomops femorosaccus*	Federal: None State: None CDFW: SSC	Rocky areas with high cliffs in pine-juniper woodlands, desert scrub, palm oasis, desert wash, and desert riparian.	Not expected to occur - not detected during surveys.
Red-diamond rattlesnake *Crotalus ruber*	Federal: None State: None CDFW: SSC	Habitats with heavy brush and rock outcrops, including coastal sage scrub and chaparral.	Potential to occur on site - not detected during surveys.
San Bernardino kangaroo rat *Dipodomys merriami parvus*	Federal: FE State: None CDFW: SSC	Typically found in Riversidean alluvial fan sage scrub and sandy loam soils, alluvial fans and floodplains, and along washes with nearby sage scrub.	Not expected to occur due to lack of suitable habitat
San Diego black-tailed jackrabbit *Lepus californicus bennettii*	Federal: None State: None CDFW: SSC	Occupies a variety of habitats, but is most common among shortgrass habitats. Also occurs in sage scrub, but needs open habitats.	Not expected to occur – not observed during surveys
San Diego desert woodrat *Neotoma lepida intermedia*	Federal: None State: None CDFW: SSC	Occurs in a variety of shrub and desert habitats, primarily associated with rock outcrops, boulders, cacti, or areas of dense undergrowth.	Not expected to occur
San Diego fairy shrimp *Branchinecta sandiegonensis*	Federal: FE State: None CDFW: None	Seasonal vernal pools	No potential to occur on site

Species Name	Status	Habitat Requirements	Potential for Occurrence
Santa Ana sucker *Catostomus santaanae*	Federal: FT State: None CDFW: None	Small, shallow streams, less than 7 meters in width, with currents ranging from swift in the canyons to sluggish in the bottom lands. Preferred substrates are generally coarse and consist of gravel, rubble, and boulders with growths of filamentous algae, but occasionally they are found on sand/mud substrates.	No potential to occur on site
Southern California legless lizard *Anniella stebbinsi*	Federal: None State: None CDFW: SSC	Broadleaved upland forest, chaparral, coastal dunes, coastal scrub; found in a broader range of habitats that any of the other species in the genus. Often locally abundant, specimens are found in coastal sand dunes and a variety of interior habitats, including sandy washes and alluvial fans	No potential to occur on site
Southern California rufous-crowned sparrow *Aimophila ruficeps canescens*	Federal: None State: None CDFW: WL	Grass covered hillsides, coastal sage scrub, and chaparral.	Low potential to occur on site. Not detected during surveys.
Southwestern willow flycatcher (nesting) *Empidonax traillii extimus*	Federal: FE State: SE CDFW: None	Riparian woodlands along streams and rivers with mature dense thickets of trees and shrubs.	Not expected to occur
Swainson's hawk *Buteo swainsoni*	Federal: None State: ST CDFW: None	Summer in wide open spaces of the American West. Nest in grasslands, but can use sage flats and agricultural lands. Nests are placed in lone trees.	Not expected to occur
Tricolored blackbird (nesting colony) *Agelaius tricolor*	Federal: BCC State: candidate CDFW: SSC	Breeding colonies require nearby water, a suitable nesting substrate, and open-range foraging habitat of natural grassland, woodland, or agricultural cropland.	No potential to occur on site
Two-striped gartersnake *Thamnophis hammondii*	Federal: None State: None CDFW: SSC	Aquatic snake typically associated with wetland habitats such as streams, creeks, and pools.	No potential to occur on site
Western mastiff bat *Eumops perotis californicus*	Federal: None State: None CDFW: SSC	Prefers habitat edges and mosaics with trees that are protected from above and open from below with open areas for foraging. Roosts primarily in trees, 2-40 feet above ground, from sea level up through mixed conifer forests.	Potential to occur on site. Not detected during surveys.

Species Name	Status	Habitat Requirements	Potential for Occurrence
Western pond turtle *Actinemys marmorata*	Federal: None State: None CDFW: SSC	Slow-moving permanent or intermittent streams, small ponds and lakes, reservoirs, abandoned gravel pits, permanent and ephemeral shallow wetlands, stock ponds, and treatment lagoons. Abundant basking sites and cover necessary, including logs, rocks, submerged vegetation, and undercut banks.	No potential to occur on site
Western yellow bat *Lasiurus xanthinus*	Federal: None State: None CDFW: SSC	Found in valley foothill riparian, desert riparian, desert wash, and palm oasis habitats. Roosts in trees, particularly palms. Forages over water and among trees.	Low potential to occur on site. Not detected during surveys.
Western spadefoot *Spea hammondii*	Federal: None State: None CDFW: SSC	Seasonal pools in coastal sage scrub, chaparral, and grassland habitats.	Not expected to occur due to lack of suitable habitat
Western yellow-billed cuckoo (nesting) *Coccyzus americanus occidentalis*	Federal: FT State: SE CDFW: None	Dense, wide riparian woodlands with well-developed understories.	No potential to occur on site
White tailed kite *Elanus leucurus*	Federal: None State: None CDFW: FP	Breeds in riparian trees in lower elevation areas. Known from San Diego north to San Luis Obispo Counties.	Low potential to occur on site for foraging – not observed during surveys
Yellow rail *Coturnicops noveboracensis*	Federal: None State: None CDFW: SSC	Shallow marshes, and wet meadows; in winter, drier freshwater and brackish marshes, as well as dense, deep grass, and rice fields.	No potential to occur on site
Yellow-breasted chat *Icteria virens*	Federal: None State: None CDFW: SSC	Dense, relatively wide riparian woodlands and thickets of willows, vine tangles, and dense brush with well-developed understories.	Potential to occur on site. Not detected during surveys.
Yellow warbler *Setophaga petechia*	Federal: BCC State: None CDFW: SSC	Dense, relatively wide riparian woodlands and thickets of willows, vine tangles, and dense brush with well-developed understories.	Observed foraging on site.
Yuma myotis *Myotis yumanensis*	Federal: None State: None CDFW: None	Optimal habitats are open forests and woodlands with sources of water over which to feed. Distribution is closely tied to bodies of water. Maternity colonies in caves, mines, buildings or crevices.	Not expected to occur due to lack of suitable foraging habitat.

Species Name	Status	Habitat Requirements	Potential for Occurrence
Federal (USFWS) Protection and Classification FE – Federally Endangered FC – Federal Candidate for Listing **State (CDFW) Protection and Classification** SE – State Endangered SPE – State Proposed Endangered SSC – State Species of Special Concern CWL – California Watch List SFP – State Fully Protected **Western Bat Working Group (WBWG)** H – High Priority LM – Low-Medium Priority M – Medium Priority MH – Medium-High Priority **Occurrence** • Absent – The species is absent from the site, either because the site lacks suitable habitat for the species, the site is located outside of the known range of the species, or focused surveys has confirmed the absence of the species. • Not expected to occur – The species is not expected to occur onsite due to low habitat quality, however absence cannot be ruled out. • Potential to occur – The species has a potential to occur onsite based on suitable habitat, however its presence/absence could not be confirmed. • Present – The species was detected onsite incidentally or through focused surveys.			

Source: GLA 2022.

The following special status wildlife species were not detected onsite but have the potential to occur within or adjacent to the Project Site.

Coast horned lizard (*Phrynosoma blainvillii*)

The coast horned lizard is designated as a CDFW SSC, but is not Federally or State listed. This species inhabits coastal sage scrub and chaparral habitats with sandy, rocky, or shallow soils that support native harvester ants (*Pogonomyrmex* spp.).

The coast horned lizard was not observed during many hours of surveys but has limited potential to occur on site on portions of the Project Site east of Valencia Avenue within areas of coastal sage scrub.

Coastal whiptail (*Aspidoscelis tigris stejnegeri*)

The coastal western whiptail does not have a Federal or State designation, however this species is considered locally rare. The western whiptail ranges through the semi-arid and arid desert lowlands of Southern California, southern Arizona, adjacent areas of Mexico and western Baja California, Mexico (Lowe, *et al*., 1970). It is the third most common lizard in the San Gabriel Mountains after *Sceloporus occidentalis* and *Uta stansburiana* (Schoenherr, 1976). The western whiptail can be found in open, often rocky areas with little vegetation or sunny microhabitats within shrub or grassland associations (Benes, 1969). *Cnemidophorus* [*Aspidoscelis*] is commonly found on the eastern and western slopes of the San Gabriel Mountains in all habitats except yellow pine forest (Schoenherr, 1976). Schoenherr (1976) also indicates that the western

whiptail probably occurs in oak woodland (although none have been taken in this habitat type) because they have been detected in riparian areas.

The coastal whiptail is known to occur in the general vicinity of the Project Site. This species has low potential to occur on site within the proposed development area and a moderate to high potential to occur in avoided scrub areas west, north and east of the development areas.

Orange-throated Whiptail (*Aspidoscelis hyperythra*)

The orange-throated whiptail is a CDFW SSC. This lizard is known from coastal sage scrub, chaparral, and valley-foothill hardwood habitats of San Bernardino, Riverside, Los Angeles, Orange and San Diego counties. It prefers washes and other sandy areas with patches of brush and rocks. This species has a low potential to occur within the Project Site.

Red-diamond rattlesnake (*Crotalus ruber*)

The northern red-diamond rattlesnake is designated as a CDFW SSC but is not Federally or State listed. This species occurs in chaparral, woodland, grassland, and desert areas from San Bernardino County southward along both sides of the Peninsular ranges and Santa Ana mountains to Baja California. This species uses rocks, rodent burrows, and dense vegetation for cover. The northern red-diamond rattlesnake was not detected during surveys and has low potential to occur on the site.

Burrowing Owl (*Athene cunicularia)*

Focused surveys for the burrowing owl, a CDFW SSC, were conducted within all suitable habitat areas within the Project Site. Surveys were conducted in accordance with survey guidelines described in the 2012 CDFG Staff Report on Burrowing Owl Mitigation. The species depends on the presence of ground squirrels whose burrows are used for nesting and roosting. The burrowing owl prefers primarily open areas with short vegetation and bare ground. Portions of the Site west of Valencia Avenue exhibit disturbed, sparse vegetation, providing habitat relatively suitable for the species. However, the protocol surveys did not detect this species, which does not occur on the Site.

Coastal cactus wren (*Campylorhynchus brunneicapillus sandiegensis*)

The coastal cactus wren is a CDFW SSC. It is a resident species in arid regions in Southern California and has restricted habitat requirements in stands of cholla and prickly pear. This species was not detected during focused surveys in 2017 or 2018 and does not occur on the site.

Southern California rufous-crowned sparrow (*Aimophila ruficeps canescens*)

The southern California rufous-crowned sparrow is a CDFW Watch List species. This subspecies of the rufous-crowned sparrow is a resident species of southern California on the slopes of the Transverse and Coastal ranges from Los Angeles County south to Baja California Norte, and occurs on grass-covered hillsides, coastal sage scrub, and

chaparral. Southern California rufous-crowned sparrow was not detected during surveys in 2017 or 2018 and does not occur on the site.

White tailed kite (*Elanus leucurus*)

The white-tailed kite is designated as a California Fully Protected Species. In California, the white-tailed kite is a common to uncommon, year-long resident in coastal and valley lowlands; rarely found away from agricultural areas (Grinnell and Miller 1944). It inhabits herbaceous and open stages of most habitats mostly in cismontane California. It has extended its range and increased numbers in California in recent decades (Eisenmann 1971).

Although apparently a resident bird throughout most of its breeding range, dispersal occurs during the nonbreeding season resulting in some range expansion during the winter. It is believed to become nomadic during low abundance of California voles and the population changes in a regular and predictable fashion directly tied to changing vole numbers. The white-tailed kite inhabits low elevation, open grasslands, savannah-like habitats, agricultural areas, wetlands, and oak woodlands. Riparian areas adjacent to open areas are used for nesting (Dunk 1995). The winter habitat is generally similar to the breeding habitat, but the proximity to nest trees is not important.

The white-tailed kite has been reported historically in the general vicinity of the Project site. The Project site including development areas provide suitable foraging habitat. The white-tailed kite may potentially nest to the west and/or east of the Project Site boundary.

Yellow-Breasted Chat (*Icteria virens*)

The yellow-breasted chat, which is a CDFW SSC, is a migratory songbird that breeds in riparian habitats in southern California. This species exhibits habitat requirements similar to the least Bell's vireo. Suitable habitat typically consists of multi-layered riparian scrub or willow woodland corridors along flowing streams. This species does not have potential to nest on site; however, it has a low potential to foraging onsite.

Special Status Bats

GLA conducted focused surveys for roosting and foraging special-status bats. Species detected acoustically foraging or flying over the site included the Mexican free-tailed bat (*Tadarida brasiliensis*) and canyon bat (*Parastrellus hesperus*). Additionally, one recording of an unidentified bat species in the 40 kilohertz frequency was detected. While the site supports numerous blue-gum eucalyptus trees, which are often used by certain bat species for roosting (within areas of exfoliating bark), roosting on site was not detected. Specifically, careful examination of the eucalyptus trees found very few large trees with areas of exfoliating bark that would be suitable for roosting.

CRITICAL HABITAT

A 141.40-acre portion of the Project Site located east of Valencia Avenue is included in Critical Habitat Unit 9 for the coastal California gnatcatcher as depicted in Figure 12, *Sensitive Faunal Species Observation Map*. The area designated as Critical Habitat

consists of active oil field that supports a predominance of non-native trees including blue gum eucalyptus and Peruvian pepper mixed with laurel sumac chaparral, and limited areas of coastal sage scrub as quantified below. The site also contains substantial areas historically devoted to oil production activities including unvegetated roads and pads. The portion of the site designated as Critical Habitat is bordered on the north by existing residential development, Valencia Avenue and former nursery lands to the west that support non-native grasses and forbs as well as residential and institutional lands to the west of Valencia Avenue. Areas to the south of the Critical habitat include active agricultural areas (some of which (11.10-acres) are included in the Critical Habitat overlay) and residential development. To the east is Carbon Canyon Regional Park and lands owned by the USACE associated with Carbon Canyon Dam which support very limited areas of coastal sage scrub habitat. Given these factors, the most suitable areas for east to west and west to east movement by the California gnatcatcher would be to the north of the Project Site within existing and proposed open space, mitigation bank, and mitigation/restoration sites as depicted Figure 13, *Regional Open Space and Proposed Mitigation Lands Map*. Specifically, areas to the east include Critical Habitat connecting with areas occupied by the California gnatcatcher which extend to the west to Chino Hills State Park and the Shell/Aera Habitat Conservation Plan (HCP) Study Management Area which connects areas of Critical Habitat to the north with areas of conserved open space in the Tonner Hills area, which in turn provide connections to areas to the west occupied by the California gnatcatcher.

The definition for Physical and Biological Features, PBFs (formerly PCEs as reflected below)[7] as provided in the 2007 Final Rule for California gnatcatcher Critical Habitat are defined as follows:

> *(2) The primary constituent elements (PCEs)*[PBFs] *of critical habitat for coastal California gnatcatcher are:(i) Dynamic and successional sage scrub habitats: Venturan coastal sage scrub, Diegan coastal sage scrub, Riversidean sage scrub, maritime succulent scrub, Riversidean alluvial fan scrub, southern coastal bluff scrub, and coastal sage-chaparral scrub in Ventura, Los Angeles, Orange, Riverside, San Bernardino, and San Diego Counties that provide space for individual and population growth, normal behavior, breeding, reproduction, nesting, dispersal and foraging; and (ii) Non-sage scrub habitats such as chaparral, grassland, riparian areas, in proximity to sage scrub habitats as described for PCE 1 above that provide space for dispersal, foraging, and nesting. (3) Critical habitat does not include manmade structures (such as buildings, aqueducts, airports, roads, and other paved areas) and the land on which they are located existing on the effective date of this rule and not containing one or more of the PCEs.*

Table 9, *Coastal California Gnatcatcher PBF's Assessment,* below provides a summary of areas within the 141.40-acre area of designated Critical Habitat, which includes a 1.40-acre triangular parcel that abuts the intersection of Valencia Avenue and Rose

[7] As noted, the designation of "Primary Constituent Elements" has been changed to "Physical and Biological Features"; in the new critical habitat regulations (81 FR 7214) however, given that the 2007 Final Rule for the California gnatcatcher uses "PCEs" such usage is noted and retained here and has also been retained in the quotation from the 2007 Final Rule.

Drive and an additional 0.06-acre offsite to the north that is just west of Valencia Avenue. The Critical Habitat overlay includes 83.98 acres that do not constitute PCEs [PBFs] and 57.42 acres with PCEs [PBFs]. Thus, of the 141.40 acres of Critical Habitat, 83.98 acres do not constitute PCEs [PBFs] (59.0-percent). For areas with PCEs 13.18-acres consist of fragmented coastal sage scrub (PCE [PBF](i)) and 24.84 acres dominated by non-native upland mustards (PCE [PBF](ii)). Thus, of the 141.40 acres of Critical Habitat, only 13.18 acres (9.3-percent) provide potential breeding habitat while 24.84 acres (17.6 percent) are comprised of non-native mustards, which provide areas for foraging and movement only, and as noted, given the location of the site, does not represent important habitat for regional east-west and west-east movement, which is concentrated to the north. Laurel sumac scrub, accounting for 16.75-acres, while native, is not suitable for breeding and is of limited value for movement and foraging. It is also important to note that of the 13.18-acres of areas with vegetation cover (coastal sage scrub alliances) consistent with PCE[PBF](i), only limited areas of CSS were observed to be occupied by the coastal California gnatcatcher, which during two 2017 and 2018 protocol surveys utilized the central portion of the area of the site east of Valencia Avenue as depicted on Figure 12, *Sensitive Faunal Species Observation Map*. Thus, areas of CSS along the northern boundary of the site, overlooking Carbon Canyon Road as well as other small, isolated patches do not appear to be utilized by the California gnatcatcher based on survey results, due to small patch size and sub-optimal structure of adjacent vegetation. Specifically, many of the patches of sagebrush scrub are embedded in a matrix of vegetation cover that the coastal California gnatcatcher would be expected to avoid such as eucalyptus and pepper groves.

REGIONAL CONNECTIVITY/WILDLIFE MOVEMENT CORRIDORS

Overview

Wildlife corridors link areas of suitable habitat that are otherwise separated by rugged terrain, changes in vegetation, or human disturbance. The fragmentation of open space areas by urbanization creates isolated "islands" of wildlife habitat. In the absence of habitat linkages that allow movement to adjoining open space areas, various studies have concluded that some wildlife species, especially the larger and more mobile mammals, will not likely persist over time in fragmented or isolated habitat areas because they prohibit the infusion of new individuals and genetic information (MacArthur and Wilson 1967; Soule 1987; Harris and Gallager 1989; Bennett 1990). Corridors effectively act as links between different populations of a species. A group of smaller populations (termed "demes") linked together via a system of corridors is termed a "metapopulation." The long-term health of each deme within the metapopulation is dependent upon its size and the frequency of interchange of individuals (immigration vs. emigration). The smaller the deme, the more important immigration becomes, because prolonged inbreeding with the same individuals can reduce genetic variability. Immigrant individuals that move into the deme from adjoining demes mate with individuals and supply that deme with new genes and gene combinations that increases overall genetic diversity. An increase in a population's genetic variability is generally associated with an increase in a population's health. Corridors mitigate the effects of habitat fragmentation by:

(1) allowing animals to move between remaining habitats, which allows depleted populations to be replenished and promotes genetic diversity;
(2) providing escape routes from fire, predators, and human disturbances, thus reducing the risk that catastrophic events (such as fires or disease) will result in population or local species extinction; and
(3) serving as travel routes for individual animals as they move within their home ranges in search of food, water, mates, and other needs (Noss 1983; Fahrig and Merriam 1985; Simberloff and Cox 1987; Harris and Gallagher 1989).

Wildlife movement activities usually fall into one of three movement categories: (1) dispersal (e.g., juvenile animals from natal areas, individuals extending range distributions); (2) seasonal migration; and (3) movements related to home range activities (foraging for food or water, defending territories, searching for mates, breeding areas, or cover). A number of terms have been used in various wildlife movement studies, such as "wildlife corridor", "travel route", "habitat linkage", and "wildlife crossing" to refer to areas in which wildlife moves from one area to another. To clarify the meaning of these terms and facilitate the discussion on wildlife movement in this study, these terms are defined as follows:

Travel Route: A landscape feature (such as a ridge line, drainage, canyon, or riparian strip) within a larger natural habitat area that is used frequently by animals to facilitate movement and provide access to necessary resources (e.g., water, food, cover, den sites). The travel route is generally preferred because it provides the least amount of topographic resistance in moving from one area to another; it contains adequate food, water, and/or cover while moving between habitat areas; and provides a relatively direct link between target habitat areas.

Wildlife Corridor: A piece of habitat, usually linear in nature, that connects two or more habitat patches that would otherwise be fragmented or isolated from one another. Wildlife corridors are usually bounded by urban land areas or other areas unsuitable for wildlife. The corridor generally contains suitable cover, food, and/or water to support species and facilitate movement while in the corridor. Larger, landscape-level corridors (often referred to as "habitat or landscape linkages") can provide both transitory and resident habitat for a variety of species.

Wildlife Crossing: A small, narrow area, relatively short in length and generally constricted in nature, that allows wildlife to pass under or through an obstacle or barrier that otherwise hinders or prevents movement. Crossings typically are manmade and include culverts, underpasses, drainage pipes, and tunnels to provide access across or under roads, highways, pipelines, or other physical obstacles. These are often "choke points" along a movement corridor.

Wildlife Movement Within and Adjacent to Project Site

The Project Site is located west of Carbon Canyon Regional Park, Chino Hills State Park and south of the Puente-Chino Hills wildlife corridor. The Puente-Chino Hills wildlife corridor extends from near the Whittier Narrows Recreation Area southeast through and toward Chino Hills State Park, Coal Canyon, Irvine Ranch Land Reserve and the Cleveland National Forest. During a detailed meta-analysis of corridor function for the Puente-Chino Hills wildlife corridor conducted by Conservation Biology Institute, the Project Site was not identified as a potential corridor segment (CBI 2005). Specifically, the Project Site is located immediately west of the Chino Corridor Segment 1 (Carbon Canyon Regional Park). As stated by CBI:

> "*Segment 1 is largely conserved already as Chino Hills State Park, although efforts continue to increase the size and buffering of this important reserve area. It is separated from Segment 2 by Carbon Canyon Road (Highway 142). This busy 2-lane road suffers some roadkill, especially coyote (Robertson et al. 1995), but is generally quite permeable to target species due to extensive, naturally vegetated land on both sides, lack of development over much of its length, and availability of several undercrossings*." (CBI 2005)"

The Project Site was also not identified as a habitat linkage contributing to Chino Hills State Park. As stated in the Chino Hills State Park General Plan:

> "*The habitat linkages important to the biological survival of Chino Hills State Park are: 1) Coal Canyon which links the park to the Cleveland National Forest and the Santa Ana Mountains; 2) the Sonome Canyon Area which links Chino Hills State Park to Tonner Canyon and other open space to the northwest; and 3) the Prado Basin area that links the park to the Prado Basin, and thereby to the Dairy Preserve, the Santa Ana River watershed, and open space east of State Route 71*." (Chino Hills State Park General Plan 1999)

The majority of the Project Site is characterized as an active oil operation site operated by Aera Energy LLC since the early 1900s. The Project Site is bordered to the north, south and east by high density residential development and bisected north to east by Valencia Avenue and west to east by East Lambert/Carbon Canyon Roads. The Project Site on the east side of Valencia Avenue consists of land associated with oil operations including oil fields, roads and paths, and related equipment and infrastructure (disturbed, undeveloped land occurs scattered within the oilfield operations), and active agricultural cultivation. The areas west of Valencia Avenue includes active and abandoned nursery facilities while still containing active oil operations. The Project Site is bordered to the east by Carbon Canyon Regional Park. Based on the extent of adjacent high-density residential development along the north, south and west boundaries and associated high traffic roadways bisecting and bordering the property, the Project Site does not meet the definition or is expected to serve as a wildlife movement corridor for ground dwelling species.

However, the Project Site is located partially within USFWS designated critical habitat for the federally threated coastal California gnatcatcher. As previously analyzed and presented, a total of 57.42 acres of critical habitat representing PCEs [PBFs] were documented onsite, as outlined in Table 9, *Coastal California Gnatcatcher PCE Assessment*. Specifically, 13.18 acres provide potential breeding habitat and foraging (coastal sage scrub habitat associations) while 24.91 acres are comprised of non-native mustards and annual non-native grassland, which provide areas for foraging and movement. Laurel sumac scrub, blue elderberry savannah and mule fat thickets while not suitable for breeding, do provide suitable foraging habitat and material for nest building when in close association with suitable breeding sites.

Impacts to 52.86 acres of USFWS coastal California gnatcatcher critical habitat with PCE's [PBFs] will be mitigated by preserving a total 52.86 acres of open space habitat within and immediately adjacent to the existing Puente-Chino Hills wildlife corridor. The proposed preserved lands will include 22.50 acres of in-holdings (SWEPI Retained Drill Sites) within the Chino Hills State Park and Shell/Aera oil retained lands located within the coastal California gnatcatcher critical habitat boundary and within which a minimum of 20.66 acres of coastal sage scrub restoration will occur, as shown in Figure 13, *Regional Open Space and Proposed Mitigation Lands Map*. The proposed land conservation would also provide a significant contribution to a region of open space adjacent to Carbon Canyon Road identified as a "Priority Crossing Improvement Area - A" (CBI 2005). As stated by CBI:

> "*Add wildlife fencing on either side of Carbon Canyon Road to reduce roadkill and encourage wildlife to use existing culverts, especially the concrete box culvert near the entrance to Chino Hills State Park. Adding another wildlife crossing structure, designed to accommodate all large mammals, would be even better. Given that traffic on this 2-lane road is increasing due to increasing development in the vicinity (Haas 2000), any future road upgrades should incorporate bridges or other very open wildlife crossing structures as mitigation. A variety of smaller under-crossings with funneling fences, specifically designed to accommodate smaller reptiles, amphibians, and mammals, should also be considered to improve connectivity for these species*." (CBI 2005)

The dedication of 52.86 acres of open space lands located within and adjacent to Chino Hills State park within the Puente-Chino Hills wildlife corridor, coastal California gnatcatcher critical habitat, and priority crossing improvement area would represent a significant acquisition and contribution to regional wildlife movement conservation goals. The proposed conserved lands will be offered to the Chino Hills State Park for consideration of acquisition.

REGIONAL AND REGULATORY SETTING

The following section has been based on Local, City General Plan conditions, compliance with City of Brea Municipal Codes and complying with State and Federal regulatory resources guidelines.

LOCAL

Chino Hills State Park General Plan

As stated in the Chino Hills State Park General Plan:

> **"***When evaluating the desirability of proposed land acquisitions at the park, the Department will consider the following guidelines: 1) The Department will evaluate each proposal of land dedication and accept only those dedications that are in keeping with the purposes of Chino Hills State Park. Land acquisitions will support the park's resource management goals by enhancing watershed protection and adding significant or unique resources, habitats, or features to the park. They will create buffer areas (areas between developments and park resources) and include ridgelines whenever possible, increase the size and improve the effectiveness of biocorridors, and establish park facilities outside of sensitive resource areas. Land acquisitions may also add to the park's recreational opportunities and establish links to regional trail systems. 2) The Department must exercise caution when considering land adjacent to developed areas. Difficulties arise from illegal-refuse dumping, illegal off-highway vehicle activity, the spread of exotic plant species onto parkland, and wildlife predation and harassment by domestic animals., 3) The Department will actively work towards acquisition of properties that contribute to biocorridors ensuring that key linkages will be preserved, and 4) In order to accomplish mutual goals such as resource protection, biocorridor enhancement, and providing recreational opportunities, partnerships with local and regional jurisdictions as well as state and federal agencies will be encouraged*." (Chino Hills State Park General Plan 1999)

The proposed 52.86-acres of conserved lands will be offered to the Chino Hills State Park for consideration of acquisition. The lands are expected to meet and/or exceed the standards for acquisition based on the following facts.

- 22.50 acres of proposed conservation lands are located within in-holdings (8 SWEPI Retained Drill Sites) within the Chino Hills State Park boundary.

- 35.32 acres of proposed conservation lands are located immediately west of Chino Hills State Park boundary, south of the Shell/Aera Mitigation Bank and immediately north of the Chino Hills State Park Interpretive Center.

- No residential development is located adjacent to any of the proposed conservation areas.

- The proposed conservation areas would contribute to connectivity of open space within the Puente-Chino Hills wildlife corridor and provide additional buffer habitat west of the existing Chino Hills State Park boundary.

City of Brea General Plan

Preserve Open Space Aggressively for Diverse Purposes – as a Visual and Scenic Resource, for Habitat Conservation, to Protect Watersheds, and for Recreation

Policy CR-4.1 Protect and preserve open space wherever possible.

The dedication of 52.86-acres of open space lands located within and adjacent to Chino Hills State park within the Puente-Chino Hills wildlife corridor, coastal California gnatcatcher critical habitat, and priority crossing improvement area would represent a significant acquisition and contribution to regional wildlife movement conservation goals. The proposed conserved lands will be offered to the Chino Hills State Park for consideration of acquisition.

Policy CR-4.2 Select areas for open space preservation using an evaluation system that incorporates the following selection criteria: connectivity, access/recreations, sensitive areas, natural features, subdivision pattern, and buffer zones.

The dedication of 52.86-acres of open space lands located within and adjacent to Chino Hills State park within the Puente-Chino Hills wildlife corridor, coastal California gnatcatcher critical habitat, and priority crossing improvement area would represent a significant acquisition and contribution to regional wildlife movement conservation goals. The proposed conserved lands will be offered to the Chino Hills State Park for consideration of acquisition.

Policy CR-4.3 Work aggressively with the Orange County, Los Angeles County, State, and other appropriate public agencies, private entities, and landowners to conserve, protect, and enhance open spaces and natural resources, particularly within the sphere of influence

The proposed conserved lands will be offered to the Chino Hills State Park for consideration of acquisition.

Preserve and Maintain Wildlife and Animal Movement Corridors

Policy CR-8.1 Preserve key wildlife migration corridors and habitat areas.

Based on the extent of adjacent high-density residential development along the north, south and west boundaries and associated high traffic roadways bisecting and bordering the property, the Project Site does not meet the definition or is expected to serve as a wildlife movement corridor for ground dwelling species. However, the Project Site is located partially within USFWS designated critical habitat for the federally threated coastal California gnatcatcher. A total of 52.86-acres of critical habitat representing PBFs will be impacted onsite, as outlined in Table 11, *Impacts to CAGN Critical Habitat PBF's*. The dedication of 52.86-acres of open space lands located within the Puente-Chino Hills wildlife corridor, coastal California gnatcatcher critical habitat, priority crossing improvement area, and within which 20.66-acres of coastal sage scrub establishment and/or restoration is proposed would represent a significant acquisition and contribution to regional wildlife movement conservation goals. The proposed conserved lands will be offered to the Chino Hills State Park for consideration of acquisition.

Policy CR-8.2 Provide adequate wildlife crossings where roadways have severed habitat areas.

the Project Site does not meet the definition or is expected to serve as a wildlife movement corridor for ground dwelling species and no wildlife crossings are proposed along Valencia Avenue, East Lambert or Carbon Canyon Road.

Policy CR-8.3 Cooperate with regional agencies and authorities with similar goals in protecting and enhancing wildlife and animal movement corridors.

The Wildlife Corridor Conservation Authority (WCCA), a local joint power authority organization will review the project to ensure compliance with conservation, environmental protection and maintenance of the habitat and wildlife corridor within the Puente-Chino Hills.

Policy CR-8.4 Regular monitoring of medium and large mammals is necessary to gauge the effectiveness of wildlife corridors and to identify or increases in wildlife populations.

the Project Site does not meet the definition or is expected to serve as a wildlife movement corridor for ground dwelling species and no medium or large mammal monitoring is proposed.

Preserve and Maintain Open Space, Natural Habitat, and Vegetation Communities that Support Wildlife Species and Animals.

Policy CR-9.1 Support regional and sub-regional efforts to acquire, develop, operate, and maintain an open space system extending from the Puente Hills to the Chino Hills.

The dedication of 52.86 acres of open space lands located within and adjacent to Chino Hills State park within the Puente-Chino Hills wildlife corridor, coastal California gnatcatcher critical habitat, and priority crossing improvement area would represent a significant acquisition and contribution to regional wildlife movement conservation goals. The proposed conserved lands will be offered to the Chino Hills State Park for consideration of acquisition.

Policy CR-9.2 Preserve the integrity of blue line streams and riparian habitat areas.

Impacts to USACE, RWQCB and CDFW resources would be reduced to less than significant following implementation of **BIO-MM 1** (USACE/CDFW/RWQCB).

Policy CR-9.3 Preserve and restore the habitat value of creek corridors though the preservation of native plants and the replacement of invasive, non-native plants with native plants.

Impacts to USACE, RWQCB and CDFW resources would be reduced to less than significant following implementation of **BIO-MM 1** (USACE/CDFW/RWQCB).

Policy CR-9.4 Protect sensitive plant species resources from the impacts of development.

The project does not conflict with the policies set forth in the Brea 265 Specific Plan that has been prepared for the project, which supersedes and replaces the City of Brea local policies and/or ordinances (City of Brea Hillside Residence (HR) Guidelines) following implementation of **BIO-MM1** to **BIO-MM5**.

Policy CR-9.5 Manage areas of diverse wildlife habitat as a natural resource and prevent major destruction or disruption.

The proposed 52.86-acres of conserved lands will be offered to the Chino Hills State Park for consideration, acquisition and long-term management. The lands are expected to meet and/or exceed the standards for acquisition.

Policy CR-9.6 Use specific management programs using sound ecological principles and professionally accepted methods are necessary to protect and restore sensitive animal populations and their habitats.

All proposed restoration and monitoring activities will be based on City of Brea, USFWS, CDFW and RWQCB review and approval as outlined in **BIO-MM 1** (USACE/CDFW/RWQCB).

The project does not conflict with the policies set forth in the Brea 265 Specific Plan that has been prepared for the project, which supersedes and replaces the City of Brea local policies and/or ordinances (City of Brea Hillside Residence (HR) Guidelines).

City of Brea Municipal Code (Ord. 1079, passed 11-2-04)

The City of Brea's Municipal Code identifies land use categories, development standards, and other general provisions that ensure consistency between the County and City General Plans and proposed development projects. Appendix G of the 2019 State CEQA guidelines indicate that a project may be deemed to have a significant effect on the environment if the project is likely to:

a) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

The project does not conflict with the policies set forth in the Brea 265 Specific Plan that has been prepared for the project, which supersedes and replaces the City of Brea local policies and/or ordinances (City of Brea Hillside Residence (HR) Guidelines) following implementation of **BIO-MM1** to **BIO-MM5**.

FEDERAL

United States Army Corps of Engineers Jurisdictional Waters

Pursuant to Section 404 of the Clean Water Act, the USACE regulates the discharge of dredged and/or fill material into waters of the United States. The term "waters of the United States" is defined in USACE regulations at 33 CFR Part 328.3(a) as:

(1) All waters which are currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;
(2) All interstate waters including interstate wetlands;
(3) All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, the use, degradation or destruction of which could affect foreign commerce including any such waters:
    (i) Which are or could be used by interstate or foreign travelers for recreational or other purposes; or
    (ii) From which fish or shell fish are or could be taken and sold in interstate or foreign commerce; or
    (iii) Which are used or could be used for industrial purpose by industries in interstate commerce...
(4) All impoundments of waters otherwise defined as waters of the United States under the definition;
(5) Tributaries of waters identified in paragraphs (a) (1)-(4) of this section;
(6) The territorial seas;
(7) Wetlands adjacent to waters (other than waters that are themselves wetlands) identified in paragraphs (a) (1)-(6) of this section.

In the absence of wetlands, the limits of USACE jurisdiction in non-tidal waters, such as intermittent streams, extend to the OHWM which is defined at 33 CFR 328.3(e) as:

> *...that line on the shore established by the fluctuation of water and indicated by physical characteristics such as clear, natural line impressed on the bank, shelving, changes in the character of soil, destruction of terrestrial vegetation, the presence of litter and debris, or other appropriate means that consider the characteristics of the surrounding areas.*

The term “wetlands” (a subset of “waters of the United States”) is defined at 33 CFR 328.3(b) as "those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support...a prevalence of vegetation typically adapted for life in saturated soil conditions." In 1987 the USACE published a manual to guide its field personnel in determining jurisdictional wetland boundaries. The methodology set forth in the 1987 Wetland Delineation Manual and the Arid West Supplement generally require that, in order to be considered a wetland, the vegetation, soils, and hydrology of an area exhibit at least minimal hydric characteristics. While the manual and Supplement provide great detail in methodology and allow for varying special conditions, a wetland should normally meet each of the following three criteria:

- more than 50 percent of the dominant plant species at the site must be typical of wetlands (i.e., rated as facultative or wetter in the National List of Plant Species that Occur in Wetlands[8]);
- soils must exhibit physical and/or chemical characteristics indicative of permanent or periodic saturation (e.g., a gleyed color, or mottles with a matrix of low chroma indicating a relatively consistent fluctuation between aerobic and anaerobic conditions); and
- Whereas the 1987 Manual requires that hydrologic characteristics indicate that the ground is saturated to within 12 inches of the surface for at least five percent of the growing season during a normal rainfall year, the Arid West Supplement does not include a quantitative criterion with the exception for areas with “problematic hydrophytic vegetation”, which require a minimum of 14 days of ponding to be considered a wetland.

The proposed project will impact resources regulated by the USACE and a CWA Section 404 permit will be required.

STATE

Regional Water Quality Control Board Jurisdictional Resources

The State Water Resource Control Board and each of its nine Regional Boards regulate the discharge of waste (dredged or fill material) into waters of the United States[9] and

[8] Lichvar, R. W. 2013. *The National Wetland Plant List:* 2013 wetland ratings. Phytoneuron 2013-49: 1-241.

[9] Therefore, wetlands that meet the current definition, or any historic definition, of waters of the U.S. are waters of the state. In 2000, the State Water Resources Control Board determined that all waters of the U.S. are also waters of the state by regulation, prior to any regulatory or judicial limitations on the federal definition of waters of the U.S. (California Code or Regulations title 23, section 3831(w)). This regulation has remained in effect despite subsequent changes to the federal definition. Therefore, waters of the state includes features that have been determined by the U.S. Environmental Protection Agency (U.S. EPA) or the U.S. Army Corps of Engineers (USACE) to be “waters of the U.S.” in an approved jurisdictional determination; “waters of the U.S.” identified in an aquatic resource report verified by the USACE upon which a permitting decision was based; and features that are consistent with any current or historic final judicial interpretation of “waters of the U.S.” or any current or historic federal regulation defining “waters of the U.S.” under the federal Clean Water Act.

waters of the State. Waters of the United States are defined above in Section II.A and waters of the State are defined as "any surface water or groundwater, including saline waters, within the boundaries of the state" (California Water Code 13050[e]).

Section 401 of the CWA requires certification for any federal permit or license authorizing impacts to waters of the U.S. (i.e., waters that are within federal jurisdiction), such as Section 404 of the CWA and Section 10 of the Safe Rivers and Harbors Act, to ensure that the impacts do not violate state water quality standards. When a project could impact waters outside of federal jurisdiction, the Regional Board has the authority under the Porter-Cologne Water Quality Control Act to issue Waste Discharge Requirements (WDRs) to ensure that impacts do not violate state water quality standards. Clean Water Act Section 401 Water Quality Certifications, WDRs, and waivers of WDRs are also referred to as orders or permits.

The State Board Wetland Definition and Procedures define an area as wetland as follows: *An area is wetland if, under normal circumstances, (1) the area has continuous or recurrent saturation of the upper substrate caused by groundwater, or shallow surface water, or both; (2) the duration of such saturation is sufficient to cause anaerobic conditions in the upper substrate; and (3) the area's vegetation is dominated by hydrophytes or the area lacks vegetation.*

The following wetlands are waters of the State:

1. *Natural wetlands;*
2. *Wetlands created by modification of a surface water of the state;*[10] *and*
3. *Artificial wetlands*[11] *that meet any of the following criteria:*

    a. Approved by an agency as compensatory mitigation for impacts to other waters of the state, except where the approving agency explicitly identifies the mitigation as being of limited duration;
    b. Specifically identified in a water quality control plan as a wetland or other water of the state;
    c. Resulted from historic human activity, is not subject to ongoing operation and maintenance, and has become a relatively permanent part of the natural landscape; or
    d. Greater than or equal to one acre in size, unless the artificial wetland was constructed, and is currently used and maintained, primarily for one or more of the following purposes (i.e., the following artificial wetlands are not waters of the state unless they also satisfy the criteria set forth in 2, 3a, or 3b):
        i. Industrial or municipal wastewater treatment or disposal,
        ii. Settling of sediment,

[10] "Created by modification of a surface water of the state" means that the wetland that is being evaluated was created by modifying an area that was a surface water of the state at the time of such modification. It does not include a wetland that is created in a location where a water of the state had existed historically, but had already been completely eliminated at some time prior to the creation of the wetland. The wetland being evaluated does not become a water of the state due solely to a diversion of water from a different water of the state.

[11] Artificial wetlands are wetlands that result from human activity.

iii. Detention, retention, infiltration, or treatment of stormwater runoff and other pollutants or runoff subject to regulation under a municipal, construction, or industrial stormwater permitting program,
iv. Treatment of surface waters,
v. Agricultural crop irrigation or stock watering,
vi. Fire suppression,
vii. Industrial processing or cooling,
viii. Active surface mining – even if the site is managed for interim wetlands functions and values,
ix. Log storage,
x. Treatment, storage, or distribution of recycled water, or
xi. Maximizing groundwater recharge (this does not include wetlands that have incidental groundwater recharge benefits); or
xii. Fields flooded for rice growing.[12]

All artificial wetlands that are less than an acre in size and do not satisfy the criteria set forth in 2, 3.a, 3.b, or 3.c are not waters of the state. If an aquatic feature meets the wetland definition, the burden is on the applicant to demonstrate that the wetland is not a water of the state.

The proposed project will impact resources regulated by the USACE and a 401 certification with the RWQCB will be required.

California Department of Fish and Wildlife Jurisdictional Resources

Pursuant to Division 2, Chapter 6, Sections 1600-1603 of the California Fish and Game Code, the CDFW regulates all diversions, obstructions, or changes to the natural flow or bed, channel, or bank of any river, stream, or lake, which supports fish or wildlife.

The Fish and Game Code defines a stream (including creeks and rivers) as "a body of water that flows at least periodically or intermittently through a bed or channel having banks and supports fish or other aquatic life. This includes watercourses having surface or subsurface flow that supports or has supported riparian vegetation." CDFW also defines a stream as “a body of water that flows, or has flowed, over a given course during the historic hydrologic regime, and where the width of its course can reasonably be identified by physical or biological indicators.”

It is important to note that the Fish and Game Code defines fish and wildlife to include: all wild animals, birds, plants, fish, amphibians, invertebrates, reptiles, and related

[12] Fields used for the cultivation of rice (including wild rice) that have not been abandoned due to five consecutive years of non-use for the cultivation of rice (including wild rice) that are determined to be a water of the state in accordance with these Procedures shall not have beneficial use designations applied to them through the Water Quality Control Plan for the Sacramento and San Joaquin River Basins, except as otherwise required by federal law for fields that are considered to be waters of the United States. Further, agricultural inputs legally applied to fields used for the cultivation of rice (including wild rice) shall not constitute a discharge of waste to a water of the state. Agricultural inputs that migrate to a surface water or groundwater may be considered a discharge of waste and are subject to waste discharge requirements or waivers of such requirements pursuant to the Water Board’s authority to issue or waive waste discharge requirements or take other actions as applicable.

ecological communities including the habitat upon which they depend for continued viability (FGC Division 5, Chapter 1, section 45 and Division 2, Chapter 1 section 711.2(a) respectively). Furthermore, Division 2, Chapter 5, Article 6, Section 1600 et seq. of the California Fish and Game Code does not limit jurisdiction to areas defined by specific flow events, seasonal changes in water flow, or presence/absence of vegetation types or communities.

A 1602 Streambed Alteration Agreement (SAA) will be required from the CDFW for impacts to jurisdictional resources.

ENVIRONMENTAL IMPACTS

The following sections include an analysis of the direct impacts, indirect impacts, and cumulative effects of the proposed action on sensitive and/or regulated biological resources. This analysis characterizes the project related activities that are anticipated to adversely impact the species or regulated resources, and when feasible, quantifies such impacts. Direct effects are defined as actions that may cause an immediate effect on the species or its habitat, and/or regulated resource including the effects of interrelated actions and interdependent actions. Direct impacts also include the destruction of individual plants or animals, which may also directly affect regional population numbers of a species or result in the physical isolation of populations thereby reducing genetic diversity and population stability.

Indirect effects are caused by or result from the proposed actions, are later in time, and are reasonably certain to occur. Indirect effects may occur outside of the area directly affected by the proposed action. Indirect impacts can occur at the urban/wildland interface of projects, to biological resources located downstream from projects, and other offsite areas where the effects of the project may be experienced by plants and wildlife. Examples of indirect impacts include the effects of increases in ambient levels of noise or light; predation by domestic pets; competition with exotic plants and animals; introduction of toxics, including pesticides; and other human disturbances such as hiking, off-road vehicle use, unauthorized dumping, etc. Indirect impacts are often attributed to the subsequent day-to-day activities associated with project build-out, such as increased noise, the use of artificial light sources, and invasive ornamental plantings that may encroach into native areas. Indirect effects may be both short-term and long-term in their duration. These impacts are commonly referred to as “edge effects” and may result in a slow replacement of native plants by non-native invasive species, as well as changes in the behavioral patterns of wildlife and reduced wildlife diversity and abundance in habitats adjacent to project sites.

Cumulative impacts refer to incremental, individual environmental effects of two or more projects when considered together. These impacts taken individually may be minor but may be collectively significant. Cumulative effects include future tribal, local, or private actions that are reasonably certain to occur in the proposal vicinity considered in this report. A cumulative impact to biological resources may occur if a project has the potential to collectively degrade the quality of the environment, substantially reduce the habitat of wildlife species or cause a population to drop below self-sustaining levels,

thereby threatening to eliminate a plant or animal community, or reduce the number or restrict the range of a rare or endangered plant or animal species.

THRESHOLD OF SIGNIFICANCE

CEQA requires evaluation of a project's impacts on biological resources and provides guidelines and thresholds for use by lead agencies for evaluating the significance of proposed impacts. Sections below set forth these thresholds and guidelines. Furthermore, pursuant to the CEQA Guidelines Section 15380, CEQA provides protection for non-listed species that could potentially meet the criteria for state listing. For plants, CDFW recognizes that plants on Lists 1A, 1B, or 2 of the CNPS *Inventory of Rare and Endangered Plants in California* may meet the criteria for listing and should be considered under CEQA. CDFW also recommends protection of plants, which are regionally important, such as locally rare species, disjunct populations of more common plants, or plants on the CNPS Lists 3 or 4.

The environmental impacts relative to biological resources are assessed using impact significance criteria which mirror the policy statement contained in the CEQA at Section 21001 (c) of the Public Resources Code. This section reflects that the legislature has established it to be the policy of the state to:

> "*Prevent the elimination of fish and wildlife species due to man's activities, ensure that fish and wildlife populations do not drop below self-perpetuating levels, and preserve for future generations representations of all plant and animal communities*…"

The following definitions apply to the significance criteria for biological resources:

- "*Endangered*" means that the species is listed as endangered under state or federal law.

- "*Threatened*" means that the species is listed as threatened under state or federal law.

- "*Rare*" means that the species exists in such small numbers throughout all or a significant portion of its range that it may become endangered if its environment worsens.
- "*Region*" refers to the area within southern California that is within the range of the individual species.

- "*Sensitive habitat*" refers to habitat for plants and animals (1) which plays a special role in perpetuating species utilizing the habitat on the property, and (2) without which there would be substantial danger that the population of that species would drop below self-perpetuating levels.

- "*Substantial effect*" means significance loss or harm of a magnitude which, based on current scientific data and knowledge, (1) would cause a species or a native plant or animal community to drop below self-perpetuating levels on a statewide or regional basis or (2) would cause a species to become threatened or endangered.

Determining whether a project may have a significant effect, or impact, plays a critical role in the CEQA process. According to CEQA, Section 15064.7 (Thresholds of Significance), each public agency is encouraged to develop and adopt (by ordinance, resolution, rule, or regulation) thresholds of significance that the agency uses in the determination of the significance of environmental effects. A threshold of significance is an identifiable quantitative, qualitative or performance level of a particular environmental effect, non-compliance with which means the effect will normally be determined to be significant by the agency and compliance with which means the effect normally will be determined to be less than significant. In the development of thresholds of significance for impacts to biological resources CEQA provides guidance primarily in Section 15065, Mandatory Findings of Significance, and the CEQA Guidelines, Appendix G, Environmental Checklist Form. Section 15065(a) states that a project may have a significant effect where:

> *"The project has the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or wildlife community, reduce the number or restrict the range of an endangered, rare, or threatened species, ..."*

Impacts to biological resources may result in a significant adverse impact if one or more of the following conditions would result from implementation of the proposed project. Would the project:

- Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the CDFW or USFWS? Less than significant with mitigation.
- Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the CDFW or USFWS? Less than significant.
- Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? Less than significant with mitigation.
- Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? Less than significant with mitigation.
- Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? No Impact.
- Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? The Project Site is not located within or adjacent to an existing or proposed Natural Community Conservation Plan/Habitat Conservation Plan (NCCP/HCP) including the NCCP/HCP Central and Coastal Subregion of Orange County. No Impact.

Also, the determination of impacts has been made according to the federal definition of "*take*". FESA prohibits the "*taking*" of a member of an endangered or threatened wildlife species or removing, damaging, or destroying a listed plant species by any person

(including private individuals and private or government entities). FESA defines "*take*" as "*to harass, harm, pursue, hunt, shoot, would, kill, trap, capture or collect*" an endangered or threatened species, or to attempt to engage in these activities.

DIRECT IMPACTS

Vegetation Communities

A total of 255.34-acres of onsite/offsite vegetation communities (grading/fuel modification zones (FMZ) will be directly and permanently impacted as a result of project implementation as summarized in Table 10, *Vegetation Community Impacts,* and illustrated on Figure 14*, Vegetation Communities Impact Map*.

The project will impact the following special-status vegetation alliances: Black willow thickets, Coast prickly pear scrub, and blue elderberry stands.

Sensitive Vegetation Communities

California Walnut Groves

The project will not impact walnut groves through grading or fuel modification. Walnut groves have a state rarity ranking of S3. CDFW considers impacts to alliances of S3 to be significant; however, avoidance of walnut groves would reduce potential impacts to less-than-significant and mitigation would be not required

Black Willow Thickets

The project will impact 0.03-acre of black willow thickets, which are fully surrounded by a matrix of upland mustards, eucalyptus groves and non-native Mexican fan palms and thus do not exhibit functions typically associated with black willow forest. Black willow thickets have a state rarity ranking of S3; however, impacts to a single patch of black willow covering 0.03-acre surrounded by non-native vegetation would not be considered significant and would not require mitigation. Regardless, black willow thickets are located within the northern reach of Drainage B and impacts to this resource will require mitigated and compliance with CDFW 1602 Streambed Alteration Agreement (SAA) as outlined in **BIO-MM 1** (USACE/CDFW/RWQCB).

Coast Prickly Pear Scrub

the project will impact 0.12 acre of coast prickly pear scrub, which has a state rarity ranking of S3. While CDFW considers impacts to alliances with a ranking of S3 to be significant, all occurrences of coastal prickly occur in small patches that are not associated with areas of native scrub habitat and would not be considered significant. Thus, mitigation for impacts to the small patches of coast prickly pear is not necessary. An additional 0.08 acre of this alliance falls within fuel modification zones for the project; however, cactus is permissible in fuel modification zones and would not be impacted.

Blue Elderberry Woodlands

the project will impact 1.37 acres of blue elderberry woodlands, which have a state rarity ranking of S3. CDFW considers impacts to alliances of S3 to be significant, thus, impacts to 1.37 acres of blue elderberry woodlands would be significant prior to mitigation. With mitigation, impacts would be reduced to less-than-significant. Impacts to this sensitive resource will be mitigated to a level of less than significant by implementing **BIO-MM 1** (USACE/CDFW/RWQCB).

Sensitive Plants

Southern California Black Walnut

The project will result in impacts to one special-status plant: California walnut (*Juglans californica*), which is scattered across the northern portion of the Site east of Valencia Avenue. Specifically, a total of 126 California walnuts would be impacted. California walnut is ranked as 4.2 in the CRPR which as noted in Table 3.1 above is a watch-list taxon:

> *Species that are currently thought to be limited in distribution or range whose vulnerability or susceptibility to threat is currently low. In some cases, as noted above for Rank 3 species, CNPS lacks survey data to accurately determine status in California. Many species have been placed on Rank 4 in previous editions of the "Inventory" and have been removed as survey data has indicated that the species are more common than previously thought. CNPS recommends that species currently included on this list should be monitored to ensure that future substantial declines are minimized.*

Most of the California walnuts on the site occur within disturbed areas, many of which are dominated by blue-gum eucalyptus, Peruvian pepper, and upland mustards, along with areas of laurel sumac. Impacts to individuals of southern California walnut would not be considered significant for the reasons set forth below. Except for walnuts within 0.07-acre of walnut woodland which will not be impacted, the individual walnuts are commonly associated with disturbed habitat and areas of non-native vegetation and do not the exhibit functions that are typically associated with walnut woodland. Second, as noted, the California walnut is a List 4 taxon and is still common throughout its range and the loss of 126 walnuts would not be result of a substantial effect on this species and thus not significant. Third, the California walnut is not locally rare; rather, the adjacent Chino Hills and nearby Puente and Whittier Hills support large numbers of California walnuts, much of which is dedicated open space, ensuring that the population within northern Orange County and adjacent areas of Los Angeles County are sustainable.

Sensitive Wildlife

The project will impact the following special-status animals: coastal California gnatcatcher; and exhibits potential for impacts to least Bell's vireo, yellow warbler, California horned lark, and Cooper's hawk. The project also impacts areas of California gnatcatcher Critical Habitat Unit 9 as discussed below.

Coastal California Gnatcatcher

Two breeding pairs of coastal California gnatcatchers (FT, SSC) were detected onsite during focused survey efforts as shown in Figure 12, *Sensitive Faunal Species Observation Map*. One (1) pair was associated with a patch of California sagebrush in the central-western portion of the Project Site east of Valencia Avenue. This was the same area where a breeding pair was detected during 2017 protocol surveys. A second breeding pair was detected on a knoll approximately 750 feet northeast of the first pair in California sagebrush. During the 2017 survey a single gnatcatcher was observed in this area. The Project Site contains approximately 10.33 acres of suitable coastal scrub habitat associations within the close proximity to the coastal California gnatcatcher observations.

It is important to note that there are small, isolated patches of scrub alliances, such as coyote brush scrub and cactus scrub that occur in areas completely unsuitable for the coastal California gnatcatcher that are not included in the impacts for the gnatcatcher totaling 0.18-acre. These areas are depicted as unsuitable for the coastal California gnatcatcher and impacts to these isolated fragments, which are not within the Critical Habitat overlay would not be significant.

Impact to 10.33 acres of coastal California gnatcatcher habitat including potential breeding and foraging resources would represent a significant impact. Impacts to the coastal California gnatcatcher, potential breeding/foraging habitat will be reduced to a level of less than significant by implementing **BIO-MM 2** (Coastal California Gnatcatcher HCP & Monitoring).

Least Bell's Vireo

During protocol coastal California gnatcatcher surveys in 2018 least Bell's vireo was detected within the Project Site as shown in Figure 12, *Sensitive Faunal Species Observation Map*. This bird is a State- and Federally-listed endangered species. It breeds in dense riparian habitats with a stratified canopy, including southern willow scrub, mule fat scrub, and riparian forest. Detections were of single birds and observation locations were not repeated during the early season observations, with one exception. The exception was a repeated observation of a single bird located in a eucalyptus woodland located south of the active oil field and north of the active agricultural area. Based on the timing of the least Bell's vireo observations (late May to early June) it was most likely an unpaired male. The location is vegetated with a canopy of eucalyptus trees and understory of sparse mule fat, blue elderberry, and poison oak. Based on the incidental least Bell's vireo observations within the Project Site and presence of low-quality habitat onsite, potential impacts to elderberry habitats occupied by least Bell's vireo would be mitigated to a level of less than significant by implementing **BIO-MM 4** (Least Bell's Vireo HCP).

There are no Habitat Conservation Plans or Natural Community Conservation Plans, or other approved local, regional, or state habitat conservation plan associated with the site. Impacts to the federally endangered least Bell's vireo will be authorized through a Section 7 Consultation between the USACE and USFWS. The applicant is preparing a Habitat Conservation Plan and Natural Community Conservation Plan in coordination with CDFW and USFWS.

Yellow Warbler

A yellow warbler (state species of special concern) was documented foraging on the Project Site near the southwest corner of the parcel east of Valencia Avenue, as shown in Figure 12, *Sensitive Faunal Species Observation Map*. This species is a migratory songbird that breeds in riparian habitats in southern California. The yellow warbler exhibits habitat requirements similar to the yellow-breasted chat and least Bell's vireo. Suitable habitat typically consists of multi-layered riparian scrub or willow woodland corridors along flowing streams. Potential impacts to nesting habitat for this species would be mitigated to a level of less than significant by implementing **BIO-MM 5** (Regulatory Requirement CDFG Code).

California horned lark

The California horned lark is a CDFW Watch List species. The California horned lark breeds and resides in the coastal region of California from Sonoma County southeast to the United States/Mexican border, including most of the San Joaquin Valley, and eastward to the foothills of the Sierra Nevada (Grinnell and Miller 1944; AOU 1998). The California horned lark is a common to abundant resident in a variety of open habitats, usually where trees and large shrubs are absent (Zeiner, *et al*. 1990). Range-wide, California horned larks breed in level or gently sloping shortgrass prairie, montane meadows, "bald" hills, open coastal plains, fallow grain fields, and alkali flats (Grinnell and Miller 1944). The California horned lark was observed foraging within the grassland portions of the Project Site. Potential impacts to nesting habitat for this species would be mitigated to a level of less than significant by implementing **BIO-MM 5** (Regulatory Requirement CDFG Code).

Cooper's Hawk

Cooper's hawk is a CDFW Watch List species when nesting. This species occurs in riparian areas and oak woodlands, and most commonly in montane canyons. This species is also known to use urban areas, occupying mature trees associated with residential and commercial development and using utility poles as perches. Cooper's hawk was observed foraging within the Project Site and the mature Eucalyptus trees represent suitable nesting habitat. Potential impacts to nesting habitat for this species would be mitigated to a level of less than significant by implementing **BIO-MM 5** (Regulatory Requirement CDFG Code).

Coastal California Gnatcatcher Critical Habitat

The proposed Project will impact areas within Critical Habitat Unit 9, designated for the coastal California gnatcatcher by the USFWS. Impacts to designated Critical Habitat will include impacts to areas meeting the definitions for PBF1 and PBF2.

It is important to note that areas within Critical Habitat Unit 9 provide for movement/dispersal opportunities along a roughly east-to-west axis between the Chino Hills and Puente Hills. The project site and associated Critical Habitat provides limited potential for dispersal due to existing development and the major roadway intersection of Valencia Avenue and Lambert Road immediately to the northwest of the Critical Habitat. The area more suitable for CAGN dispersal within the area of designated

Critical Habitat is located to the north of the Project Site as depicted Figure 13, *Regional Open Space and Proposed Mitigation Lands Map*. As summarized in Table 11, Impacts to CAGN Critical Habitat PBF's below, the project would impact 10.33 acres of PBF1 and 42.53 acres of PBF2 (52.86-acres total), both of which would be considered significant before mitigation but would be reduced to less-than-significant with mitigation.

Impacts to the coastal California gnatcatcher critical habitat will be reduced to a level of less than significant by implementing **BIO-MM 2** (Coastal California Gnatcatcher HCP & Monitoring), and **BIO-MM 3** (**Coastal California Gnatcatcher Critical Habitat**).

Table 11.
Impacts to CAGN Critical Habitat PBF's

Vegetation Alliance	PBF1	PBF2
Annual brome grassland	--	0.07
Blue elderberry (savannah)	--	2.56
California brittle bush scrub	0.05	--
California buckwheat scrub	2.07	--
California sagebrush scrub	7.87	--
Coast prickly pear scrub	0.11	--
Coyote brush scrub	0.23	--
Laurel sumac scrub	--	16.63
Mulefat thickets	--	0.02
Upland mustards	--	23.25
Subtotal	**10.33**	**42.53**

There are no Habitat Conservation Plans or Natural Community Conservation Plans, or other approved local, regional, or state habitat conservation plan associated with the site. Impacts to the federally listed threatened coastal California gnatcatcher and associated Critical Habitat Unit 9 will be authorized through a Section 7 Consultation between the USACE and USFWS. The applicant is preparing a Habitat Conservation Plan and Natural Community Conservation Plan in coordination with CDFW and USFWS.

Nesting Birds and Raptors

The project has the potential to impact active bird and raptor nests if vegetation is removed during the nesting season generally extending from February 1st to August 31st. Impacts to nesting birds are prohibited by the California Fish and Game Code 3503. Potential impacts to nesting birds and raptors would be mitigated to a level of less than significant by implementing **BIO-MM 5** (Regulatory Requirement CDFG Code)

Wildlife Movement within Project Site

Based on the extent of adjacent high-density residential development along the north, south and west boundaries and associated high traffic roadways bisecting and

bordering the property, the Project Site does not meet the definition or is expected to serve as a wildlife movement corridor for ground dwelling species.

However, the Project Site is located partially within USFWS designated critical habitat for the federally threated coastal California gnatcatcher. As previously analyzed and presented, a total of 52.86 acres of critical habitat representing PCEs were documented onsite. Impacts to the coastal California gnatcatcher critical habitat will be reduced to a level of less than significant by implementing **BIO-MM 2** (Coastal California Gnatcatcher HCP & Monitoring), and **BIO-MM3** (Coastal California Gnatcatcher Critical Habitat).

Jurisdictional Resources

The site contains no jurisdictional wetlands as defined under Section 404 of the Clean Water Act or under definitions in the Fish and Game Code or the State Water Board's wetland procedures. As such, there would be no significant impacts on wetlands. The project would impact highly degraded non-wetland streambeds as addressed below.

The project would impact 0.602-acre of highly degraded drainage courses subject to USACE jurisdiction pursuant to Section 404 of the Clean Water Act and Section 401 of the Clean Water Act as regulated by the Regional Board as outlined in Table 12, *USACE/RWQCB Jurisdictional Resources Impacts,* and shown in Figure 15*, USACE/RWQCB Jurisdictional Resources Impact Map*. Impacts to 0.602 acre of degraded drainage course would be considered significant by the RWQCB and with mitigation the impact would be reduced to less-than significant following implementation of **BIO-MM 1** (USACE/CDFW/RWQCB).

Table 12.
USACE/RWQCB Jurisdictional Resources Impacts

Drainage Feature	Type	Acres	Linear Feet
Drainage A	Non-Wetland Channel	0.363	2,422
Drainage B	Non-Wetland Ephemeral Channel	0.043	241
Drainage C	Non-Wetland Ephemeral Channel	0.086	1,149
Drainage D	Concrete Ephemeral Channel	0.11	474
	Total	**0.602**	**4,286**

Source: GLA 2022.

The Project, as proposed, would permanently impact 1.006-acre of CDFW jurisdiction, of which 0.063 acre consists of vegetated riparian habitat, and includes 4,286 linear feet of streambed as shown in Table 13, *CDFW Jurisdictional Resources Impacts,* and shown in Figure 16*, CDFW Jurisdictional Resources Impact Map*. Of the 1.006 acres, 0.11-acre of impact consists of concrete channel associated with Drainage D or the Carbon Canyon Channel and impacts to the concrete channel would not be considered significant because there are no streambed resources associated with the concrete channel. Thus, impacts to 0.896-acre of streambed of which 0.063-acre consists of riparian habitat would be considered significant. Impacts to 0.959-acre of degraded drainage course would be considered significant by the CDFW and with mitigation the impact would be reduced to less-than significant following implementation of **BIO-MM 1** (USACE/CDFW/RWQCB).

City of Brea General Plan – Community Resources

The project does not conflict with the policies set forth in the Brea 265 Specific Plan that has been prepared for the project, which supersedes and replaces the City of Brea local policies and/or ordinances following implementation of **BIO-MM1** to **BIO-MM5**.

City of Brea Municipal Codes

The project does not conflict with the policies set forth in the Brea 265 Specific Plan that has been prepared for the project, which supersedes and replaces the City of Brea local policies and/or ordinances following implementation of **BIO-MM1** to **BIO-MM5**.

INDIRECT IMPACTS

Water Quality/Hydrology

The project will comply with all applicable water quality regulations, including obtaining and complying with those conditions established in WDRs and a National Pollutant Discharge Elimination System (NPDES) permits. Both of these permits include the treatment of all surface runoff from paved and developed areas, the implementation of applicable Best Management Practices (BMPs) during construction activities and the installation and proper maintenance of structural BMPs to ensure adequate long-term treatment of water before entering into any stream course or offsite conservation areas.

Toxics

Storm water treatment systems will be designed to prevent the release of toxins, chemicals, petroleum products, exotic plant material, or other elements that could degrade or harm downstream biological or aquatic resources. Toxic sources within the Project Site would be limited to those commonly associated with residential, commercial, and mixed-use development, such as pesticides, insecticides, herbicides, fertilizers, and vehicle emissions. In order to mitigate for the potential effects of these toxics, the project will incorporate structural BMPs, as required in association with compliance with WDRs and the NPDES permit system, in order to reduce the level of toxins introduced into the drainage system and the surrounding areas. Water quality measures will be implemented and no significant impacts are anticipated.

Lighting

Night lighting associated with the proposed development that is adjacent to Carbon Canyon Regional Park would be directed away to reduce potential indirect impacts to wildlife species. No significant impacts are anticipated.

Noise

Because the proposed project development will not result in noise levels that exceed residential, commercial or mixed-use noise standards established for County of Orange or City of Brea, wildlife within Carbon Canyon Regional Park will not be subject to noise that exceeds these established standards. No significant impacts are anticipated. Short-term construction-related noise impacts will be reduced by the implementation of the following:

- During all Project Site excavation and grading on-site, the construction contractors shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers, consistent with manufacturers' standards. The construction contractor shall place all stationary construction equipment so that emitted noise is directed away from sensitive receptors (Carbon Canyon Regional Park) nearest the Project Site.

- The construction contractor shall locate equipment staging in areas that will create the greatest distance between construction-related noise sources and noise sensitive receptors (Carbon Canyon Regional Park) nearest the Project Site during all project construction.

- The construction contractor shall limit all construction-related activities that would result in high noise levels according to the construction hours to be determined by City of Brea staff.

- The construction contractor shall limit haul truck deliveries to the same hours specified for construction equipment. To the extent feasible, haul routes shall not pass sensitive land uses or residential dwellings.

The project has the potential to indirectly impact active bird and raptor nests during initial construction related vegetation removal during the nesting season generally extending from February 1st to August 31st. Potential indirect impacts to nesting birds and raptors are prohibited by the California Fish and Game Code 3503. Potential indirect impacts to nesting birds and raptors would be mitigated to a level of less than significant by implementing **BIO-MM 5** (Regulatory Requirement CDFG Code)

Invasive Species

The landscape plans for the residential, commercial and mixed development shall avoid the use of invasive species. All landscape plans must use native and/or drought-tolerant plant materials appropriate for their location and soil type, as identified in standard agricultural suitability soils test. Preferred landscaping materials shall consist of native plants identified in the city's landscape design manual. A final landscape

design will be developed and submitted to the City of Brea Director of Community Services for review and approval. No significant impacts are anticipated.

CUMULATIVE IMPACTS

The temporary direct and/or indirect impacts of the project would not result in significant cumulative impacts (CEQA Section 15310) to environmental resources within the region of the Project Site. Cumulative impacts refer to incremental effects of an individual project when assessed with the effects of past, current, and proposed projects. Although the project would result in the loss of 255.34-acres of primarily disturbed habitat types resulting from oil operations since the 1900's, cumulative impacts will be mitigated to a level of less than significant by preserving a total 52.86-acres of open space habitat within and immediately adjacent to the 14,000 acre Chino Hills State Park located within the existing Puente-Chino Hills wildlife corridor, **BIO-MM3** (Coastal California Gnatcatcher Critical Habitat).

MITIGATION MEASURES

The following biological mitigation measures address those adverse impacts determined to be potentially significant, or are relevant to the protection of biological resources to the extent practicable as part of ensuring compliance with local, federal, state and CEQA guidelines.

Impacts to USACE/CDFW/RWQCB regulatory resources (0.896-acre), sensitive vegetation (0.03-acre black willow thicket, 1.37-acre blue elderberry woodland), and LBV habitat (1.37-acre blue elderberry woodland) will collectively be mitigated thorough the reestablishing 2.74-acres of streambed and associated blue elderberry woodland (**BIO-MM 1** and **BIO-MM 4**).

BIO-MM 1 USACE/CDFW/RWQCB

The project would result in impacts to ephemeral streambed regulated under Section 404 of the Clean Water Act, Section 1602 of the Fish and Game Code, and the Waste Discharge Requirement of Porter Cologne. Because impacts to CDFW jurisdiction exceed impacts to USACE jurisdiction, mitigation is based on impacts to CDFW jurisdiction.

Prior to issuance of a grading permit, the project applicant will obtain a 404 Nationwide Permit from the USACE, 1602 SAA from CDFW, and a 401 RWQCB Certification for impacts to jurisdictional resources. During the permit/certification processes a Habitat Mitigation Monitoring Plan (HMMP) will be developed and approved by the City of Brea, USACE, CDFW and RWQCB as described below (Habitat Mitigation Monitoring Plan).

All proposed regulatory restoration activities will occur within the 52.86-acres of open space lands proposed for dedication as outlined in **BIO-MM3** (Coastal California Gnatcatcher Critical Habitat).

Specifically, the project would impact 0.943-acre of drainage channel and 0.063-acre of riparian habitat subject to Section 1602 of the California Fish and Game Code; however, 0.11 acre consists of the concrete segment of Carbon Canyon Creek downstream of Carbon Canyon Dam which contains no fish or wildlife resources and impacts to this concrete channel would not be considered significant. Thus, impacts to ephemeral drainage channel subject to Section 1602 jurisdiction requiring mitigation would total 0.833 acre of drainage channel plus 0.063 acre of riparian habitat (0.896-acre total).

Impacts to USACE and RWQCB jurisdiction under the Porter Cologne Waste Discharge Requirements totals 0.602 acre of which 0.11 acre consists of the concrete segment of Carbon Canyon Channel. Thus, the necessary mitigation for Section 1602 impacts will also address the impacts to USACE and RWQCB jurisdiction. Impact would be mitigated at a greater than 3:1 ratio:

- Establish and/or reestablish 2.74-acres of streambed and associated blue elderberry woodland, inclusive of **BIO-MM 4** (**Least Bell's Vireo HCP**), in association with stream re-establishment or rehabilitation at a location approved by CDFW and the RWQCB, either within lands owned or controlled by Aera Energy within or adjacent to Chino Hills State Park as shown in Figure 13, *Regional Open Space and Proposed Mitigation Lands Map*

Habitat Mitigation Monitoring Plan

If restoration is proposed the project applicant shall develop an HMMP for impacts to jurisdictional resources including black willow thickets (state rarity ranking of S3). The HMMP shall be prepared by a qualified Biologist and approved by the USACE, CDFW and RWQCB. The Applicant shall begin restoration activities (e.g., soil prep, seeding, planting) no later than one year after issuance of the first permit that allows for ground disturbance (e.g., grading permit). The Applicant shall be fully responsible for implementing the revegetation program until the restoration areas have met the success criteria outlined in the HMMP. The regulatory agencies shall have final authority over mitigation area sign-off. The HMMP will include at a minimum 1) project description, 2) mitigation goals, 3) description of mitigation site, 4) implementation approach, 5) maintenance/monitoring approach, 6) success criteria/contingency measures, and 7) funding mechanism.

BIO-MM 2 Coastal California Gnatcatcher HCP & Monitoring

A Habitat Conservation Plan (HCP) pursuant to Section 10(a)(1)(B) of the FESA will be developed as part of formal consultation with the USFWS for impacts to 10.33-acres of occupied and suitable coastal California gnatcatcher habitat. Upon development of the HCP, the USFWS can issue incidental take permits for listed species where the HCP specifies at a minimum, the following: (1) the level of impact that will result from the taking, (2) steps that will minimize and mitigate the impacts, (3) funding necessary to implement the plan, (4) alternative actions to the taking considered by the applicant and the reasons why such alternatives were not chosen, and (5) such other measures that the USFWS may require as being necessary or appropriate for the HCP. With implementation of the following measures including **BIO-MM3** (**Coastal California Gnatcatcher Critical Habitat**), as approved in consultation with USFWS, impacts to

coastal California gnatcatcher occupied, areas of (i) and areas of PCE (ii) project impacts would be mitigated to less than significant:

Impacts to 10.33-acres of occupied and suitable coastal California gnatcatcher habitat will be mitigated as outlined below. The following proposed establishment and/or restoration activities, approved by the USFWS, will occur offsite within the lands proposed for dedication including 52.86-acres of open space lands located within and adjacent to Chino Hills State Park as shown in Figure 13, *Regional Open Space and Proposed Mitigation Lands Map,* including:

- Coastal Sage Scrub Establishment/Restoration (2:1) 20.66-acres

- Prepare Habitat Restoration Plan that will include the following components, Location, Site Preparation Methods, Plant Palette, Planting Methods, Maintenance Requirements, Monitoring and Reporting Procedures, Performance Standards.

The Applicant shall begin coastal sage scrub restoration activities (e.g., soil prep, seeding) no later than one year after issuance of the first permit that allows for ground disturbance (e.g., grading permit).

The HCP will also include monitoring requirements to ensure nesting activities are not directly or indirectly impacted as a result of project initiation. The take of active coastal California gnatcatcher nests, which includes harassment of the bird due to grading noise and vibrations from February 15th through July 1st, is not permitted. Therefore, grading and removal of habitat during this time frame will only be permitted subject to the following conditions having been met to the satisfaction of the USFWS.

The applicant is hereby advised that, during grading, if active nests are found within 500 feet of the grading, the grading activity shall be stopped until such time as mitigation measures, to the satisfaction of the USFWS are implemented. There is no guarantee that grading will be allowed to resume during the nesting season.

Before issuance of a clearing/grading permit, if grading or clearing is to occur between February 15th and July 1st, the applicant shall provide to the City of Brea a letter from a qualified biologist retained by the applicant, with a scope of work for a coastal sage scrub habitat and coastal California gnatcatcher survey, and a report for the area to be cleared and/or graded and coastal sage scrub habitat areas within 500 feet of such area. The biologist shall coordinate with the USFWS to determine the appropriate survey methodology. The purpose of the survey is to determine if any active gnatcatcher nests are located in the area to be cleared or graded, or in coastal sage scrub habitat within 500 feet of such area. To be considered qualified, the biologist must provide the City with a copy of a valid coastal California Gnatcatcher Recovery Permit from the USFWS.

The scope of work shall explain the survey methodology for the biological survey and the proposed coastal California gnatcatcher nest monitoring activities during the clearing/grading operation. Should the report show, to the satisfaction of the USFWS, that gnatcatcher nests are not present within the area to be graded/cleared, or within coastal sage scrub habitat located within 500 feet of said area, approval may be granted

to commence clearing/grading within the coastal California gnatcatcher nesting season from February 15th through July 1st.

If coastal California gnatcatchers are nesting within the area to be graded/cleared, or within coastal sage scrub habitat located within 500 feet of said area, no grading will be allowed during this time until such time as mitigation measures, to the satisfaction of the City of Brea and the USFWS are implemented.

The biologist must attend the City's pre-construction meeting for the project and must be present onsite during all clearing/grading activities to monitor that the clearing/grading activities stay within the designated limits. During this period, the biologist shall also monitor and survey the habitat within the area to be cleared/graded and any habitat within 500 feet of said area for any evidence that a coastal California gnatcatcher nest(s) exists or is being built. Should evidence of a coastal California gnatcatcher nest(s) be discovered, the grading operation shall cease in that area and be directed away from the coastal California gnatcatcher nest(s) to a location greater than 500 feet away from the nest(s).

Upon completion of the clearing/grading activities, the applicant's biologist shall submit to the City of Brea and USFWS a biological monitoring report summarizing the observations of the biologist, including whether any coastal California gnatcatchers or evidence of active coastal California gnatcatcher nests were present during clearing and grading activities within the area and any habitat within 500 feet of said area.

BIO-MM 3 Coastal California Gnatcatcher Critical Habitat

Impacts to 52.86-acres of USFWS coastal California gnatcatcher critical habitat with PBFs 1 or PBFs 2 will be mitigated by preserving a total 52.86-acres of open space habitat within and immediately adjacent to the existing Puente-Chino Hills wildlife corridor. The proposed preserved lands will include 22.50 acres of in-holdings (SWEPI Retained Drill Sites) within the Chino Hills State Park and Shell/Aera oil retained lands located within the coastal California gnatcatcher critical habitat boundary within which a minimum of 20.66 acres of coastal sage scrub restoration will occur as outlined in **BIO-MM 2**. The proposed land conservation would also provide a significant contribution to a region of open space adjacent to Carbon Canyon Road identified as a "Priority Crossing Improvement Area - A" (CBI 2005). The fee title dedication of 52.86-acres of open space lands located within and adjacent to Chino Hills State Park within the Puente-Chino Hills wildlife corridor, coastal California gnatcatcher critical habitat, priority crossing improvement area, and within which 20.66-acres of coastal sage scrub restoration is proposed would represent a significant acquisition and contribution to regional wildlife movement conservation goals. The proposed conserved lands will be offered to the Chino Hills State Park for consideration of acquisition.

BIO-MM 4 Least Bell's Vireo HCP

A Habitat Conservation Plan (HCP) pursuant to Section 10(a)(1)(B) of the FESA will be developed as part of formal consultation with the USFWS for impacts to 1.37-acres of least Bell's vireo habitat (Blue elderberry Woodland). Upon development of the HCP, the USFWS can issue incidental take permits for listed species where the HCP specifies at a minimum, the following: (1) the level of impact that will result from the taking, (2)

steps that will minimize and mitigate the impacts, (3) funding necessary to implement the plan, (4) alternative actions to the taking considered by the applicant and the reasons why such alternatives were not chosen, and (5) such other measures that the USFWS or CDFW may require as being necessary or appropriate for the HCP.

The following proposed preservation and/or restoration activities, approved by the USFWS, will occur offsite within the lands proposed for dedication including 52.86-acres of open space lands located within and adjacent to Chino Hills State Park as shown in Figure 13, *Regional Open Space and Proposed Mitigation Lands Map,* including:

- Blue elderberry Woodland Establishment (2:1) 2.74-acres, inclusive of **BIO-MM 1** (**USACE/CDFW/RWQCB**)

- Prepare Habitat Restoration Plan that will include the following components, Location, Site Preparation Methods, Plant Palette, Planting Methods, Maintenance Requirements, Monitoring and Reporting Procedures, Performance Standards

The Applicant shall begin coastal sage scrub restoration activities (e.g., soil prep, seeding) no later than one year after issuance of the first permit that allows for ground disturbance (e.g., grading permit).

The HCP will also include monitoring requirements to ensure nesting activities are not directly or indirectly impacted as a result of project initiation. The take of active least Bell's vireo nests, which includes harassment of the bird due to grading noise and vibrations from April 14th through July 31st, is not permitted. Therefore, grading and removal of habitat during this time frame will only be permitted subject to the following conditions having been met to the satisfaction of the City of Brea and USFWS.

The applicant is hereby advised that, during grading, if active nests are found within 500 feet of the grading, the grading activity shall be stopped until such time as mitigation measures, to the satisfaction of the City of Brea and the USFWS are implemented. There is no guarantee that grading will be allowed to resume during the nesting season.

BIO-MM 5 Regulatory Requirement CDFG Code

Regulatory requirement for potential direct/indirect impacts to nesting common and sensitive bird and raptor species will require compliance with the CDFG Code Section 3503. Construction outside the nesting season (between September 1st and January 31st) do not require pre-removal nesting bird surveys. If construction is proposed between February 1st and August 31st, a qualified biologist must conduct a nesting bird survey(s) no more than fourteen (14) days prior to initiation of grading to document the presence or absence of nesting birds within or directly adjacent (100 feet) to the Project Site.

The survey(s) will focus on identifying any raptors and/or bird nests that are directly or indirectly affected by construction activities. If active nests are documented, species-specific measures shall be prepared by a qualified biologist and implemented to prevent abandonment of the active nest. At a minimum, grading in the vicinity of a nest shall be postponed until the young birds have fledged. The perimeter of the nest setback zone shall be fenced or adequately demarcated with stakes and flagging at 20-foot intervals,

and construction personnel and activities restricted from the area. A survey report by a qualified biologist verifying that no active nests are present, or that the young have fledged, shall be submitted to the City of Brea for review and approval prior to initiation of grading in the nest-setback zone.

The qualified biologist shall serve as a construction monitor during those periods when construction activities occur near active nest areas to ensure that no inadvertent impacts on these nests occur. A final monitoring report of the findings, prepared by a qualified biologist, shall be submitted to the City of Brea documenting compliance with the CDFG Code. Any nest permanently vacated for the season would not warrant protection pursuant to the CDFG Code.

Implementation of Mitigation Measures **BIO-MM1** through **BIO-MM5** would reduce all potential significant unavoidable impacts on biological resources below a level of significance.

APPENDIX A: FLORAL COMPENDIUM

(Source GLA 2022)

The floral compendium lists species identified on the project site. Taxonomy follows the Jepson Manual (Baldwin et al 2012) and, for sensitive species, the California Native Plant Society's Rare Plant Inventory (Tibor 2001). Common plant names are taken from Hickman (1993), Munz (1974), and Roberts et al (2004). An asterisk (*) denotes a non-native species.

Scientific Name	Common Name
MAGNOLIOPHYTA	**FLOWERING PLANTS**
DICOTYLEDONS	**DICOTS**
AMARANTHACEAE	**Amaranth Family**
Amaranthus blitoides	prostrate pigweed
ADOXACEAE	**Elderberry Family**
Sambucus nigra ssp. caerulea	blue elderberry
ANACARDIACEAE	**Sumac Family**
Malosma laurina	laurel sumac
**Schinus molle*	Peruvian pepper tree
**Schinus terebinthifolius*	Brazilian pepper tree
APIACEAE	**Carrot Family**
**Conium maculatum*	poison hemlock
**Foeniculum vulgare*	sweet fennel
ASTERACEAE	**Sunflower Family**
Artemisia californica	California sagebrush
Baccharis pilularis	coyote brush
Baccharis salicifolia	mule fat
**Centaurea melitensis*	tocalote
Conyza Canadensis	common horseweed
**Dimorphotheca sinuate*	African daisy
Encelia californica	California bush sunflower
Encelia farinosa	brittlebush
Heterotheca grandiflora	telegraph weed
Helianthus annuus	common sunflower
**Helminthotheca echoides*	bristly ox-tongue
Isocoma menziesii	Menzie's goldenbush
**Lactuca serriola*	prickly lettuce
**Pulicaria paludosa*	Spanish false fleabane
Psuedognaphalium californicum	California everlasting
**Sonchus oleraceus*	common sow-thistle

BORAGINACEAE	**Borage Family**
Amsinckia intermedia	common fiddleneck
Heliotropium curassavicum	heliotrope
BRASSICACEAE	**Mustard Family**
**Brassica nigra*	black mustard
**Hirschfeldia incana*	summer mustard
**Sisymbrium irio*	London rocket
CACTACEAE	**Cactus Family**
Opuntia littoralis	prickly pear
CHENOPODIACEAE	**Goosefoot Family**
**Chenopodium album*	lamb's quarters
**Salsola tragus*	Russian thistle
CRASSULACEAE	**Stonecrop Family**
Dudleya lanceolata	lanceleaf liveforever
EUPHORBIACEAE	**Spurge Family**
Euphorbia albomarginata	rattlesnake sandmat
Croton californicus	California croton
**Euphorbia maculata*	spotted spurge
**Ricinus communis*	castor bean
FABACEAE	**Legume Family**
**Melilotus indicus*	Annual yellow sweetclover
FAGACEAE	**Oak Family**
Quercus berberidifolia	scrub oak
GERANIACEAE	**Geranium Family**
**Erodium botrys*	broad leaf filaree
**Erodium cicutarium*	red-stemmed filaree
**Erodium moschatum*	white-stemmed filaree
JUGLANDACEAE	**Walnut Family**
Juglans californica	Southern California black walnut
LAMIACEAE	**Mint Family**
Salvia apiana	white sage
MALVACEAE	**Mallow Family**
**Malva parviflora*	cheeseweed

MYRTACEAE	**Myrtle Family**
**Eucalyptus sp.*	eucalyptus
PLATANACEAE	**Myrtle Family**
Platanus racemosa	western sycamore
POLYGONACEAE	**Buckwheat Family**
Eriogonum elongatum	longstem buckwheat
Eriogonum fasciculatum	California buckwheat
SALICACEAE	**Willow Family**
Salix goodingii	black willow
SCROPHULARIACEAE	**Figwort Family**
Mimulus auranticus	sticky monkey flower
SIMAROUBACEAE	**Quassia Family**
**Ailanthus altissima*	tree of heaven
SOLANACEAE	**Nightshade Family**
Datura wrightii	Jimsonweed
**Nicotiana glauca*	tree tobacco
Solanum americanum	white nightshade
URTICACEAE	**Nettle Family**
**Urtica urens*	dwarf nettle
VITACEAE	**Grape Family**
Vitis californica	California wild grape
MAGNOLIOPHYTA **MONOCOTYLEDONES**	**FLOWERING PLANTS** **MONOCOTS**
AREACEAE	**Palm Family**
Washingtonia filifera	California fan palm
**Washingtonia robusta*	Mexican fan palm
POACEAE	**Grass Family**
**Arundo donax*	giant reed
**Avena barbata*	slender oat
**Bromus diandrus*	ripgut brome
**Bromus madritensis* ssp. *rubens*	foxtail chess
**Hordeum murinum ssp. leporinum*	foxtail barley
**Pennisetum setaceum*	fountain grass

APPENDIX B: FAUNAL COMPENDIA

(Source GLA 2022)

Vertebrates identified in the field by sight, calls, tracks, scat, or other signs are cited according to the nomenclature of Collins (1997) for amphibians and reptiles, AOU (1998) for birds, and Jones et al. (1992) for mammals.

LEGEND

Presence of animals noted by direct sighting, call identification or observation of tracks, scat or other signs

† Denotes species not observed but expected to occur on site
* Denotes non-native species

TERRESTRIAL VERTEBRATES

REPTILES

IGUANIDAE - IGUANID LIZARDS

Sceloporus occidentalis
western fence lizard
Uta stansburiana
side-blotched lizard

COLUBRIDAE - COLUBRID SNAKES

† *Pituophis melanoleucus*
gopher snake
† *Lampropeltis getulus*
common kingsnake

BIRDS

ANATIDAE - SWANS AND GEESE

Branta canadensis
Canada goose

PHASIANIDAE - PHEASANTS & QUAILS

Callipepla californica
California quail

CATHARTIDAE - NEW WORLD VULTURES

Cathartes aura
turkey vulture

ACCIPITRIDAE - HAWKS

Accipiter cooperi
Cooper's hawk
Buteo jamaicensis
red-tailed hawk

CHARADRIIDAE - SHOREBIRDS

Charadrius vociferus
killdeer

SCOLOPACIDAE - SHOREBIRDS

Numenius phaeopus
whimbrel

APODIDAE - PIGEONS & DOVES

Zenaida macroura
mourning dove

CUCULIDAE - CUCKOOS

Geococcyx californianus
greater roadrunner

COLUMBIDAE - SWIFTS

Aeronautes saxatalis
White-throated swift

TROCHILIDAE - HUMMINGBIRDS

Calypte anna
Anna's hummingbird
Selasphorus sasin
Allen's hummingbird

PICIDAE - WOODPECKERS

Picoides nuttallii
Nuttall's woodpecker
Melanerpes formicivorus
acorn woodpecker

FALCONIDAE - FALCONS

Falco sparverius
American kestrel

TYRANNIDAE - TYRANT FLYCATCHERS

Contopus cooperi
olive-sided flycatcher
Empidonax difficilis
pacific-slope flycatcher
† *Sayornis nigricans*
black phoebe
Sayornis saya
Say's phoebe
Myiarchus cinerascens
ash-throated flycatcher
Tyrranis verticalis
Western kingbird

VIREONIDAE - VIREOS

Vireo bellii
least Bell's vireo

CORVIDAE - JAYS & CROWS

Aphelocoma californica
Western scrub-jay
Corvus brachyrhynchos
American crow
Corvus corax
common raven

HIRUNDINIDAE - SWALLOWS

Hirundo rustica
barn swallow

Hirundo pyrrhonota
cliff swallow

Stelgidopteryx serripennis
northern rough-winged swallow

AEGITHALIDAE - BUSHTITS

Psaltriparus minimus
bushtit

TROGLODYTIDAE - WRENS

Thryomanes bewickii
Bewick's wren
Troglodytes aedon
house wren

POLIOPTILIDAE - GNATCATCHERS

Polioptila caerulea
blue-gray gnatcatcher
Polioptila californica
California gnatcatcher

MUSCICAPIDAE - KINGLETS, GNATCATCHERS, THRUSHES & BABBLERS

Chamaea fasciata
wrentit

TURDIDAE - THRUSHES

Sialia mexicana
Western bluebird

MIMIDAE - THRASHERS

Toxostoma redivivum
California thrasher
Mimus polyglottos
Northern mockingbird

STURNIDAE - STARLINGS

* *Sturnus vulgaris*
European starling

MOTACILLIDAE - PIPITS

Anthus rubescens
American pipit

PTILIOGONATIDAE

Phainopepla nitens
Phainopepla

PARULIDAE - WOOD WARBLERS

Oreothlypis celata
orange crowned warbler

Geothlypis trichas
common yellowthroat
Setophaga coronata
yellow-rumped warbler
Cardellina pusilla
Wilson's warbler

EMBERIZIDAE – SPARROWS, BUNTINGS, WARBLERS, & RELATIVES

Melozone crissalis
California towhee
Pipilo maculatus
spotted towhee
Melospiza melodia
song sparrow
Zonotrichia leucophrys
white-crowned sparrow

CARDINALIDAE - TANAGERS AND CARDINALS

Pheucticus melanocephalus
black-headed grosbeak

ICTERIDAE - BLACKBIRDS AND ORIOLES

Sturnella neglecta
Western meadowlark
† *Euphagus cyanocephalus*
Brewer's blackbird
Molothrus ater
brown headed cowbird

Icterus cucullatus
hooded oriole
Icterus bullockii
Bullock's oriole

FRINGILLIDAE - FINCHES

Carpodacus mexicanus
house finch
Carduelis psaltria
lesser goldfinch

PASSERIDAE - OLD WORLD SPARROWS

*† *Passer domesticus*
house sparrow

MAMMALS

DIDELPHIDAE - NEW WORLD OPOSSUMS

†* *Didelphis virginiana*
Virginia opossum

VESPERTILIONIDAE - EVENING BATS

† *Myotis spp.*
myotis bat

GEOMYIDAE - POCKET GOPHERS

† *Thomomys bottae*
Botta's pocket gopher

MURIDAE - MICE, RATS, AND VOLES

† *Peromyscus maniculatus*
deer mouse

PROCYONIDAE - RACCOONS

† *Procyon lotor*
raccoon

CERVIDAE - DEER

Odocoileus hemionus
mule Deer

CANIDAE - CANINES

Canius latrans
coyote

LEPORIDAE - RABBITS AND HARES

Sylvilagus bachmani
brush rabbit

FELIDAE - WILD CATS

Lynx rufus
bobcat

CRICETIDAE - NEW WORLD MICE AND RATS

Neotoma fuscipes
dusky woodrat

SCIURIIDAE - SQUIRRELS

Otospermophilus beecheyi
California ground squirrel

Attention: Mr. George Basye

Subject: **EIR-LEVEL GEOTECHNICAL ASSESSMENT**
Brea Central Property, City of Brea
County of Orange, California

References: See Appendix A

Dear Mr. Basye:

In accordance with your request, Alta California Geotechnical, Inc. (Alta) is pleased to submit this geotechnical assessment in support of EIR submittals for the Brea Central Property, in the City of Brea, County of Orange, California. An initial geotechnical subsurface investigation was previously conducted onsite by Pacific Soils Engineering, Inc. (PSE, 1999) that included the excavation, logging, and sampling of bucket-auger borings and backhoe trenches. We reviewed the technical documents that are tabulated in Appendix A.

In this document, Alta first summarizes the investigative methodology and the geographic, geomorphic, and geologic setting of the Brea Central project and its environs. We then assess geological and geotechnical engineering issues applicable to EIR processing and offer potential mitigations for same. Included in the text of this report are a Site Location map (Figure 1), Geomorphic Province Map (Figure 2), Regional Geologic Map (Figure 3), Regional Fault Map (Figure 4), and Mineral Land Classification Map (Figure 5). Appendices include the reference list (Appendix A), previous subsurface investigation (Appendix B), and previous laboratory test results (Appendix C). A 200-scale Geologic Map is included as a pocket enclosure.

The project is considered feasible from a geologic and geotechnical perspective. The major geotechnical issues that could impact the development as conceived are discussed in Section 4.0 of this document and include: faulting and seismic hazards; erosion/mass wasting; slope stability; compressible/collapsible soils; expansive soils; infiltration characteristics; and corrosion. All these issues can be mitigated and alternatives for mitigation are presented in this report.

Alta appreciates the opportunity to provide you with geotechnical consulting services. If you have any questions or should you require any additional information, please contact the undersigned at (951) 509-7090.

Respectfully submitted,
ALTA CALIFORNIA GEOTECHNICAL, INC.

1.0 INTRODUCTION

1.1 Background and Purpose

This report presents the results of Alta California Geotechnical, Inc's. (Alta) geotechnical assessment in support of EIR processing for the Brea Central project.

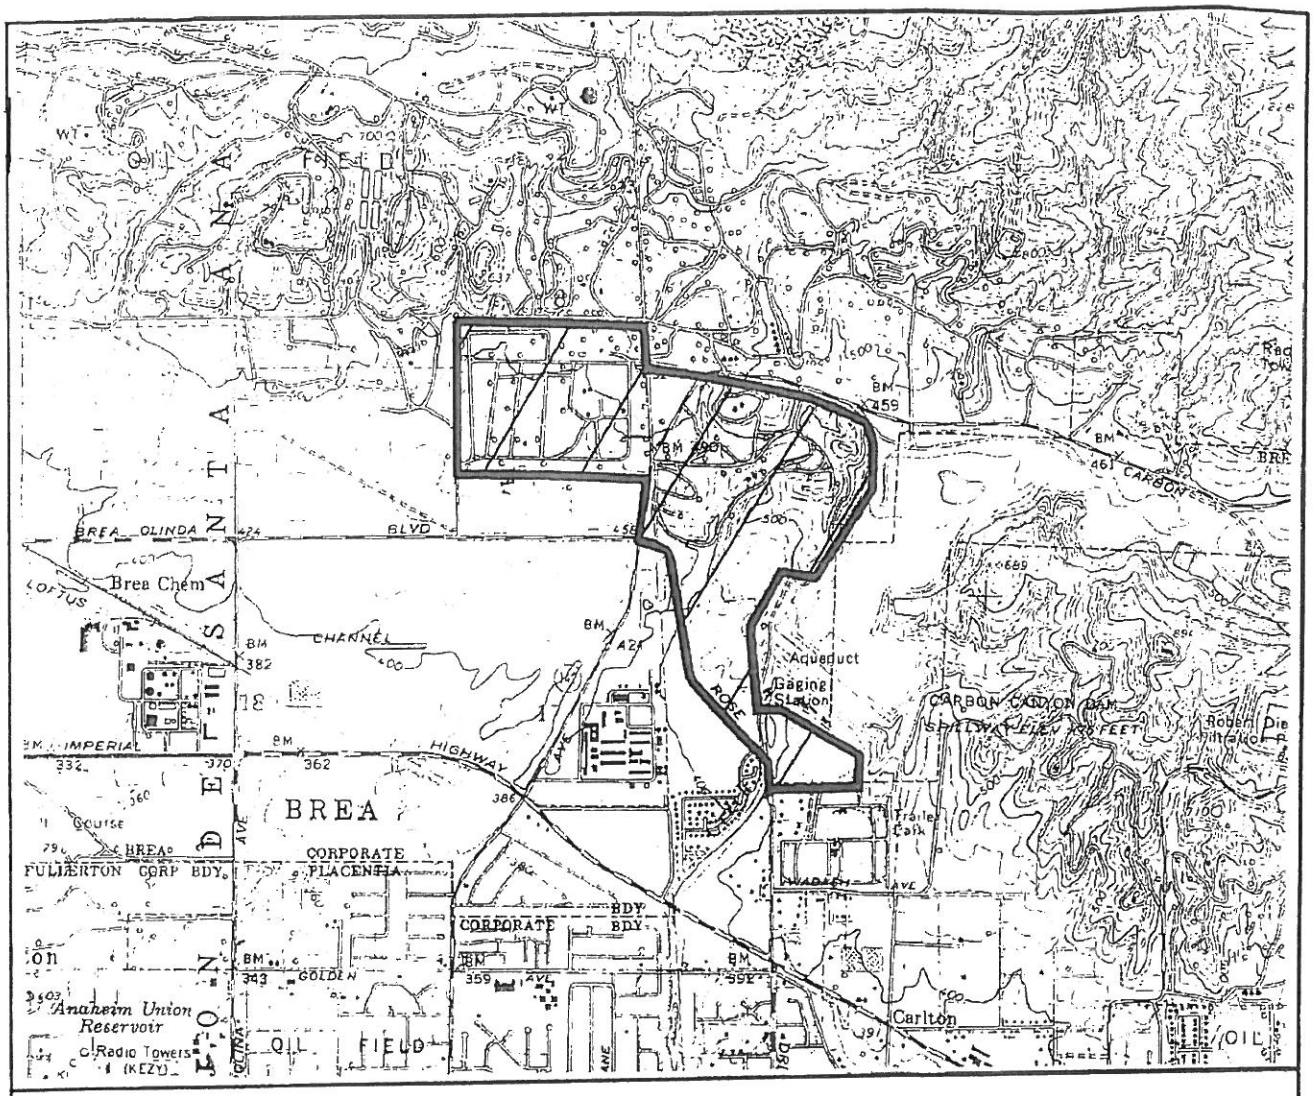
1.2 Scope of Work

Alta's scope of work consisted of the following:

- Reviewing the cited geologic literature, maps, and aerial photographs;
- Site geologic mapping;
- Compiling of previous subsurface information (PSE, 1999), including twenty-one (21) backhoe trench logs and nine (9) bucket auger boring logs (Appendix B);
- Compiling previous laboratory test results (Appendix C);
- A limited seismic evaluation;
- Evaluating the general remedial grading requirements;
- Consolidating the geologic and geotechnical data and preparation of a geologic base map;
- Preparing of this report in support of your EIR submittals, with exhibits, summarizing our findings.

1.3 Site Location and Existing Conditions

The subject site is an inverted L shape property, which, for descriptive purposes, is divided herein into eastern and western portions (Figure 1). The eastern portion of the site is bound by Valencia Avenue and Rose Drive on the western side, and Carbon Canyon Regional Park on the eastern side. The northern boundary is at Carbon Canyon Road and the southern limits are at Blake Road. The western portion of the property, known as the "100 Acres", is bound by Birch Street on the south, Lambert Road on the north, Valencia Avenue on the



SITE LOCATION MAP

PROJECT NUMBER: 1-0250 **DATE:** 12-19-18

east and an existing housing development on the west. Access to the site is via paved and unpaved roads off of Valencia Avenue, Rose Drive and Blake Road.

Topographically the site is characterized by low-lying alluvial terraces with minimal relief on the southern portions of the site and on the western "100 Acres". The northeastern portion of the site consists of rounded hills and ridgelines of moderate height with intervening canyons and draws. A steep slope is present on the northeastern edge of the property above the Carbon Canyon stream bed. Drainage is by sheet flow to the canyons and draw areas, which drain to the south and southwest. Total relief onsite is approximately 201 feet and elevations range from 586 feet to 385 feet. The natural slopes onsite are gentle to very steep, and range from 1:1 to 5:1 (horizontal:vertical).

Vegetation onsite consists of native grasses, shrubs and trees. Vegetation varies from light to locally heavy, with the heavy vegetation and trees concentrated in the draws and canyons.

The subject site is currently being utilized for oil production and a nursery. Numerous roadways associated with oil field exploration and production exist throughout the site. The site was utilized extensively in the past for agricultural purposes. Small-scale sand and gravel quarrying has occurred onsite. The Carbon Canyon flood control dam and flood basin lies immediately offsite of the south-central portion of the site.

Several utilities cross the site within easements. A Metropolitan Water District easement crosses the far southern portion of the site to Rose Drive. A 30-inch high pressure gas line crosses the southern portion of the project below the Carbon Canyon dam, and a Mobil Oil gasoline line runs in a roughly north-south direction across the eastern portions of the site from Blake Road to Carbon Canyon Road. The Carbon Canyon Dam sewer line is present onsite within the

fill prism labeled PSE-1 at the approximate location shown on Plate 1. Numerous other utilities associated with the existing oil field production and the nursery are located onsite.

1.4 Proposed Development

Residential building pads with attendant streets and utilities are proposed for the site at this time. Cut and fill mass grading will be required in order to develop lots onsite. Specific plans and details are not presently available.

2.0 PREVIOUS INVESTIGATIVE METHODOLOGY

The Brea Central property was the subject of a preliminary geotechnical constraints study prepared by GeoSoils, Inc. (GeoSoils, 1992). No subsurface exploration was conducted as a part of that study.

Pacific Soils Engineering, Inc. (PSE) conducted a subsurface investigation in 1999 (PSE, 1999) directed towards defining the on-site geologic relationships and collecting representative samples for geotechnical testing. Personnel of PSE excavated and logged twenty-one (21) backhoe excavations. The trenches ranged from 3 to 16 feet in depth and were excavated with a Case 580E backhoe. The materials exposed on the trench walls were classified in the field using tactile and visual methods. Logs of the exploratory trenches are presented in Appendix B, and the approximate locations are shown on Plate 1.

A truck mounted bucket auger drill rig equipped with a 30-inch bucket was used to advance nine (9) borings. The borings ranged in depth from 25 to 83 feet. Logs of the exploratory borings are presented in Appendix B, and the locations are shown on Plate 1.

Samples taken during the subsurface investigation were transported to PSE's laboratory for testing and analysis. The results of the laboratory testing are presented in Appendix C of this report.

PSE observed and tested grading operations for adjacent projects that encroached on the subject project, including the Shea Homes development to the northwest, and the Brea Sports Park development (PSE, 2008). PSE also observed and tested grading and trench backfill operations for the Carbon Canyon Dam Sewer project (PSE, 2009).

3.0 GEOLOGIC CONDITIONS

3.1 Geologic and Geomorphic Setting

The subject site is located on the southwestern flank of the Puente Hills (Figure 2). The Puente Hills form the western to northwestern margin of the Los Angeles Basin, which is located in Peninsular Ranges Geomorphic Province. The Puente Hills are bracketed by the Whittier and Chino Fault Zones and have been created by uplift along these faults. Approximately 13,000 feet of Miocene aged marine clastic sedimentary rocks underlies the Puente Hills. These sediments overlie approximately 16,000 feet of Cenozoic aged rock which are underlain by Mesozoic plutonic basement rocks (Yerkes, 1972).

Uplift of the Puente Hills in the late Pleistocene and Holocene have created erosional geomorphic features, which have been infilled with older alluvial and terrace materials. These older alluvium and terrace deposits underlie the broad alluvial plains adjacent to the Puente Hills on which the southern and western portions of the project lie. More recent accumulations of alluvium and colluvium are present in the canyons and draws onsite.

3.2 Stratigraphy

The site is underlain by engineered artificial fills, undocumented artificial fills, landslide debris, colluvium, alluvium, older alluvium, terrace deposits, upper and lower members of the Fernando Formation, and the Puente Formation (Figure 3). The geologic units and nomenclature are modeled after Yerkes, 1972. The as-mapped distribution is shown on Plate 1. Presented below is a brief description of the geologic units mapped onsite.

3.2.1 Puente Formation – Sycamore Canyon Member (Tpsc):

The Miocene aged Sycamore Canyon member of the Puente Formation is located on the far north side of the site. The Sycamore Canyon member onsite was not explored in the subsurface but based on observed outcrops and mapping by others it is composed of conglomerates. The rock is described in the reviewed literature as being moderately hard to hard, moist and moderately to well-cemented.

3.2.2 Fernando Formation – Lower Member (Tfl):

The Pliocene aged, Lower Member of the Fernando Formation can be found on the northeastern portion of the site. The lower member of the Fernando formation onsite is composed of siltstone and clayey siltstone with minor fine-grained sandstone beds. The rock is moderately hard to hard and slightly moist to moist.

3.2.3 Fernando Formation – Upper Member (Tfu):

The upper member of the Pliocene Fernando Formation is present on the northeasterly to easterly portions of the site. Onsite the upper member of the Fernando Formation is composed of interbedded siltstones and conglomerates. The conglomerates are made up of subrounded to rounded pebble to cobble sized clasts, which range in size from ½-inch to 6-inches in diameter. The cobbles are contained within a matrix, which is composed of coarse to very coarse sand. The conglomerate is hard, poorly to well cemented, and locally fossiliferous.

The siltstones of the upper member of the Fernando Formation are moist, moderately hard to hard with minor cemented zones. Minor fine-grained sandstone interbeds are present within the siltstones. The siltstone is generally massive with locally well-bedded zones associated with the sandstone interbeds.

3.2.4 Terrace Deposits (Qt):

Pleistocene-aged terrace deposits are located throughout the central, north central and western portions of the site. The terrace deposits are composed of sandy to clayey silts and silty sands, which are dark reddish brown, firm to stiff and dense, slightly moist to moist.

3.2.5 Older Alluvium (Qoal):

The late Pleistocene to early Holocene-aged older alluvium is present on the southeastern portion of the project. Onsite, the older alluvium is composed of silty to sandy clays and clayey to silty sands. The older alluvium is firm and medium dense to dense and stiff, slightly moist to moist, and predominantly dark reddish to yellowish brown in color.

3.2.6 Alluvium (Qal):

Recent alluvial soils are present in the draws and canyons throughout the site and within the Carbon Canyon channel area below the Carbon Canyon retention dam. The alluvium is composed of clayey to sandy silt, silty sand, and silty clay. The soils are loose and soft to firm and medium dense and dry to moist.

3.2.7 Colluvium (Qcol):

Recent colluvial soils are present on the slope flanks throughout the hillier portions of the project. The colluvium consists of silty to sandy clays, clayey slits, and silty sands in a slightly moist to moist and soft to firm condition.

3.2.8 Landslide Debris (Qls):

Two questioned landslides have been mapped on the northeast side of the site. The slides were mapped based on geomorphic expression and aerial photographic review and have not been explored previously. The

landslide debris, if it exists, is derived from the siltstone member of the Fernando Formation.

3.2.9 Undocumented Artificial Fill (Qaf):

Undocumented artificial fills are scattered over the site. The fills are associated with access road construction, oil field exploration/production, and past and present agricultural uses. The fills are derived from the surrounding soils and are dry to slightly moist and loose/soft.

3.2.10 Engineered Artificial Fill (afe1, afe2, afe3):

Engineered artificial fill was placed onsite as part of the development of the adjacent Shea Homes project, the Brea Sports Park (PSE, 2008) and the Carbon Canyon Dam Sewer project (PSE, 2009).

3.3 Geologic Structure/Tectonic Setting - Rancho Los Flores

3.3.1 Tectonic Framework:

Jennings (1985) has defined eight structural provinces within California that have been classified by predominant regional fault trends and similar fold structure (Figure 2). These provinces are in turn divided into blocks and sub-blocks that are defined by "major Quaternary faults". These blocks and sub-blocks exhibit similar structural features. Within this framework, the subject site can be classified as belonging to Structural Province I, Peninsular Range Block, Santa Ana Sub-Block.

Structural Province I is controlled by the dominant northwest trend of the San Andreas Fault and is divided into two blocks, the Coast Range Block and the Peninsular Range Block. The Peninsular Range Block, in which this site is located, is characterized by a series of parallel, northwest trending faults that exhibit right lateral dip-slip movement. These faults are terminated by the Transverse Range Block to the north and extend

southward to the Baja Peninsula. These northwest trending faults divide the Peninsular Range Block into eight sub-blocks. The Santa Ana Sub-block, one of the eight sub-blocks, is bound on the west by the Newport-Inglewood zone and on the east by the Elsinore/Whittier Fault zone. The subject site is located on the northeastern edge of the Santa Ana sub-block and lies approximately 19 miles northeasterly of the Newport-Inglewood fault zone and 2000 feet southwesterly of the Elsinore/Whittier fault zone.

3.3.2 Regionally Mapped Active Faults:

There are several large active fault systems in the region surrounding the subject site. These fault systems have been studied extensively and in a large part control the geologic structure of southern California. The prominent regional fault systems are the Whittier, Newport-Inglewood, Elsinore, San Jacinto, and San Andreas faults and Elysian Park seismic zone (Figure 4).

Whittier Fault System:

The Whittier fault system is located approximately 2000 feet northerly of the subject site. This fault is the main spur of the Elsinore fault system and extends northwesterly from Santa Ana Canyon through the Puente Hills to the Santa Monica Mountains. The Whittier fault system is a right lateral reverse fault that dips to the northeast.

Elysian Park Seismic Zone:

The Elysian Park Seismic Zone lies approximately 2 miles west to northwesterly of the project. The Elysian Park Seismic Zone is a part of the north Los Angeles Thrust Belt (Davis and Others, 1988; Hauksson, 1992 Bullard and Lettis, 1993). The belt is south-vergent and is marked

PROJECT NUMBER: 1-0250 DATE: 12-19-18

by blind (not reaching the earth's surface) thrust faults and associated anticlines which are expressed as the low hills that ring the north Los Angeles area.

Newport-Inglewood Fault System:

The Newport-Inglewood fault system is located approximately 19 miles southwesterly of the subject site. This fault system extends northwesterly from a point approximately 5 miles offshore of Laguna Beach to the Santa Monica Mountains. The Newport-Inglewood fault system is characterized by a series of en echelon (sub-parallel) faults. These faults exhibit considerable offset at depth with little or no evidence of surface displacement.

San Andreas Fault System:

The San Andreas fault system lies approximately 32 miles northeasterly of the subject site. In California, the San Andreas extends northwesterly from the Mexican border to Point Arena where it continues offshore before turning to the west in the vicinity of Cape Mendocino. The San Andreas is the major structural feature in California and defines a transform boundary between the Pacific and North American tectonic plates. Due to the length and complexity of this fault system, it has been divided into sections on the basis of general trend. The southern portion of the San Andreas, which extends from the Gulf of California to the Transverse Ranges, is closest to the subject site. Displacement along this section, as is characteristic of the entire length, is right lateral.

San Jacinto Fault System:

The San Jacinto Fault system lies approximately 47 miles easterly of the subject site. The San Jacinto is the major sub-member of the San Andreas

fault system and can be traced from a point northerly of the San Gabriel Mountains, where it branches out from the San Andreas, southerly to the Mexican border. The San Jacinto fault parallels the San Andreas fault over the majority of its length and, like the San Andreas, movement is primarily right lateral.

3.3.3 Site Geologic Structure:

The subject site is on the northeasterly limb of the La Habra Syncline. The La Habra Syncline is the dominant structural feature in the area of the Puente Hills in which the site is located. The La Habra Syncline is controlled by the Whittier fault zone with the northern limb exhibiting very steep to overturned bedding.

The subject site is located on this northern limb and bedding onsite generally strikes to the northwest and dips to the southwest at gentle to steep angles. In general, the dip angle of the bedding increases to the north.

Two northerly trending faults have been mapped on the northeast and southeast portions of the project. The fault on the northeast portion of the site separates the upper and lower members of the Fernando Formation. The fault on the southeast portion of the site was mapped by others and is concealed by alluvium in Carbon Canyon channel. No direct evidence for this fault was observed. Aerial photograph review of the site did not reveal any geomorphic lineaments, which would suggest holocene activity on these faults. There are no faults onsite identified within Alquist-Priolo Earthquake Fault Zones nor is there any evidence suggesting the onsite presence of active faults as defined by the State of California.

3.3.4 Groundwater:

Groundwater was encountered during PSE's subsurface investigation in Boring B-3 at 51 feet. This boring was excavated in alluvial soils within the old Carbon Canyon channel area.

3.4 Earthquake Hazards:

The subject site is located in southern California, which is a tectonically active area. The type and magnitude of seismic hazards affecting a site are dependent on the distance to the causative fault and the intensity and magnitude of the seismic event. The seismic hazard may be primary, such as surface rupture and/or ground shaking, or secondary, such as liquefaction and/or ground lurching and earthquake induced landsliding.

The State of California Seismic Hazards Zone Maps identify areas which may be subject to seismically induced landsliding and liquefaction. The Seismic Hazards Zone Map for the Yorba Linda Quadrangle has identified areas onsite which may be subject to seismically induced landslides and liquefaction. Discussed in Sections 3.4.2 and 3.4.5 below are this firm's evaluation of the site's liquefaction and seismically induced landsliding potential.

3.4.1 Seismicity:

Neither active nor potentially active faults are known to exist along or across the property. The probability of primary surface rupture or deformation at the site is, therefore, considered very low. Ground shaking hazards caused by earthquakes along active regional faults, however, do exist.

A mean random horizontal acceleration of 0.55g has been determined for the site, this acceleration hypothetically has a UBC – consistent 10 percent chance of being exceeded in 50 years (the equivalent of a 475

year average return period). Details are presented in Appendix C. A seismic coefficient of 0.15g is generally held to be appropriate for pseudostatic stability analyses in this seismic region.

3.4.2 Liquefaction:

Liquefaction is the phenomenon where the buildup of excess pore pressures, in saturated granular soils due to seismic agitation, results in a temporary "quick" or "liquefied" condition. Based on the limited subsurface investigation, liquefaction potential of the subject site is considered low due to the depth of the groundwater (51 feet) measured onsite. The State of California Seismic Hazards Zone Map for the Yorba Linda Quadrangle (Reference 12) has identified areas on the eastern portion of the project which may have a potential for liquefaction. Additional subsurface investigation will be required in the future to further evaluate liquefaction potential onsite.

3.4.3 Surface Rupture:

Surface rupture is a break in the ground surface during or as a consequence of seismic activity. The potential for surface rupture on this site is low due to the lack of active faults at the site.

3.4.4 Seiches:

A seiche is a free or standing-wave oscillation on the surface of water in an enclosed or semi-enclosed basin. The wave can be initiated by an earthquake and can vary in height from several centimeters to a few meters. The potential for a seiche impacting the property is considered very low.

3.4.5 Seismically Induced Landsliding:

The State of California Seismic Hazards Zone Map for The Yorba Linda quadrangle (Reference 11) has identified natural slopes onsite which may

be subject to seismically induced landsliding. Further subsurface investigation will be required to evaluate natural slopes onsite, however upon accomplishment of site grading in conformance with codes and the current industry standards, seismically induced landsliding should pose no danger to improvements on this project.

3.5 Mineral Deposits

Based on the information presented on Figure 5 and in the cited references (Appendix A), the following discusses The Brea Central Property with regard to its potential as a source for concrete grade aggregate deposits.

3.5.1 Aggregate

A review of CDMG Special Report 143 (Miller, 1981) places the Brea Central Property in Mineral Resource Zone (MRZ) 1 and 3 with respect to concrete-grade aggregate deposits (Figure 5). MRZ-1 is defined as: "Areas where adequate geologic information indicates that no significant construction aggregate deposits are present, or where it is judged that the likelihood exists for their presence". This zone is applied where well developed lines of reasoning, based on economic-geologic principals and adequate data, indicate that the likelihood for occurrence of significant mineral deposits is nil or slight. MRZ-3 is defined as "Areas containing construction aggregate deposits, the significance of which cannot be evaluated from available data". Further exploration work within these areas could result in the reclassification into other categories.

Neither category MRZ-1 not MRZ-3 are considered as an aggregate resource area.

STATE GEOLOGIST

4.0 GEOTECHNICAL ENVIRONMENTAL IMPACTS

Appendix G of the California Environmental Quality Act (CEQA) guidelines requires an evaluation of environmental conditions and the potential impacts of those conditions. That evaluation must classify the conditions as to whether there is "No Impact" or "Impact". If the condition "impacts" the site, then it needs to be classified as 1) "potentially significant"; 2) "less than significant with mitigation"; or 3) "less than significant".

The threshold for determining geotechnical impacts as outlined in Appendix G of the CEQA guidelines are described as follows:

Would the project:

a) *Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:*
   - i) *Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.*
   - ii) *Strong seismic ground shaking?*
   - iii) *Seismic-related ground failure, including liquefaction?*
   - iv) *Landslides?*

b) *Result in substantial soil erosion or the loss of topsoil?*

c) *Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?*

d) *Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?*

e) *Have soils incapable of adequately supporting the use of septic tanks or alternate waste water disposal systems where sewers are not available for the disposal of waste water?*

Presented in the following sections is our evaluation of the potential geotechnical impacts to the site based on the above classifications.

4.1 Fault and Seismic Hazards

4.1.1 Fault Rupture Potential

There are no State-imposed Alquist-Priolo Fault-Rupture Hazard Zones mapped onsite. Two northerly trending faults have been mapped on the northeast and southeast portions of the project. The fault on the northeast portion of the site separates the upper and lower members of the Fernando Formation. The fault on the southeast portion of the site was mapped by others and is concealed by alluvium in Carbon Canyon channel. No direct evidence for this fault was observed. Aerial photograph review of the site did not reveal any geomorphic lineaments, which would suggest holocene activity on these faults. Thus, the likelihood of surface fault rupture along this fault is considered remote.

Level of Impact

The level of impact due to Fault Rupture Potential is considered to be less than significant with mitigation.

Mitigation Measures

The likelihood of active faulting onsite is considered remote at this time. If, through further investigation, the faults identified onsite are determined to be active, the typical mitigation would involve establishing a fault setback zone. A habitable structure setback measuring 50 feet from each side of the fault trace (i.e. a 100-foot wide zone) will be established. This mitigation measure is consistent with the intent of the California Alquist-Priolo Earthquake Fault Zoning Act and local building codes. It is possible that faults could be discovered during site grading. Such faults will require investigation and assessment of activity levels and, if necessary, mitigation in the form of setbacks, structural design, and/or combinations of those alternatives.

4.1.2 Seismic Ground Shaking

Southern California, in general, is a seismically active region and the proposed improvements are likely to be subjected to significant ground motion during the design life of the project. The site has been identified as "D" site class in accordance with Table 20.3-1 of ASCE 7-10. Utilizing this information, the computer program USGS Seismic Design Maps Version 3.1.0 and ASCE 7-10 criterion, the spectral response accelerations that can be utilized for the project were calculated. An average PGA of 0.80g was computed for earthquake ground motions having 2% probability of exceedance in 50 years. Such is consistent with typical residential and commercial developments. More stringent standards are typically composed on institutional structures such as schools, hospitals, and fire facilities as well as bridges. Each such facility will require specific assessment when sitings are available.

Level of Impact

The level of impact due to seismic shaking is considered to be less than significant with mitigation.

Mitigation Measures

Seismic shaking can be mitigated through the design of the structures in compliance with prevailing seismic codes outlined in California Building Code (CBC). Remedial grading to further mitigate seismic hazards may also be required. Because estimates of potential ground shaking motion could vary across a large site, site specific refinement of ground motion estimates will be required as specific plans as available. Remedial grading could include:

- *The removal and replacement, with engineered fill, of loose and/or compressible soils; and*

- *The removal and recompaction of the cut and shallow fill portions of building lots that exhibit unfavorable geologic conditions. These lots will be identified as a part of future geotechnical grading plan reviews and during construction of the improvements based on exposed geologic conditions in the field.*

4.1.3 Liquefaction and Dynamic Settlement

Liquefaction is the phenomenon where the buildup of excess pore pressures, in saturated granular soils due to seismic agitation, results in a temporary "quick" or "liquefied" condition. Based on the limited subsurface investigation, liquefaction potential of the subject site is considered low due to the depth of the groundwater (51 feet) measured onsite. The State of California Seismic Hazards Zone Map for the Yorba Linda Quadrangle (State of California, 1980) has identified areas on the eastern portion of the project which may have a potential for liquefaction. Additional subsurface investigation will be required in the future to further evaluate liquefaction potential onsite.

Level of Impact

The level of impact due to liquefaction and dynamic settlement is considered to be less than significant with mitigation.

Mitigation Measures

Mitigation measures for liquefaction/dynamic settlement potential include removal and replacement with compacted, drained fills; ground modification; and/or designing for potential settlement of liquefiable materials. While this issue is of economic significance, it is not a technical constraint to development. Adherence to State policy regarding liquefaction analyses will be required during the design and construction process, but upon implementation, can suitably mitigate this hazard.

4.1.4 Earthquake Induced Landsliding

The State of California Seismic Hazards Zone Map for The Yorba Linda quadrangle (State of California, 1980) has identified natural slopes onsite which may be subject to seismically induced landsliding. Further subsurface investigation will be required to evaluate natural slopes onsite, however upon accomplishment of site grading in conformance with codes and the current industry standards, seismically induced landsliding should pose no danger to improvements on this project.

Level of Impact

The level of impact due to earthquake induced landsliding is considered to be less than significant with mitigation.

Mitigation Measures

Areas susceptible to earthquake-induced landsliding can be mitigated utilizing common earthwork remedial grading techniques such as construction of drained shear keys, replacement with manufactured buttress fills, slope laybacks, or structural setbacks.

4.1.5 Seiches and Tsunamis

Seiches are periodic oscillations within a large enclosed body of water. Any enclosed body of water such as an artificial lake, reservoir, or tank could be susceptible to seiche oscillations. A tsunami is a large oceanic wave generated from an earthquake or undersea landsliding.

Level of Impact

The elevation and distance inland of the development precludes inundation resulting from tsunamis, and therefore, has no impact on the project. The potential for a seiche impacting the property is considered very low.

Mitigation Measures

Mitigation is not anticipated to be necessary.

4.2 Rock Excavation Characteristics

The eastern portion of the site is underlain by the Puente Formation, which may require moderate to heavy ripping to excavate. Blasting is unlikely, but locally possible. All other geologic units mapped onsite should be readily excavatable with conventional earth moving equipment and will not require blasting during the course of rough grading.

Level of Impact

While unlikely, it is possible that blasting may be required for efficient excavation in the Puente Formation. The level of impact due to the blasting of hard rock is considered to be less than significant with mitigation.

Mitigation Measures

The impacts of the use of explosives include noise, vibration, and flying debris. Those impacts can be mitigated through the use experienced blasting contractors who would submit a blasting plan to the City of Brea for approval. Additionally, numerous small charges are typically used in the blasting process and overburden is typically left-in-place to improve the effects of the detonation. This process, combined with the remote location of areas that would require blasting, can significantly reduce the impacts of noise, vibration, and flying debris.

4.3 Soil Erosion/Mass Wasting

Soil erosion or mass wasting is the process in which earthen materials are transported down slope by gravity. Large scale mass wasting is not present onsite and is not anticipated to be a hazard to the project.

Level of Impact

Due to the relatively flat nature of the site in the western and southeastern portions of the site, and the proposed site improvements and grading in the northeastern portion of the site, soil erosion or mass wasting is deemed be less than significant with mitigation. Due to the lack of soil development on the property, the loss of topsoil is considered to be less than significant.

Mitigation Measures

Control of surface drainage and diversion of flows to non-erodible devices are the principle mitigation measures typically employed and can be accomplished with compliance with design standards outlined in the CBC. Mitigation of slope surface erosion of highly granular soils can be accomplished by establishing appropriate surface drainage patterns, judicious landscaping, and, when necessary, use of surface erosion control products such as "jute mesh" or "straw waddles" in compliance with erosion control standards outlined in the California Water Code.

4.4 Slope Stability

Cut, fill and natural slope stability can be affected by several factors including geologic structure, strength of materials, and height, inclination, and orientation of design slopes. Recognition of the inter-relationships of the various combinations of slope configuration, geologic structure, and material strength characteristics can reduce costs associated with remedial grading requirements and/or design restrictions.

4.4.1 Cut Slopes

Typically, cut slopes exposing fractured or faulted bedrock, alluvium, or colluvium are surficially and/or grossly unstable and will require remediation in the form of replacement (stabilization) fills. Cut slopes that are oriented in the same direction and are steeper than the exposed

bedding planes typically require replacement with engineered buttress fills or construction at flatter (layback) angles. Conversely, cut slopes oriented contrary to the bedding direction and made in competent, unfaulted, bedrock can be stable to considerable heights. Recognition of the presence of the various geologic units and structural features including faults, synclines, anticlines and regional bedding trends can be an effective planning tool.

The bedrock onsite strikes northwesterly and dips at low to moderate angles to the southwest. In general, southerly, southwesterly, and westerly facing cut slopes may require replacement with a buttress/stabilization fill section. The cut slopes exposing an out of slope (daylighted) bedding condition will require replacement with a designed buttress slope which will be supported on a keyway with a width of approximately 1.25 time the height of slope. Cut slopes exposing faulted, fractured bedrock conditions will likely require replacement with a stabilization fill section supported on a keyway with a width of approximately ½ times the height.

Level of Impact

The level of impact due to cut slope instability is considered to be less than significant with mitigation.

Mitigation Measures

Stability of proposed cut slopes will be of minor to moderate economic importance to the proposed development. Mitigation of unstable slopes may be required and will likely include overexcavation and replacement with either drained stabilization fill or buttress fills. Stabilization fills should be utilized when cut slopes expose loose or highly erosive soils or faulted and fractured bedrock. In the case where bedding dips in the

same direction and at shallower angles than the cut slope face, particularly where lower strength beds exist, engineering analysis will be required to adequately size keyways for buttress fills. Where grading limits are not constrained, cut slope instability can be mitigated by constructing slopes at flatter angles than the underlying geologic structure. All cut slopes will require evaluation during the design process as well as during construction.

4.4.2 Fill Slopes

Based on the engineering characteristics defined by previous laboratory testing, the onsite earth materials are generally considered suitable for use as compacted fill and, when properly constructed and maintained, can be expected to perform satisfactorily in code compliant embankments and fill slopes (typically 2:1 or flatter).

Level of Impact

The level of impact due to the design and construction of fill slopes is considered to be less than significant with mitigation.

Mitigation Measures

Fill slopes should be designed at a 2:1 (horizontal to vertical) or flatter ratios. Locally steeper fill slopes can be considered but should be constructed with geosynthetics to enhance the shear strength of fill materials. Higher compaction standards (typically 93 percent) of the laboratory maximum density) should be implemented in deeper fills (>50 feet) to enhance engineering characteristics and reduce the amount of potential settlement. Subsurface drainage devices should be installed below fills to intercept and direct water that may seep from the bedrock or be introduced from the surface.

4.4.3 Natural Slope Stability

The northeastern side of the site can be characterized as moderate to locally steep hillside terrain with eroded canyons. Natural slopes in these canyon areas vary in slope ratio from approximately 1:1 to 5:1 (horizontal to vertical). From a grading design standpoint, natural slopes pose similar geotechnical constraints as design cut slopes. Therefore, the stability of natural slopes is primarily a function of the underlying bedrock structure and the slope steepness. Natural slopes, which expose daylighted bedding, or are inclined at the approximate angle of bedding, may not satisfy normal factors of safety and may be considered grossly unstable. Daylighted natural slopes which either ascend or descend from proposed development will probably require remediation in the form of buttress fills or shear keys.

A steep natural slope exists on the northeasterly portion of the site. The bedrock in this region generally dips in a favorable direction, however due to the steep nature of the slope, some form of structural setback will likely be required to protect structures from surficial slope stability issues. The structure setback will likely be in the form of a California Building Code (CBC) consistent, height of slope divided by three (H/3), not to exceed 40 feet. Future grading concepts should be developed such that natural slopes oriented in unfavorable directions are minimized.

Level of Impact

The level of impact due to natural slope stability is considered less than significant with mitigation.

Mitigation Measures

Where adverse bedding, faulted, or fractured bedrock, highly erosive soils, or other similar conditions exist on natural slopes in proximity to planned development, mitigation of the potential hazard will be required. Mitigation techniques may include structural setbacks, removal and replacement, or fill buttressing. Support of adverse bedding can be achieved by construction of drained buttress fills or elimination of adverse bedding by slope layback.

4.5 Compressible/Collapsible Soils

Based upon the data obtained from the previous subsurface investigation and laboratory testing, weathered older alluvium and terrace deposits, highly weathered bedrock, colluvium, alluvium, undocumented artificial fill, and the landslide debris are likely to be compressible.

The colluvium, alluvium, as well as portions of the older alluvium and terrace deposits are subject to hydro-collapse based on the laboratory test results presented in Appendix C. Hydro-collapse is the process in which loose dry soils undergo rapid consolidation (collapse) when wetted. Unmitigated, the presence of compressible and collapsible soils below fills and where exposed in cuts can produce significant settlements that can be manifested differentially on engineered structures.

Level of Impact

The level of impact due to collapsible soils is considered to be less than significant with mitigation.

Mitigation Measures

Typically, compressible and collapsible soils can be mitigated using a combination of overexcavation of the susceptible soils and recompaction as engineered fills. These techniques may be used in conjunction with enhanced foundation design.

Based upon Alta's review of the laboratory test data, the colluvium, portions of the alluvium, portions of the older alluvium and terrace deposits, and weathered bedrock will require removal and recompaction prior to fill placement and where exposed in cuts. The use of post-tension or mat slab foundations will likely be required for structures founded over alluvium. All undocumented fills will also require removal and recompaction.

4.6 Expansive Soils

The expansion potential of the vast majority of soils that will be encountered onsite during grading will likely range from "very low" to "high". Expansive soils can increase in volume upon the introduction of water and decrease in volume (shrink) upon drying. These volume changes can produce stresses on engineered structures than can result in cosmetic distress and even structural damage.

Level of Impact

The level of impact due to expansive soils is considered to be less than significant with mitigation.

Mitigation Measures

The presence of expansive soils is commonly and effectively mitigated by various techniques including: 1) proper design of foundations, slabs, streets, and other improvements subject to the influence of the soils; 2) overexcavation of the expansive soils/bedrock and replacement with less expansive fill soils; 3) utilizing selective grading techniques to place more highly expansive soils well below foundation elements; 4) employment of presaturation techniques to lessen expansion potential; 5) control of surface and subsurface drainages to prevent moisture variations; and 6) combinations of these various techniques.

4.7 Percolation Characteristics of Site Soils

Current development plans for the site call for a sanitary sewage system to handle waste. At this time no septic systems are planned for the site.

Level of Impact

Currently septic systems are not planned for this site, therefore the percolation characteristics of the site soils are deemed to have "No Impact" on the site development.

4.8 Corrosion

The presence of soluble sulfates in soils can be detrimental to concrete. Low resistivity and high chloride soils can have a detrimental effect on metals.

Level of Impact

The level of impact due to corrosive soils is considered to be less than significant with mitigation.

Mitigations Measures

Concrete mix designs shall be in compliance with the recommendations presented in ACI 318-14 for sulfate concentrations. During future design studies, consultation with a Corrosion Engineer can be considered in order to mitigate the potential corrosive effects on metal portions of structures and should be accomplished in compliance with CBC. Final mitigations should be based on testing of as-graded soil conditions.

5.0 FUTURE GEOTECHNICAL ANALYSIS

Prior to approval of each grading plan, a geotechnical report shall be prepared by a licensed Engineering Geologist and Geotechnical Engineer and submitted to the City for review and approval. This report shall be prepared in accordance with city standards and shall evaluate the proposed development in relation to site soils and geologic conditions. Recommendations shall be provided to specifically identify and mitigate any hazards related to faulting and seismicity, collapsible soils, expansive soils, settlement from grading operations, corrosion, and slope stability.

TABLE A-1

LOG OF TEST PITS

T-1	Depth	Description
	0-3 ½ '	COLLUVIUM (Qcol): SANDY CLAY, dark reddish brown, slightly moist, firm to stiff, rootlets.
	3 ½-7''	FERNANDO FORMATION-Upper Member (Tfu): SANDSTONE, medium to coarse grained, moist, hard, massive common pebbles, upper 3' weathered, caliche.
		Total Depth 7'

T-2	Depth	Description
	0-2'	COLLUVIUM (Qcol): SANDY CLAY, brown, moist, firm, roots and rootlets, pin voids, caliche.
	2-5'	TERRACE DEPOSITS (Qt): SANDY to CLAYEY SILT, reddish brown, slightly moist to moist, firm to stiff, blocky, minor caliche and black organic staining on ped faces upper 2'.
		Total Depth 5'

T-3	Depth	Description
	0-3'	FERNANDO FORMATION-Upper Member (Tfu): SANDSTONE, coarse grained, reddish to yellow brown, moist, hard, friable, massive, rounded pebble clasts, cobbles.
		Total Depth 3'

T-4	Depth	Description
	0-4'	COLLUVIUM (Qcol): CLAYEY SILT/SILTY CLAY, brown, slightly moist, soft, roots, voids.
	4-12'	OLDER ALLUVIUM (Qoa): SILTY CLAY, with sand, dark red brown, slightly moist to moist, firm to stiff, pin voids, some hair roots, clay film on ped faces, occasional pebbles.
		@ 10' becomes stiff, decrease in size and volume of pin voids, some still present.
		Total Depth 12'

TABLE A-1

LOG OF TEST PITS

T-5	Depth	Description
	0-1'	ARTIFICIAL FILL (Qaf): SANDY SILT, brown, slightly moist, soft, oily, tar.
	1-6'	TERRACE DEPOSITS (Qt): SILT, dark red brown, slightly moist to moist, firm to stiff, some pin voids, clay film on ped faces, some sand, upper 3' weathered.
		Total Depth 6'

T-6	Depth	Description
	0-2'	COLLUVIUM (Qcol): SANDY CLAY, dark brown, moist, soft to firm, voids.
	2-11'	OLDER ALLUVIUM (Qoa): SANDY SILT/CLAY, yellow to red brown, moist, firm to stiff, pin voids, some caliche, pebbles.
		Total Depth 11'

T-7	Depth	Description
	0-4'	COLLUVIUM (Qcol): SANDY CLAY, brown, moist, soft, roots and voids, some pebbles.
		@2' SANDY SILT, brown, moist, firm, pin voids.
	4-7'	OLDER ALLUMIUM (Qoa): SANDY SILT, dark red brown, moist, firm to stiff, pin voids, pebbles.
	7-10'	FERNANDO FORMATION –Upper Member (Tfu): SILTSTONE, tan, moist, moderately hard to hard, upper 2' weathered, iron oxide stained.
		Total Depth 10'

T-8	Depth	Description
	0-1 ½'	COLLUVIUM (Qcol): SILTY SAND, brown, dry, loose, roots.
	1 ½-3'	FERNANDO FORMATION-Upper Member (Tfu): PEBBLE CONGLOMERATE, yellow to red brown, slightly moist, very hard, massive, moderately well cemented, rounded clasts, medium grained silty matrix.
		Total Depth 3'

TABLE A-1

LOG OF TEST PITS

T-9	Depth	Description
	0-5'	COLLUMIUM (Qcol): SANDY SILT, brown, slightly moist to moist, soft, roots.
	5-8'	FERNANDO FORMATION-Upper Member (Tfu): SANDSTONE, fine to medium grained, light reddish yellow, slightly moist, hard to very hard, moderately well cemented, platy, upper 2' weathered.
		Total Depth 8'

T-10	Depth	Description
	0-4'	COLLUMIUM (Qcol): SANDY CLAY, reddish brown, moist, firm, pebbles, 2-3' cut by roadway, some roots.
	4-6'	FERNANDO FORMATION-Upper Member (Tfu): SANDSTONE, fine grained, yellow, slightly moist, hard to very hard, massive, upper 1-1 ½' weathered.
		Total Depth 6'

T-11	Depth	Description
	0-6'	COLLUVIUM (Qcol): SANDY CLAY, brown, moist, soft to firm, roots, voids, some cobbles, becomes reddish brown @ 3', common cobbles and pebbles 3-6'.
	6-8'	FERNANDO FORMATION-Lower Member (Tfl): SILTSTONE, yellow, moist, hard, upper 1' weathered.

T-12	Depth	Description
	0-7'	COLLUVIUM (Qcol): SANDY CLAY, brown, slightly moist, roots, voids, some pebbles, becomes reddish brown @ 5'.
	7-8 ½'	FERNANDO FORMATION-Upper Member (Tfu): PEBBLE to COBBLE CONGLOMERATE, brown, slightly moist, hard, massive, rounded clasts, silty coarse sand matrix, weathered.
		Total Depth 8 ½'

TABLE A-1

LOG OF TEST PITS

T-13	Depth	Description
	0-7'	COLLUVIUM (Qcol): SILTY CLAY, brown, moist, soft to firm, voids, roots, some sand.
	7-8 ½'	FERNANDO FORMATION-Lower Member (Tfl): SILTSTONE, yellow, moist, hard, upper 1' weathered.
		Total Depth 8 ½'

T-14	Depth	Description
	1-7'	ALLUVIUM (Qal): SILTY SAND, tan brown, moist, loose, some pebbles.
	7-11'	CLAYEY SILT, brown, moist, soft.
	11-13'	SILTY SAND, light brown, moist, loose.
		Total Depth 13'

T-15	Depth	Description
	0-4'	COLLUVIUM (Qcol): SILTY CLAY with sand, brown, slightly moist to moist, soft to firm, voids, hair roots.
	4-7'	OLDER ALLUVIUM (Qoa): SILTY to SANDY CLAY, reddish brown, slightly moist, firm to stiff, pin voids.
	7-9'+	CLAYEY SAND, yellowish brown, moist, dense.
		Total Depth 9'

T-16	Depth	Description
	0-3'	COLLUVIUM (Qcol): SANDY CLAY, brown, slightly moist, soft, pin voids, rootlets.
	3-10'	OLDER ALLUVIUM (Qoa): SANDY CLAY, reddish brown, moist, firm to stiff, pin voids, clay film on ped faces.
		@ 7' decrease in voids.
		Total Depth 10'

T-17	Depth	Description
	0-4'	COLLUVIUM (Qcol): SANDY CLAY, brown, firm, voids.
	4-10 ½'+	OLDER ALLUVIUM (Qoa): SILTY SAND, yellow brown, moist, medium dense.
		Total Depth 10 ½' (5-6' removals)

T-18	Depth	Description
	0-9'	ALLUVIUM (Qal): SILTY SAND, yellow, moist, loose to medium dense, minor caliche stringers.
		Total Depth 9'

T-19	Depth	Description
	0-1'	ARTIFICIAL FILL (Qaf): SILTY to CLAYEY SAND, brown, slightly moist, loose, oil, rootlets.
	1-5'	COLLUVIUM (Qcol): SILTY CLAY, dark brown, slightly moist to moist, firm, common voids.
	5-10'	TERRACE DEPOSITS (Qt): SILTY CLAY, moist, firm to stiff, black organic stained, slightly petroliferous odor.

T-20	Depth	Description
	0-6'	COLLUVIUM (Qcol): SANDY SILT, brown, moist, firm, roots.
	6-11'+	TERRACE DEPOSITS (Qt): SILT with some sand, yellowish tan, moist, firm, weathered with abundant caliche and voids top 3'.
		Total Depth 11'

T-21	Depth	Description
	0-3'	COLLUVIUM (Qcol): SANDY CLAY, dark brown, moist, firm to stiff, roots, voids.
	3-6 ½'	TERRACE DEPOSITS (Qt): SANDY SILT, brown, moist, stiff, upper 2' weathered with abundant caliche, voids.
		Total Depth 6 ½'

APPENDIX C

Laboratory Analysis

(PSE, 1999)

APPENDIX C

LABORATORY ANALYSES

The results of laboratory testing performed during PSE's investigation are enclosed within this Appendix. Table C-1 presents a summary of laboratory test results.

Moisture and In-place Density

The filed moisture content and in-situ dry density were established on relatively undisturbed ring samples obtained from the borings. The moisture content was obtained in accordance with ASTM Test Method: D-2216. The in-situ dry density was computed using the net weight of the entire sample. The results of these tests are presented on the boring logs, Plates A-1 through A-9.

Classification

Soils were classified with respect to the Unified Soil Classification System (USCS) in accordance with ASTM D-2487 and D-2488.

Consolidation Tests

Consolidation tests were performed on ten relatively undisturbed soil samples in accordance with procedures outlined in ASTM D-2435. Samples were placed in a consolidometer and loads were applied incrementally in geometric progression. The sample (2.42 and 2.5-inches in diameter and 1-inch in height) was permitted to consolidate under each load increment until the slope of the characteristic linear secondary compression portion of the thickness versus log of time plot was apparent.

The percent consolidation for each load cycle was recorded as the ratio of the amount of vertical compression to the original 1-inch height. Hydroconsolidation (collapse) and expansion characteristics were also evaluated by monitoring the change in volume with saturation while the specimen was confined under constant normal stress. The consolidation test results are shown on Plates B-1 through B-10.

Direct Shear Tests

Direct shear tests were performed on two remolded samples that were saturated under a surcharge equal to the applied normal force during testing. The apparatus used is in conformance with the requirements outlined in ASTM Test Method: D-3080. The test specimens, 2.42 and 2.5-inches in diameter and 1-inch in height, were subjected to simple shear along a plane at mid-height.

The samples were sheared under various normal loads, a different specimen being used for each normal load. A strain 0.050-inches per minute was used to evaluate shear strength values.

The specimens were sheared until the shear stress reached a constant value or until the sample deformation had reached approximately 10 percent of the original diameter.

The shear stress values obtained from the tests were plotted versus applied normal pressures. The best-fitting straight lines were drawn through the plotted points to obtain the shear strength envelopes. The cohesion and angle of internal friction of the soil materials were evaluated from the shear strength envelopes. The direct shear test results are shown on Plates B-11 and B-12.

Maximum Density/Optimum Moisture

The maximum dry density and optimum moisture content of selected representative bulk samples were evaluated in accordance with ASTM D 1557-91/Method A. The results of this test are summarized in Table B-1.

Particle Size Analysis

Modified hydrometer portion ASTM D2422-72 were conducted to aid in classification of the soils. The results of the particle size analysis are presented in Table B-1.

Expansion Index Tests

One expansion index tests was performed to evaluate the expansion potential of typical-on-site soils. Testing was carried out according to UBC. Method 18-2. The results are presented in Table B-1.

Subject: ***Third-Party Review of Alta report dated December 19, 2018 and Site Reconnaissance Visit, Proposed Brea 265 Residential Development, City of Brea, California***

Introduction

In accordance with your request, LGC Geotechnical, Inc. has prepared this third-party review of the referenced Environmental Impact Report (EIR) - level geotechnical report for the proposed approximately 265-acre Brea site located in the approximate vicinity of the intersections of E. Lambert Road and Valencia Avenue to N. Rose Drive and Blake Road, within the City of Brea, California. As part of our review, we conducted a site reconnaissance visit on January 29, 2019 and attended a tour conducted by site owners Aera Energy.

Project Overview

The proposed project site is currently an active oil field with areas of agricultural uses. The large site spans low relief open valley areas to the west, an east-central area of hillsides with significant relief, and an area of low rolling hills graduating to open valley areas to the south. The adjacent Carbon Canyon Regional Park and flood control dam abut the eastern boundary of the site.

The proposed residential development is in the early phases of design and no grading plan is available at this time. Based on the Concept Land Use Plan (AERA, 2018), the development will consist of approximately 1,100 homes. Remedial grading measures for previous surrounding developments were reportedly extended onto the subject site in order to limit future impacts to those developments during grading of the subject site. Based on verbal communications with representatives of Aera Energy, we understand the eastern edge of the hillside portion of the site development is intended to remain natural and the development set back from the steep hills where the site abuts the flood control reservoir sidewalls.

The presence of existing oil field equipment, pumps, and miles of pipelines across the site need to be considered; however, the environmental issues associated with the site are not a part of the EIR level geotechnical report (Alta, 2018), and generally not a part of this review. The report is also noted to present only a 'limited' geotechnical investigation at this time, and significant additional subsurface exploration is proposed once the project is further along in the development process.

131 Calle Iglesia, Suite 200, San Clemente, CA 92672 (949) 369-6141 www.lgcgeotechnical.com

Geologic conditions include a hillside area with relatively consistent south/southwest-dipping bedding within a portion of the La Habra syncline. Fernando Formation Upper and Lower is called out along with Puente Formation at the northeastern corner of site. A queried fault that trends north-south as depicted on the northern hillside portion of the site, appears necessary to justify the interpreted contacts between Upper and Lower members of the Fernando Formation contact. Although the Whittier Fault is located as close as 2,000 feet from the site, the queried on-site fault is not considered active. The lower elevations and areas of less topographic relief are broadly mapped as young and old alluvium, terrace deposits, and artificial fill.

Third Party Review of Reference Report dated December 19, 2018

Comment No. 1 - Review of the Geotechnical Map in comparison to the underlying topography appears to indicate some shift has occurred in the consultants' geologic contact mapping. Based on geologic contact lines such as the limits of artificial fill for the Carbon Canyon Dam, limits of alluvium, and potential location of a landslide, it appears some of the contacts have been shifted up to approximately 100 feet in plan view. The geologic contacts should be reviewed and shifted to the correct locations as necessary.

Comment No. 2 – The reference report is applicable for EIR level. As indicated by the consultant, additional subsurface exploration and site evaluation will be performed and at a minimum should include:

- Large-diameter borings should be excavated and downhole logged as part of hillside evolution.
- Infiltration testing and feasibility should be performed.
- A detailed liquefaction analysis should be performed.
- Evaluation of the edge conditions as they relate to existing improvements including roadways, structures, the flood control reservoir, etc., should be performed.

Closure

Please note: This letter is based on our review of the referenced report and limited site visit only.

Our proposed services were performed to the general standard of care of geotechnical consulting in Southern California; no other warranty is expressed or implied. This geotechnical third-party review report has been prepared for the sole use of Placeworks, its subsidiaries and affiliates may be relied upon by any of same.

The opportunity of submitting this third-party review is sincerely appreciated. Should you have any questions, please do not hesitate to contact this office.

Sincerely,

LGC Geotechnical, Inc.

1.0 SUMMARY

This report presents the results of a Phase I Environmental Site Assessment (ESA) performed by Northgate Environmental Management, Inc. (Northgate) for Aera Energy LLC (Aera) at the "Brea 265 Property" located along Valencia Avenue at the intersections of Lambert Road, Carbon Canyon Road, and Rose Drive in Brea, California (the Site). The Site is approximately 265 acres of land developed with an active oil production field, a plant nursery, and a tree farm. The Site consists of nine parcels identified as Assessor's Parcel Numbers (APNs) 320-073-07 and -09, and 322-031-01, -12, -13, -14, -19, -21, and -24 in Orange County. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

For the purpose of this report, the Site has been divided into two separate properties for ease of geographic reference in describing historic Site operations, specific locations of potential environmental concerns, and current Site conditions. The designated Site properties are shown on Figure 2. The properties are designated as:

- The "100-Acre Lease Property" consists of two parcels located west of Valencia Avenue. The two rectangular parcels are separated by Lambert Road. The parcel located north of Lambert Road is identified as 2601 Valencia Avenue and is currently developed with an active oil production field and a nursery (Greenland Nursery). The parcel located south of Lambert Road is identified as 2501-2811 Valencia Avenue and is currently developed with an active oil production field and an organic food growing company (Future Foods Farms) which utilizes a portion of the property for agricultural purposes. Oil field operations at this portion of the Site began in the 1920s, with agricultural use initiated in the 1930s. Current and historic Site features of the 100-Acre Lease Property are shown on Figure 3.
- The "165-Acre Lease Property" consists of seven contiguous parcels located east of the 100-Acre Lease Property. The property is located east of Valencia Avenue, south of Carbon Canyon Road, northeast of Rose Drive, and north of Blake Road. The northern portion of the property is currently developed as an active oil production field. The southern portion of the property, totaling approximately 43 acres, is currently occupied by a seasonal pine tree farm (Peltzer Pine Choose and Cut). Oil field operations at this portion of the Site began in 1927 with agricultural use, including orchards and tree farms, initiated in the 1950s. A "sump" area was historically present in the southern portion of the property that was reportedly utilized for oil field drainage and waste storage prior to being filled in the 1960s. Sumps are identified at the Site as unlined areas historically utilized for the storage of waste oil and oil field related waste liquids. After the sump was filled, Rose Drive was constructed across this area. Current and historic Site features of the 165-Acre Lease Property are shown on Figure 4.

Our review indicates that the Site has historically been developed and primarily operated as an oil field since the 1920s, with some agricultural uses since the 1930s. Operations at the oil fields have historically included underground storage tanks (UST) and aboveground storage tanks (ASTs) for the storage and containment of gasoline, diesel, crude oil, and other process hydrocarbons. The 100-Acre Lease Property and the northern and central portions of the 165-Acre Lease Property are still developed as operating oil fields that include 104 oil wells, a dehydration unit, a vapor recovery system, a production unit and tank farm, and a carbon filtration area. Petroleum and steam pipelines are also present throughout the Site as both aboveground and belowground features. Oil sumps were not observed during our reconnaissance but have historically been utilized across the Site for the oil field operations. Sumps are identified at the Site as unlined areas historically utilized for the storage of waste oil and oil field related waste liquids. Approximate former sump locations are shown on Figures 3 and 4 in blue for sumps identified from historic aerial photographs and in purple for sumps identified from a 1992 report prepared for the Site.

Portions of the Site are listed on a number of regulatory databases including the Leaking Underground Storage Tank (LUST), UST, Historic UST, Underground Injection Control (UIC), Emergency Response Notification System (ERNS), and Hazardous Waste Information System (HAZNET) regulatory databases under listings for Shell Service Station and Shell Western Oil. The UST database indicates that three USTs were formerly present at the 100-Acre Lease portion of the Site, including a 555-gallon gasoline UST, a 555-gallon diesel UST, and a 1,000-gallon gasoline UST. The LUST database indicates that soil was impacted by a release of diesel fuel, additives, and gasoline from one or more of the USTs at the Site. The facility received regulatory closure from the Orange County Health Care Agency (OCHCA) in August of 1991, although no impacted soil was removed, and no remediation occurred in connection with the release(s).

The Site is also listed on the UIC database related to the presence of both active and plugged underground injection wells associated with oil field waste-water disposal and other oil field operations. The Site is listed on the HAZNET database related to the storage, bulking, and transfer off-Site of approximately seven tons of unlisted product in 2012 from a Southern California Edison electrical transformer area located on the northwestern portion of the 165-Acre Lease Property.

A Phase I ESA prepared for a portion of the Site on July 20, 1992 identified potential concerns associated with the removal of two diesel USTs from the 100-Acre Lease Property. One UST was reported to have been removed in 1989. One investigative boring advanced to a depth of 190 feet below ground surface (bgs) encountered benzene up to three parts per million (ppm) in a soil collected from a depth of 90 feet bgs. Groundwater was not encountered in the boring. The apparent release received regulatory closure from the OCHCA in 1991, although no remedial actions were performed. A second diesel UST was removed in December 1990 and no evidence of a release was reported. The location of this second removed UST was not identified. The Phase I ESA also reported additional potential environmental concerns including historic oil field operations, petroleum hydrocarbon staining, possible methane and hydrogen sulfide gas in the areas around process area holding tanks and historic oil sumps. The report concluded that facilities and oil wells would require proper abandonment prior to development of the Site and recommended that a Phase II ESA be conducted.

The properties to the north of the Site, including the Olinda Alpha Landfill located further to the north, have historically been developed as oil fields. Some industrial development has been present to the south of the Site, including a current electric substation owned and operated by Southern California Edison. The remaining portions of the Site vicinity have historically been utilized as agricultural land prior to development for residential uses during the 1980s and 1990s. No hazardous materials releases have been documented in the immediate Site vicinity that appear to represent a potential threat to soil, groundwater, or soil vapor quality at the subject Site.

In summary, Northgate has performed a Phase I ESA of the Brea 265 Property located on Valencia Avenue at the intersections with Lambert Road, Carbon Canyon Road and Rose Drive in Brea, California in conformance with the scope and limitations of ASTM Practice E 1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312). Any exceptions to, or deletions from, these practices are described in Section 2.3 of this report. Our review did not identify the presence of Recognized Environmental Conditions (RECs) in connection with the property, except for the following:

- The Site has been developed as an operating oil field since the 1920s. Some oil wells are still operational and various levels of ponded oil and staining were observed at each well, primarily in the vicinity of the well box. The historic and current operations of the oil field, including the oil wells, tank farms, and pipelines, represent a potential threat to soil, groundwater, and/or soil vapor quality at the subject Site. It should be noted that the California Division of Oil Gas and Geothermal Resources generally prohibits construction of residences directly over active or sealed and abandoned oil or gas wells.

- Multiple historic oil sumps, including a large former, unlined oil sump located in the southwestern portion of the 165-Acre Lease Property that has since been filled in and developed to include Rose Road, were present across both properties of the subject Site. These historic sumps represent a potential threat to soil, groundwater, and/or soil vapor quality at the Site.
- Given that the Site is a defined oil/gas field, the Site will be subject to the guidelines and requirements set forth in the Orange County Fire Authority's (OCFA's) *Combustible Soil Gas Hazard Mitigation* document that outlines the guidance for the investigation, remediation, and/or mitigation of potentially hazardous concentrations of combustible soil gases associated with the construction and occupancy of a building located on or within the vicinity of an oil/gas field and the OCFA specified areas.
- Petroleum and natural gas pipelines are present throughout portions of both the 100-Acre Lease and 165-Acre Lease Properties. Petroleum hydrocarbon, or other hazardous materials releases may have occurred along the pipelines

Northgate's review also identified the following Historic REC (HREC) at the Site:

- The 100-Acre Lease portion of the Site has a documented release from a leaking diesel UST that impacted soil to depths of 90 feet bgs. The facility received regulatory closure from the OCHCA on August 20, 1991. However, no remedial action was performed, and petroleum hydrocarbons remain in soil at the Site.

Our review also identified the following potential environmental concerns:

- A drainage channel traverses the 100-Acre Lease Property from north to south that is reported to originate from the Olinda Alpha Landfill to the north and potentially contain runoff from that upgradient facility. Runoff from a landfill facility could contain contaminants that could potentially impact future development of the Site.
- Given the historic use of the Site for agricultural purposes, there is a possibility that pesticides and herbicides may be present in shallow soil in some areas of the Site.
- Test results from indoor air samples collected within the local zip code area indicate that radon may constitute a potential environmental concern at the Site.
- Injection wells are present at the Site and are subject to many new regulations. Further review of specific requirements for closing out the existing injection wells may be required prior to development of the Site.

Northgate recommends that a Phase II ESA be conducted to evaluate the existing soil, groundwater, and soil vapor conditions at the Site related to these RECs and issues of potential environmental concern. The investigation should include strategic test pits and trenching as well as near surface and shallow soil testing and drilling of deep soil borings. The Phase II ESA results should be used to develop remedial cost scenarios to further understand the potential impacts associated with redevelopment of the Site.

2.0 INTRODUCTION

This report presents the results of a Phase I ESA performed by Northgate at the Brea 265 Property located in Brea, California. The Site is located to the east and west of Valencia Avenue at the intersection of Lambert Road, Carbon Canyon Dam, and Rose Drive. The Site consists of approximately 265 acres of land developed with active oil production and processing facilities and agricultural operations including a nursery, an organic food growing company, and a seasonal tree farm. The Site is identified as APNs 320-073-07 and -09, and 322-031-01, -12, -13, -14, -19, -21, and -24 in Orange County. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

2.1 Purpose

The purpose of Phase I ESA has been to identify and evaluate the presence of RECs at the Site, and to satisfy the All Appropriate Inquiry standard codified in 40 CFR Part 312. The term "RECs" as defined in ASTM *Standard Practice for Environmental Assessment: Phase I Environmental Site Assessment Process* (Designation: E 1527–13) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimus* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 Scope of Services

Northgate has performed the ESA in general conformance with the scope and limitations of ASTM E-1527-13, *Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and 40 CFR Part 312, *Standards and Practices for All Appropriate Inquiry – Final Rule*. This investigation was performed by Nicky Galloway, Project Engineer with oversight and review by Derrick Willis, Northgate Principal. Quality Assurance and quality control was conducted by Dennis Laduzinsky, Northgate Principal in charge of property transactions and brownfields redevelopment. The scope of work for the investigation included the following services:

- Review of readily available information regarding the history of the Site, including historic aerial photographs, maps, previous reports, and other information, and discussions with individuals familiar with the Site;
- Review of environmental lien documents obtained for the Site;

- A reconnaissance of the Site and near vicinity;
- Discussions with regulatory officials and review of regulatory agency publications and files, as applicable;
- Evaluation of RECs, development of conclusions and scope of work to evaluate potential on-Site contamination concerns; and
- Preparation of this report.

2.3 Limitations and Exceptions

2.3.1 Limitations

The purpose of an environmental assessment is to reasonably evaluate the potential for, or actual impact of, past practices on a given site area. In performing an environmental assessment, it is understood that a balance must be struck between a reasonable inquiry into the environmental issues and an exhaustive analysis of each conceivable issue of potential concern. No investigation is thorough enough to absolutely rule out the presence of hazardous materials at a given site. If hazardous conditions have not been identified during the assessment, such a finding should not be construed as a guarantee of the absence of such materials on the Site, but rather as the result of the services performed within the scope, limitations, and cost of the work performed.

Environmental conditions may exist at the Site that cannot be identified by visual observation. Where subsurface work was performed, our professional opinions are based in part on interpretation of data from discrete sampling locations that may not represent actual conditions at un-sampled locations.

Except where there is express concern of our client, or where specific environmental contaminants have been previously reported by others, naturally occurring toxic substances, potential environmental contaminants inside buildings, or contaminant concentrations that are not of current environmental concern may not be reflected in this document.

Where the scope of services is limited to interview and/or review of readily available reports and literature, any conclusions and/or recommendations are necessarily based largely on information supplied by others, the accuracy or sufficiency of which may not be independently reviewed by Northgate.

Any opinions and/or recommendations presented apply to Site conditions existing at the time of performance of services. We are unable to report on, or accurately predict, generally

unforeseeable events that may impact the Site following performance of services, whether occurring naturally or caused by external forces. Therefore, we cannot assume responsibility for such events or their impact. We also cannot assume responsibility for changes in environmental standards, practices, or regulations.

2.3.2 Exceptions

The time intervals between some historical information sources may exceed five years due to the unavailability of such records. However, in our opinion, this data gap does not significantly impact our ability to evaluate historic land use conditions at the Site given the availability of other sources for this information.

At the time this report was prepared, no response to Northgate's request to review files had been received from the OCHCA, Environmental Division. This constitutes a data gap as defined in the ASTM Standard which could potentially impact our ability to evaluate environmental conditions at the Site. Northgate will issue an addendum to this report upon receipt of the files if information in the files changes the conclusions or recommendations provided in this report. There were no other limiting conditions.

2.4 User Reliance

This report has been prepared for the exclusive use of Aera and their subsidiaries, affiliates, partner, partnerships, and lenders in evaluating environmental conditions at the Site. Others may not rely on the information contained in this report without the express written consent of Northgate.

3.0 SITE DESCRIPTION

3.1 Site Location and Legal Description

The Site is consists of 265 acres of land covering nine non-contiguous parcels located on the east and west sides of Valencia Avenue at the intersections with Lambert Road, Carbon Canyon Road, and Rose Drive in Brea, California, identified as the Brea 265 Property. For the purpose of this report, the Brea 265 Property has been divided into two separate properties for ease of geographic reference in describing historic Site operations, specific locations of potential environmental concerns, and current Site conditions. An overall Site Vicinity Map is shown on Figure 1 and a Site Plan with the property designations is shown on Figure 2. The properties are defined as follows:

- The 100-Acre Lease Property - The 100-Acre Lease Property consists of two parcels totaling 100 acres located west of Valencia Avenue. The property is split into northern and southern sections by Lambert Road. The area north of Lambert road includes APN 320-073-07 which is identified as 2601 Valencia Avenue. The area south of Lambert road includes APN 320-073-29 which is identified as 2501-2811 Valencia Avenue. This property is developed with an active oil production field and agricultural operations including a nursery and an organic food growing business.
- The 165-Acre Lease Property - The 165-Acre Lease Property consists of seven contiguous parcels located east of Valencia Avenue, south of Carbon Canyon Road, north of Blake Road, and northeast of Rose Drive. It includes APNs 322-031-01, -12, -13, -14, -19, -21, and -24. There are no street addresses associated with the 165-Acre Lease Property.

3.2 Site Vicinity General Characteristics

The Site consists of approximately 265 acres of land developed with active oil fields and oil production facilities, and agricultural related businesses. The Site is located in an area of mixed residential and industrial development, including oil production operations.

3.3 Geology and Groundwater

3.3.1 Geology

The Site is located in the Peninsular Range geomorphic province, and within the Los Angeles physiographic basin. It is near the southern flank of the Puente Hills, which form the northeastern border of the Los Angeles Basin locally. The Puente Hills are part of the Puente Block, an elevated fault block located between the Whittier fault zone to the south and Chino

fault zone to the east and north. The Whittier fault zone is a right-lateral strike-slip fault with some reverse slip located approximately 2,500 feet northeast of the Site. Movement along the Whittier fault zone is Holocene in age (10,000 years ago to the present), and largely responsible for the uplift of the Puente Hills (SCEC, 2003).

The Puente Hills are underlain by an assemblage of approximately 16,000 feet of Cenozoic rocks overlying a Mesozoic basement of granitoid plutonic rocks that contain foliated greenshist. Exposed bedrock near the Site consists of marine clastic sedimentary rocks of the Upper Miocene Puente Formation that was laid down over thin Cretaceous age igneous basement (Yerkes, 1965).

The Puente Formation is composed of fine-grained turbidite, flysch, and ash deposits high in organic material. The high heat flow emanating through the thin basement complex facilitated conversion of the organics to petroleum. The fine-grained source sediments underwent diagenesis and cementation to become the relatively impermeable bedrock exposed in the core of the Puente Hills today. The Puente Formation is overlain by the lower and upper members of the Pliocene Age Fernando Formation.

The Fernando Formation is a marine mudstone, siltstone, and sandstone. Rocks exposed near the Site consist of marine clastic rocks of the Sycamore Canyon Member, the uppermost member of the Fernando Formation (Yerkes, 1972). The partial section of the Sycamore Canyon Member exposed south of the Whittier fault zone consists of thick-bedded, coarse-grained to pebbly sandstone that contains two zones of hard limy concretions.

Subsidence and deposition continued in the Los Angeles Basin through Pliocene times, with the margin of the basin exposed in the Puente Hills. At the end of the early Pleistocene, the marine shoreline was near the Puente Hills, and alluvial fans and terrace deposits accumulated in the area. In the Site vicinity semi-consolidated poorly sorted earthy and clayey gravel, sand, and silt were deposited in marine terraces and non-marine alluvial fans during the Late Pleistocene, and erosion of those deposits produced Quaternary to recent alluvium that blanket the lowlands.

Soils exposed at the Site are mapped as Quaternary marine terrace deposits. Localized areas of the Site contain lenses of fill placed for oil field roadways and drill pads (Morton 1981 and 2004).

3.3.2 Groundwater

The Site is located on the northern edge of the Coastal Plain of Orange County, a sub-unit of the Central Plain of the Orange County Groundwater Basin. The Orange County Groundwater Basin

is a northwest-trending elliptical syncline filled with alluvium. The syncline is bounded by the Puente Hills and Whittier Fault to the northeast, the Santa Ana Mountains and San Joaquin Hills to the southeast, and the Newport-Inglewood Fault to the southwest.

The Site is located within the Forebay area of the Orange County Groundwater Basin, in the Yorba Linda subbasin. The Yorba Linda subbasin has very little groundwater pumping due to the high total dissolved solids concentrations and low transmissivity (Warne, 1961). Groundwater from the subbasin flows southward into the main groundwater basin since the limited groundwater production is less than the natural replenishment from the Chino Hills.

The topography of the Site is gently sloping with drainage flowing primarily to the south in various natural drainages that eventually run to storm drains, channels, or seasonal streams. Near the ground surface, groundwater generally exists in zones beneath the arroyo drainages, or as discontinuous perched water zones in the sediments.

According to the Orange County Water District groundwater elevation contours in the Principal Aquifer zones map (June 2014), the principal aquifer zone is presently at approximately 280 feet bgs in the Site vicinity (Woodside, 2015). The principal aquifer zone is where most of the groundwater production occurs in the Site vicinity. At a corrective actions site located approximately one mile southeast of the Site, in March of 2006 the average depth to groundwater beneath the former Arco service station site was approximately 88 feet below ground surface, and the groundwater flow direction was to the southwest at a gradient of 0.02 feet per feet (DEC, 2006).

3.4 Current Use of the Property

The Site is primarily developed as an active oil production field. Portions of the Site are utilized for agricultural operations including a nursery, an organic food growing business, and a seasonal tree farm. The remainder of the Site is occupied by dirt roads and vacant land.

3.5 Description of Structures, Roads, Sewage, and Potable Water Sources

The Site is currently developed with approximately 104 oil wells, some of which are still operational, three oil field injection wells, a vapor recovery system, a dehydration unit, a production unit with a tank farm, and associated pipelines and manifolds. Several temporary greenhouse structures are present on the 100-Acre Lease Property for the agricultural operations. All roads throughout the Site are unpaved dirt roads. No water or sewage connections are present at the facility.

3.6 Current Uses of Adjoining Properties

The Site is bordered to the north, northwest, and northeast by mixed use residential development constructed in the 1990s and 2000s on land formerly occupied by active oil field operations. The Olinda Alpha landfill is located approximately 0.60-miles north of the Site. To the east, the Site is bordered by land associated with the Carbon Canyon Dam flood control area and the Carbon Canyon Regional Park. A school, a sports park, and an electrical substation followed by East Birch Street then industrial businesses are located to the south of the 100-Acre Lease Property. Rose Drive and Blake Road followed by residential development border the 165-Acre Lease Property to the south. The Site is bordered to the west by residential development constructed in the 1980s, which was formerly utilized for agricultural purposes and oil fields.

4.0 USER PROVIDED INFORMATION

4.1 Environmental Liens or Activity and Use Limitations

Two Preliminary Title Reports for the property, prepared for Aera Energy by First American Title Insurance Company dated March 14, 2002 and November 24, 2008, were provided for Northgate's review. These documents indicate the presence of numerous easements, agreements, rights of way, leases and licenses primarily related to oil field operations such pipelines, oil transport, construction, utilities and maintenance. However, no specific environmental liens related to current or historic environmental conditions or other related use limitations are included in the Exclusions sections of the reports. The property is not listed on the LEINs or LIENS2 regulatory databases. Copies of the title reports are provided in Appendix A.

Northgate was not provided with any information indicating that the property value of the Site has been reduced due to environmental issues.

4.2 Specialized Knowledge

Mr. Rich Knowland of Brook Street completed a questionnaire regarding Brooks Street's general knowledge of the Site. Mr. Knowland has been associated with the Site for approximately five months. He is not aware of any cleanup liens against the Site; however, he is aware that the Site has land and activity use limitations as a result of the active oil field operations. Mr. Knowland noted that he is aware of residual oil sumps, seeps, and chemical use at the Site as a result of the current and historic oil field operations. He is not aware of any cleanup activities, chemicals stored at the Site, or litigation relevant to hazardous substances at the Site. Mr. Knowland indicated that he is not aware of any assessment reports for the Site, except for reports regarding hydrogeologic conditions that were provided to Northgate for review. A copy of the questionnaire is provided in Appendix B.

4.3 Reason for Performing the Phase I ESA

The Phase I ESA was conducted to provide information on the environmental conditions of the property in support of the preparation of an environmental impact report and Site development.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

To determine if the Site has documented environmental concerns, or if other sites with documented environmental concerns exist within the search radii of the Site prescribed by ASTM 1527-13 and *All Appropriate Inquiry*, Northgate reviewed a summary of regulatory agency databases prepared by Environmental Data Resources, Inc. (EDR). In addition, where appropriate, we reviewed local regulatory agency files for additional specific information regarding sites identified in the EDR report judged to be of possible concern to the subject Site. The EDR report presenting a summary of the agency databases reviewed and a map showing the location of the identified sites is provided as Appendix C (EDR, 2017a). The results of the database search and follow-up agency file review are summarized below.

Copies of information obtained from the agency file reviews for the Site are included in Appendix D. A Current and Historic Site Features Map for the 100-Acre Lease Property is shown on Figure 3 and a Current and Historic Site Features Map for the 165-Acre Lease Property is shown on Figure 4.

5.1.1 Site

The Site is listed on the LUST, UST, Historic UST, UIC, ERNS, and HAZNET regulatory databases. The LUST, UST, Historic UST, and ERNS database listings are associated with the 100-Acre Lease Property at 2701 Valencia Avenue, and historic operators Shell Service Station and Shell Western Oil. Available information indicates that three USTs were formerly present on the 100-Acre Lease Property, including a 555-gallon gasoline UST, a 555-gallon diesel UST, and a 1,000-gallon gasoline UST. The LUST database refers to soil at the Site was impacted by the release of diesel fuel, additives, and gasoline from one or more of the USTs. A previous Phase I ESA prepared for the Site (GeoSoils, 1992) indicated that soil was locally impacted beneath the tanks by benzene at depths up to 90 feet bgs. No soil excavation or other remediation was performed in connection with the release. The case received regulatory closure from the OCHCA in 1991 as contamination was explored, characterized, and left in-place as an OCHA-approved no-action alternative.

The Site is also listed on the UIC database related to the presence of both plugged and active/inactive injection wells associated with oil field waste water disposal and other oil field operations.

The Site is also listed on the HAZNET database related to the storage, bulking, and off-Site transfer of approximately seven tons of unlisted product in 2012. This listing is identified at 2843 Valencia Avenue and refers to the Southern California Edison transformers located on the northwester portion of the 165-Acre Lease Property.

The EDR database report in Appendix C includes a WMUDS/SWAT database listing for "Landfill Condensate" associated with the Olinda Alpha Landfill, located at the intersection of Valencia and Carbon Canyon Road. It should be noted that the WMUDs database tracks a variety of waste inventory management unit information; it is not presently clear whether this listing refers to waste removed from that Site or wastes that have been disposed of at that Site. Our discussion with an Orange County Waste and Recycling department representative indicated that there are no Olinda Alpha landfill operations at that location. The representative suggested that the intersection may be a connection point for a landfill condensate discharge line with the main sanitary sewer. No further information was available.

5.1.2 Off-Site Sources

The regulatory agency database search prepared by EDR indicates the presence of 81 agency-listed sites located within an approximate one-mile radius of the Site. The EDR database report containing a list of the agency databases searched is attached in Appendix C. Facilities with documented releases impacting groundwater located within 0.25 mile upgradient and/or cross-gradient of the Site, or otherwise judged to be of potential impact to soil, soil vapor, or groundwater quality at the Site, are summarized in the table on the following pages.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
Carbon Canyon Rd. Widening Project - Valencia Avenue and Carbon Canyon Road, Brea	ENVIROSTOR	Adjacent to the north (upgradient) of the Site	This facility was listed on the Envirostor database as of 2001 as referred to a local agency. No additional information was available. Given the apparent purpose of this project for road widening and the lack of documented impacts, this facility does not appear to represent a potential threat to soil, soil vapor, and/or groundwater quality at the subject Site.
Santa Fe Energy Company - 17001 Carbon Canyon Road, Brea	LUST, RCRA SQG, Hist. UST, SWEEPS,UST, CA FID UST, UST, EMI, Hist. CORTESSE, and ENVIROSTOR	Approximately 25 feet north and east (upgradient) of the Site	This facility was identified as an oil field property and a LUST facility with a reported release of gasoline impacting soil. A closure letter from 1996 indicated that soil excavation and removal was conducted to remediate the impacts prior to receiving regulatory closure. No additional information was available for this facility. This property was partially redeveloped in the late 1990s as a large residential complex. Given the regulatory closure of the facility and the current residential development, there is no direct evidence that this facility appears to represent a potential threat to soil, groundwater, and/or soil vapor quality at the subject Site, but little information is available.
Olinda Ranch Elementary School – 17001 East Carbon Canyon Road, Brea	ENVIROSTOR, and SCH	Approximately 25 feet north and east (upgradient) of the Site	This facility was listed on the Envirostor database as part of an oil field property that historically consisted of sumps, containment areas, wells, and pipelines. A Phase I and Phase II report was prepared for this facility in 1995. A Remedial Action Plan was prepared under the oversight of the OCHCA in 1999. After Department of Toxic Substances Control (DTSC) reviewed the facility information and recommended preparation of a Preliminary Endangerment Assessment in 2000, the decision was made not to proceed with the development of this project and no further investigations were conducted. Given that this project was not developed, and this area is known to have received regulatory closure and then subsequently redeveloped as a residential development, as described above, this facility does not appear to represent a potential threat to soil, groundwater, and/or soil vapor quality at the subject Site.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
3678 Pheasant Lane, Brea	Hist. Cleaners	Approximately 215 feet north and east (upgradient) of the Site	This facility is listed as an EDR historic dry-cleaning facility for the year 2008. No other regulatory listings are included for this location. Based on the regulatory information reviewed, it appears unlikely that dry cleaning was performed at this location. Therefore, this facility does not appear to represent a potential threat to soil, groundwater, and/or soil vapor quality at the subject Site.
Columbia Sterns Middle School – Lambert Road and Valencia Avenue, Brea	ENVIROSTOR, and SCH	Adjacent to the east (up to cross-gradient) of the 100 Acre Lease portion of the Site	This facility is listed on the Envirostor database as a former oil field property that would have required DTSC oversight. No reports were on file with the exception of an agreement with DTSC to investigate the property. The facility has been listed as inactive since 2002. No other information was provided. Given that the land use of this facility is the same as the subject Site and unlikely to impact the Site more than historic Site operations, this facility does not appear to represent a significant threat to soil, groundwater, and/or soil vapor quality at the subject Site.
Tonner Hills Apartment Homes/Tonner Hills SSP - Lambert Road and Valencia Avenue, Brea	NPDES UIC	Adjacent to the north and northwest (upgradient) 100-Acre Lease portion of the Site.	This facility was identified on the NPDES database in 2008 related to the construction of an apartment portion of an existing subdivision. The facility was listed on the UIC database for an undated report of a plugged flood well that appears to be related to the construction of the apartments. No other information was provided. Based on the information available and the current residential development at the facility, it does not appear to represent a threat to soil, groundwater, and/or soil vapor quality at the subject Site.
Carbon Canyon Regional Park - 4422 Carbon Canyon Road, Brea	Historic UST and HAZNET	Adjacent to the east (up to cross-gradient) of the 165-Acre Lease portion of the Site	This facility was identified on the Historic UST database for a 1,000-gallon UST containing fuel that was installed in 1977. Orange County was listed as the owner of the UST in 1988. The facility was also listed on the HAZNET database for a hazardous waste manifest of asbestos containing material. No additional information was available for this listing. Based on the information available and the current development at the facility, it does not appear to represent a threat to soil, groundwater, and/or soil vapor quality at the subject Site.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
Beckman Data Center - 3300 East Birch Street, Brea	UST, CA FID UST, LUST, SWEEPS UST, Hist. UST, and NPDES	Approximately 1,000 feet south (downgradient) of the Site	The facility was listed on the UST databases for two active 12,000-gallon diesel fuel USTs installed in 1980. During UST removal activities in 1985, soil impacted with diesel were encountered. The LUST listing received regulatory closure from the OCHCA in 1990 after soil excavation activities were completed. The NPDES database listing refers to construction activities in 2015. No other information was available for the facility. Given the downgradient location and the regulatory closure status of the facility, it does not appear to represent a threat to soil, groundwater, and/or soil vapor quality at the subject Site.
Brea-Olinda Sanitary Landfill	EMI	Approximately 0.50-miles north-northeast (upgradient) of the Site	This facility was identified on the EMI database for air quality releases of organic gases. No other information was provided. Given the upgradient location of this facility and the drainage path traversing north to south through the Site that is reported to have runoff from the landfill, this facility may present a potential threat to soil, groundwater, and soil vapor quality at the subject Site.

5.2 Additional Environmental Record Sources

Northgate contacted local regulatory agencies for information regarding the use or storage of hazardous materials at the Site, and reviewed files at any agency maintaining a file for the subject Site. The following agencies were contacted for information regarding the use or storage of hazardous materials at the Site:

- DTSC EnviroStor Website;
- State Water Resources Control Board (SWRCB) GeoTracker Website;
- National Pipeline Mapping System (NPMS);
- OCHCA, Environmental Health;
- Brea Fire Department;
- Orange County Fire Authority; and
- California Division of Oil, Gas, and Geothermal Resources (DOGGR).

The results of our review are described in the following sections.

5.2.1 DTSC EnviroStor Website

The Site was not listed on the EnviroStor website.

5.2.2 SWRCB GeoTracker Website

The Site was listed on the GeoTracker website for releases from gasoline and diesel USTs impacting soil at the Site. The listing identifies Shell Western Oil Products as the responsible party for the release referenced at 2701 Valencia Avenue. The release was reported in 1988 and received regulatory closure from the Orange County Local Oversight Program and the Regional Water Quality Control Board on August 20, 1991. No further information was available, and no reports or documents were available for review.

5.2.3 National Pipeline Mapping System (NPMS)

Northgate reviewed the NPMS on-line mapping system for the subject Site. Three active pipelines were identified to abut or traverse the Site. The first pipeline is owned and operated by Exxon-Mobil and is listed to contain gasoline. The pipeline originates at the intersection of Valencia Avenue and Lambert Road and extends to the west along or beneath Lambert Road. A second gasoline transmission pipeline owned and operated by Exxon-Mobil begins at the same intersection and extends to the east along or beneath Carbon Canyon Road before turning south at the eastern boundary of the Site and continuing south to the southeastern corner of the Site near Blake Road and Rose Drive. The third pipeline is owned and operated by Southern California Edison and is listed to contain natural gas. The pipeline is listed on or abutting the

Site and traverses the southern tip of the Site at Rose Drive. No accidents or incidents are identified for the pipelines at the Site or in the vicinity of the Site. The presence of these pipelines represents a potential environmental threat to the soil, groundwater, and/or soil vapor quality at the subject Site.

5.2.4 OCHCA, Environmental Health

Northgate submitted a file review request to the OCHCA. However, at the time this report was prepared, no response had been received. Upon receipt, if the review of the files changes the conclusions and recommendations provided, Northgate will issue an addendum to this report.

5.2.5 Brea Fire Department

Northgate submitted a request to the City of Brea, Fire Department using electronic mail. The agency referred Northgate to the OCHCA for records regarding the use, storage, or release of hazardous materials at the Site.

5.2.6 California Division of Oil, Gas, and Geothermal Resources

Information available on the California DOGGR web site indicates that over 100 active, closed, and abandoned oil and gas wells are located on the Site. Additional wells are located to the north, south, and west of the Site.

According to the EDR GeoCheck® - Physical Setting Source Addendum, located in the Radius report (Appendix C), over a hundred oil and gas wells are located on the Site and 745 others are located within 1-mile of the Site; generally to the north of the Site.

5.3 Other Environmental Issues

Northgate performed a reconnaissance-level evaluation of other environmental issues, as outlined in Section 13.1.5 of ASTM E1527-13.

5.3.1 Floodplain Maps

Northgate viewed an online version of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Maps #06059C0061J and #06059C0062J each with effective date of December 3, 2009. According to the FIRM, the majority of the Site is located in Flood Zone X – areas determined to be outside the 0.2% chance floodplain with the exception of a narrow channel identified as Carbon Canyon Channel that traverses the southern tip of the property. This channel is listed as Zone A with a 1% annual chance flood discharge contained in channel.

5.3.2 Radon

The California Department of Health Services (DHS) online list of indoor radon levels indicates that two samples, radon concentrations from five indoor air samples collected in zip code area 92823 were greater than 4.0 pico-curies per liter (pCi/L) (DHS, 2010). No data was included for the portion of the Site with the zip code of 92821. According to the EDR Radius Report (Appendix C), the federal Environmental Protection Agency (EPA) radon zone for Orange County is Zone 3 (indoor average level less than or equal to 4 pCi/L).

The State of California Division of Drinking Water and Environmental Management maintains a database of radon test results indicating that out of 30 samples collected in Orange County, all of the reported sample results in the living area-first floor were less than 4 pCi/L. The DHS and the EPA recommend that some form of mitigation be conducted for houses with indoor radon concentrations of 4 pCi/L or greater.

These results indicate that radon gas may constitute a potential environmental concern at the Site.

5.4 Land Use History

Information on historical land use at the Sites and adjacent area was evaluated by reviewing historic aerial photographs, maps, and other documents. A summary of our investigation findings is presented below.

5.4.1 Aerial Photographs

Northgate reviewed historic aerial photographs of the Sites from 1938, 1946, 1952, 1963, 1972, 1977, 1989, 1995, 2005, 2009, 2010, and 2012 obtained from EDR (EDR, 2017b). Copies of the aerial photographs are provided in Appendix E. A summary of our aerial photograph review is presented below.

Year: 1938	**Scale:** 1" = 1,000'	**Source:** USDA

Site Description:

100-Acre Lease Property: This property is shown as primarily developed as an oil field with multiple oil wells and dirt roads. An oil processing area is present in the central portion of the property with three sumps in the area. An additional sump is shown to the south of the oil processing area and two additional sumps are present in the southwestern corner of the property. Multiple structures are present on the northern portion of this property.

165-Acre Lease Property: This property is shown as primarily vacant land with several oil wells in the northern portion of the property. Multiple sumps are present throughout the central and southern portions of this property. A large pond or "sump" is located across the southwestern boundary of the property. A road is present in the northwestern portion of the property.

Vicinity: The area located north of the Site is shown as operating oil fields. Agricultural and vacant land is present to the east, south, and west of the Site.

Year: 1946	**Scale:** 1" = 1,000'	**Source:** USGS

Site Description:

100-Acre Lease Property: This property appears similar to the 1938 photograph except that the oil processing area is no longer present in the central portion of the property and a small orchard is now present to the west of this area. Sumps are still present in the southern portion of this property.

165-Acre Lease Property: The northern and portions of the property is shown as an operating oil field with multiple oil wells and dirt roads throughout the area. The southern portion of the Site is shown as vacant land. The pond/sump located across the southwestern boundary of the property has reduced in size.

Vicinity: The vicinity appears similar to the 1938 photograph except that oil field operations to the north of the Site appear to have expanded. Valencia Avenue is now present between the two properties.

Year: 1952	**Scale:** 1" = 1,000'	**Source:** USDA

Site Description:

100-Acre Lease Property: This property appears similar to the 1946 photograph.

165-Acre Lease Property: This property appears similar to the 1946 photograph.

Vicinity: The vicinity appears similar to the 1946 photograph.

Year: 1963	**Scale:** 1" = 1,000'	**Source:** USGS

Site Description:

100-Acre Lease Property: This property appears similar to the 1946 photograph except that a nursery is now shown on the northwestern portion of this property.

165-Acre Lease Property: This property appears similar to the 1946 photograph.

Vicinity: The vicinity appears similar to the 1946 photograph except that the Carbon Canyon Road is now partially completed to the east of the Site and the Carbon Canyon Dam is under construction east of the road. The pond/sump across the southwestern boundary of the 165-Acre Lease Property is no longer present and Rose Road is under construction in this area.

Year: 1972	**Scale:** 1" = 1,000'	**Source:** USGS

Site Description:

100-Acre Lease Property: This property appears similar to the 1963 photograph except that the nursery in the northwestern portion of this property has expanded and includes orchards areas. A tank farm is now shown in the central area of the southern portion of this property in the location of the dehydration unit. Sumps are present to the east of this area.

165-Acre Lease Property: This property appears similar to the 1963 photograph except that a tree farm is now shown in the southern portion of this property.

Vicinity: The vicinity appears similar to the 1963 photograph except that residential development has expanded in the vicinity of the Site.

Year: 1977	**Scale:** 1" = 1,000'	**Source:** Brewster

Site Description:

100-Acre Lease Property: This property appears similar to the 1972 photograph.

165-Acre Lease Property: This property appears similar to the 1972 photograph except that agricultural areas in the western portion of this property have expanded.

Vicinity: The vicinity appears similar to the 1972 photograph except that Carbon Canyon Road has been fully constructed and extends from Valencia Avenue to the east along the northern boundary of the 165-Acre Lease Property.

Year: 1989	**Scale:** 1" = 1,000'	**Source:** USDA

Site Description:

100-Acre Lease Property: This property appears similar to the 1977 photograph.

165-Acre Lease Property: This property appears similar to the 1977 photograph except that agricultural operations in the southern portion of the 165-Acre Lease Property have expanded.

Vicinity: The vicinity appears similar to the 1977 photograph except that Lambert Road has been constructed through the 100-Acre Lease Property and connects to Carbon Canyon Road at Valencia Avenue. Extensive residential development is now shown to the west. Industrial development has expanded to the south of the 165-Acre Lease Property along Birch Street.

Year: 1995	**Scale:** 1" = 500'	**Source:** USGS

Site Description:

100-Acre Lease Property: This property appears similar to the 1989 photograph.

165-Acre Lease Property: This property appears similar to the 1989 photograph.

Vicinity: The vicinity appears similar to the 1989 photograph.

Year: 2005	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: 100-Acre Lease Property: This property appears similar to the 1995 photograph. 165-Acre Lease Property: This property appears similar to the 1995 photograph except that the agricultural operations appear to have reduced. Vicinity: The oil fields located to the north of the Site have been redeveloped as a large residential neighborhood. A substation is under construction to the south of the 100-Acre Lease Property.		

Year: 2009 & 2010	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: 100-Acre Lease Property: This property appears similar to the 2005 photograph except that a nursery is now present in the portion of the property located north of Lambert Road. The former plants and nursery located south of Lambert Road have reduced and this area is primarily shown as vacant land. 165-Acre Lease Property: This property appears similar to the 2005 photograph. Vicinity: The vicinity appears similar to the 2005 photograph except that sports fields are now present to the south of the 100-Acre Lease property. Industrial and residential development has expanded to the south and southeast of the Site.		

Year: 2012	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: 100-Acre Lease Property: This property appears similar to the 2010 photograph. 165-Acre Lease Property: This property appears similar to the 2010 photograph. Vicinity: The vicinity appears similar to the 2010 photograph except that a residential development is now shown to the north of the 100-Acre Lease Property beyond the nursery operations. The property to the southwest of the Site is shown as vacant graded land with no evidence of ponds or standing water.		

The aerial photographs show that both the 100- and 165-Acre Lease properties were developed as oil fields as early as 1938. The oil field operations included visible sumps areas observed on both properties. Sumps are identified at the Site as unlined areas historically utilized for the storage of waste oil and oil field related waste liquids. An oil processing area is shown in 1938 on the 100-Acre Lease Property that was not shown after 1946. The dehydration unit is shown in

1972 in the central portion of the 100-Acre Lease Property. The southern portion of the 165-Acre Lease Property has historically been shown as vacant and/or agricultural land.

5.4.2 Sanborn Maps

EDR has indicated that Sanborn map coverage is not available for the Site.

5.4.3 Topographic Maps

Northgate reviewed historic topographic maps for the Site obtained from EDR for the years 1896, 1898, 1901, 1902, 1925, 1928, 1935, 1942, 1949, 1950, 1964, 1972, 1981, and 2012. Copies of the topographic maps are provided in Appendix F (EDR, 2017c). Information from the topographic maps is summarized below.

Quadrangle: Anaheim		**Scale:** 1:62,500	**Series:** 15 Minute
1896-1901:	The Site is shown as vacant land. No roads or development are present through the Site or in the vicinity. A stream traverses the northeast corner of the Site. Placentia is mapped to the southwest of the Site and Olinda is mapped to the northeast of the Site. A railroad is shown to the southeast and through the northeastern corner of the Site in 1901. A road is mapped through the central portion of the Site in 1901.		
Quadrangle: Corona		**Scale:** 1:125,000	**Series:** 30 Minute
1902:	The Site and vicinity appear similar to the 1901 map.		
Quadrangle: La Brea		**Scale:** 1:24,000	**Series:** 7.5 Minute
1925-1928:	The Site and vicinity are unmapped at this time.		
Quadrangle: Olinda		**Scale:** 1:31,680	**Series:** 7.5 Minute
1935:	The northern portion of the 100-Acre Lease Property is improved with multiple structures including a row of buildings along a roadway. A smaller sump is present in the central portion of the 165-Acre Lease Property and a large pond or sump is mapped in the southwestern portion of the property and extends off-Site to the southwest. A creek traverses the southeastern corner of the 165-Acre Lease Property. Olinda Boulevard is mapped to the south of the 100-Acre Lease Property and a road in the location of the present day Valencia Avenue is now present. The Pacific Railroad is mapped to the southwest of the Site and a reservoir is mapped farther southwest.		

Quadrangle: Anaheim	**Scale:** 1:50,000 **Series:** 15 Minute
1942:	The 100-Acre Lease Property is shown as fully developed with oil wells and several roads. The northwestern portion of the 165-Acre Lease Property is also developed with oil wells. A stream is present through the central portion of this property traversing from north to south and another creek traverse the southeastern corner of the Site. The remainder of the property is shown as vacant land. Oil wells are mapped to the north of the Site. Agricultural orchards are mapped to the southwest of the 100-Acre Lease Property. Oil wells are mapped farther south of the Site beyond the railroad line. Two schools are mapped to the east of the Site.
Quadrangle: Yorba Linda	**Scale:** 1:24,000 **Series:** 7.5 Minute
1949-1950:	The Site and vicinity appear similar to the 1942 map except that the pond or sump in the southwestern portion of the 165-Acre Lease Property is now labeled as an oil sump. The oil fields to the north of the Site are now identified as the Olinda Oil Field.
1964	The Site and vicinity appear similar to 1950 except that Rose Road is now present along the southwestern perimeter of the 165-Acre Lease Property. Orchards are now mapped on the central portion of the 100-Acre Lease Property and on the southern portion of the 165-Acre Lease Property. Industrial development is now shown to the south of the Site.
1972:	The Site and vicinity appear similar to the 1964 map except the Carbon Canyon Dam with a spillway, gauging station, and aqueduct are mapped immediately east of the Site.
1981:	The Site appears similar to the 1972 map except that Lambert Road is now shown to connect to Carbon Canyon Road through the northern portion of the Site at Valencia Avenue. Large residential and industrial developments are now mapped further to the west and south of the Site.
2012:	The Site and vicinity are shown mapped without any marked characteristics. Carbon Canyon Creek is shown as a wet area to the east of the Site. Residential development is now mapped immediately to the north and west of the Site. The vicinity is shown as urban development.

The Site is shown as vacant land prior to the 1930s, at which time it was shown developed as oil fields that included several oil sump areas across both the 100- and 165-Acre Lease Properties. Agricultural use is identified at the Site starting in the 1930s. A stream channel is shown through the central portion of the 100-Acre Lease Property starting in the 1930s. The Site use remains relatively unchanged to the present.

5.4.4 City Directories

Northgate reviewed a summary of local city directory listings for the Site and vicinity (specifically Valencia Avenue), available at approximate five year intervals from 1972 to 2013, obtained from EDR. A copy of the EDR city directory search is provided in Appendix G

(EDR, 2016d). Limited address listings were available for the Site and vicinity. The Site was only identified in the directory as 2601 Valencia Avenue. Getty Oil and "Babylon AP" were listed in 1972. Bergen Nursery was listed between 1975 and 2013. Crestmont Oil and Gas was listed at the Site between 1975 and 1985. Imperial landscaping was identified in 1975 and L&J Backhoe Services was listed in 1985. Professional Growers, Inc., an apparent food growing company, was listed in 2003 and Olinda nursery was identified at the Site in 2008. No other listings were identified; however, the Site was known to be developed and occupied since the 1920s as an oil well field initially under the ownership and operation of Shell Oil Company. Listings adjacent to the Site and in the vicinity include individuals, nurseries, horse farm, oil companies, trucking and office listings.

5.5 Interviews

During the Site reconnaissance Northgate interviewed Mr. Michael Klancher of Aera who has been associated with the Site for many years. Mr. Klancher indicated that the Site has historically been occupied by oil field operations initially under the ownership and operation of Shell Oil Company, but now operated by Linn Operating Company. Mr. Klancher indicated that the Site is developed with a number of operating and idle oil wells, some injection wells, a dehydration unit, a vapor recovery system, and a production unit with a tank farm. He also reported that the drainage channel present in the central portion of the 100-Acre Lease Property has been observed to flow with liquid, even during non-rain events, that reportedly appears to be originating from the off-Site and upgradient Olinda Alpha Landfill. Mr. Klancher provided Northgate with copies of maps and reports available for the Site as discussed in Section 5.6 below.

5.6 Previous Reports

Northgate reviewed a prior Phase I ESA report covering a portion of the Site prepared by GeoSoils, Inc. (GeoSoils) on behalf of the Site owner and operator, Shell Western E&P, Inc., dated July 20, 1992. The report did not include the 100-Acre Lease Property and included a strip of land to the north of the 165-Acre Lease Property across Carbon Canyon Road that is not part of the subject Site for this ESA. The GeoSoils report identified issues associated with the oil field use on the 165-Acre Lease Property that included petroleum hydrocarbon staining, possible methane and hydrogen sulfide gas in the area around the holding tanks, and historic oil sumps. The report concluded that the Site facilities and oil wells would require abandonment prior to development and recommended that a Phase II ESA be conducted to characterize the nature and extent of potential contamination.

The GeoSoils report also identified the removal of two diesel USTs on the 100-Acre Lease Property at the northwestern corner of Valencia and Lambert Road. A release incident was reported for one of these USTs in 1989 and soils were reported to have been impacted to a depth of about 90 feet bgs. One boring advanced at the Site encountered benzene at a concentration of 3 ppm in soil samples collected at 90 feet bgs. The boring was advanced to 190 feet bgs and groundwater was not encountered. No cleanup actions were reported, and the incident received regulatory closure from the OCHCA on August 20, 1991. The second UST was removed in 1990 and a removal report dated December 10, 1990 indicated that no evidence of a release was reported during removal and testing activities.

6.0 SITE RECONNAISSANCE

Current Site conditions were observed during a reconnaissance of the Site and near vicinity by Ms. Nicky Galloway of Northgate on February 16 and 21, 2017. Site photographs from the reconnaissance are attached at the end of this report. Site features observed during the reconnaissance as well as historic Site features are depicted on Figures 3 and 4.

6.1 Methodology and Limiting Conditions

The Site reconnaissance was performed by traversing the Site by motorized vehicle and on foot and the vicinity by motorized vehicle. There were no limiting conditions.

6.2 General Site and Vicinity Conditions

6.2.1 Site

The Site is located along Valencia Avenue at the intersections of Lambert Road, Carbon Canyon Road, and Rose Drive. The Site is developed with an active oil production field, a nursery, and a tree farm. The Site has been divided into two separate properties for ease of geographic reference in describing historic Site operations as summarized in the sections below. The designated Site properties are shown on Figure 2. A summary of the historic Site operations divided by parcel, including a description of the major features, the number of historic oil wells, and a list of observations associated with each feature is provided in Table 1.

The 100-Acre Lease Property

The 100-Acre Lease Property consists of two parcels totaling 100 acres of land located west of Valencia Avenue. The property is split into northern and southern sections by Lambert Road. The northern portion of the property is a dirt-covered lot that developed with 15 oil wells dispersed throughout the area. The eastern portion of the northern lot is occupied by a nursery that includes field plants and greenhouse operations. A drainage channel traverses the center of the lot from north to south with a drainage pipe extending beneath Lambert Road to connect to the continuation of the drainage channel through the southern portion of this property. The drainage channel is reported to originate at the upgradient Olinda Alpha Landfill. A fenced enclosure is present in the central portion of the northern lot with apparent storage structures located within the enclosure. A trailer and concrete pad from an apparent former structure are present to the west of this enclosure. An abandoned process tank labeled to formerly contain crude oil was present near these structures.

The southern portion of the 100-Acre Lease Property is a dirt covered lot that is primarily developed with oil field operations. Twenty-five oil wells are present throughout this area in a nearly grid-like pattern. Staining and oil build up was observed at many of the well heads. Significant staining of the soil surface around the well was observed at oil well 126, located along the eastern perimeter of the Site. One injection well is located in the southwestern corner of the property. The drainage channel from the northern lot continues through the central portion of the property and extends from the northern perimeter to the southern property line where it connects to a concrete lined drainage structure by the adjacent sports fields and school.

A vapor recovery system is located to the west and adjacent to the drainage channel just south of Lambert Road. Vapor recovery systems are typically composed of a scrubber, a compressor, and a switch that are primarily utilized to recover vapors that formed inside completely sealed crude oil or condensate tanks. The vapors are then sucked through the scrubber where recovered liquids are trapped and returned to liquid pipeline systems or tanks and recovered vapors are pumped into the gas lines. The vapor recovery system area at the Site includes an air compressor on a concrete pad, a 150-gallon tote of combustible liquid on a platform over secondary containment, a drip tank that was partially buried in the soil, a 55-gallon drum of gear oil that was approximately one quarter full, a motor located on soil, a scrubber, and a filter. Soil staining was observed in this area, primarily in the vicinity of the motor. Secondary containment structures were also observed to be approximately half full of rain water.

An operating dehydration unit is present to the east of the vapor recovery system beyond the drainage channel. A dehydration unit is typically utilized to remove water from the natural gas stream to meet the pipeline quality standards and typically uses triethylene glycol in the process. The dehydration unit includes an electric motor and a pump located on soil, a large AST labeled as empty, a former wash tank that contained combustible gas/oil/water, a sump located within secondary containment, an empty fiberglass AST on the soil, an AST in secondary containment that was listed as out of service, two heater treaters, an air compressor, a 55-gallon drum of gear oil, and a 100-gallon tote and a 110-gallon tote on a platform over soil without secondary containment. Staining was observed in the area, primarily in the vicinity of the concrete pad for the electric motors and pumps. The secondary containment structure around the former wash tank was observed to be broken. Secondary containment structures were also observed to be approximately half full of rain water.

Process pipelines were observed to traverse the open drainage ditch. Five manifolds are also present across this portion of the Site. These manifold structures are composed of an arrangement of piping and/or valves designed to control, distribute, and monitor fluid flows, which may include controlling well operations, treatment fluids, and crude oil flows. Three

transformers owned and operated by Southern California Edison are present within a fenced enclosure in the central portion of the Site near Valencia Avenue. No staining was observed around these transformers.

The 165-Acre Lease Property

The 165-Acre Lease Property consists of seven contiguous parcels that are located east of Valencia Avenue. The property is bordered by Carbon Canyon Road on the north, Blake Road on the south, and Rose Drive on the southwest. This property is primarily covered by dirt and vegetation. The northern and central portions of this property are developed with 61 oil wells dispersed throughout the area and two injection wells. Six manifolds are also present throughout the Site. These manifold structures are composed of an arrangement of piping and/or valves designed to control, distribute, and monitor fluid flows, which may include controlling well operations, treatment fluids, and crude oil flows. Steam pipes are located throughout the property and are primarily located aboveground in the central portions of the property. Petroleum pipelines are also present throughout the property associated with the oil field operations. A fenced enclosure in the northwestern portion of the property contains Southern California Edison owned and operated transformers and electrical equipment. No staining was observed around these transformers.

The Brea Production Unit and Olinda Tank Farm is located in the central portion of this property. The unit and tank farm are operational and include a fin fan, two large ASTs for approximately 300 barrels of crude oil within secondary containment, motors within concrete containment, a compressor, and an air tank. A number of other tanks are also present in this area including two approximate 300-barrel ASTs for crude oil, two 200-gallon tanks, a 55-barrel tank containing approximately seven barrels labeled to contain clarifier water that appear to contain oil field waste water with residual quantities of oil removed during clarifier operations, a tank of "Techni Break," a 110-gallon tote of combustible liquid, and a 165-gallon AST containing approximately 110 gallons of cooling water. The tanks were all located within secondary containment; however, the secondary containment structures were primarily uncovered and many of the areas were observed to be approximately half filled with rain water. An approximate 30-gallon container of clarifier water and a 55-gallon drum of clarifier water were observed in this area and were both approximately half full and located within secondary containment. Soil staining was observed in this area, primarily in the vicinity of the motors.

A carbon filtration tank area is present to the south of the Brea Production Unit and Olinda Tank Farm. This area is surrounded by a fenced enclosure and contains four large ASTs within secondary containment. Two of the tanks are labeled as carbon filtration and the other two tanks are labeled for clay filtration. An approximate 100-gallon tank containing hydrogen peroxide

and an approximate 45-barrel tank containing oxidizer are also present in this area within secondary containment structures. The secondary containment structure for the hydrogen peroxide tank was observed to be approximately half-filled with rain water and had a green sheen on the water surface.

A pipe and storage yard is present to the southeast of the tank farm. This area is soil-covered and currently utilized for the storage of pipes and scrap material, including oil well components. A concrete pad that appears to have been associated with a former tank farm or oil operating area is located to the south of the pipe and storage yard. Partially built secondary containment structures and some associated piping were observed in this area. No staining or surface indications of a release were observed in either area, but these areas appear to have been utilized for historic oil field operations.

The southern portion of this property is primarily vacant land covered by vegetation. A seasonal tree farm that grows pine trees is present in this area. A small, temporary structure occupied by a strawberry sales company is located in the southern most portion of this property. No pesticides were currently observed in this area; however, this portion of the Site has historically been occupied by agricultural operations that may have included the use of pesticides.

6.2.2 Site Vicinity

The Site is bordered to the north, northwest, and northeast by mixed use residential development constructed in the 1990s and 2000s on land formerly occupied by active oil field operations. The Olinda Alpha landfill is located approximately 0.60-miles north of the Site. To the east, the Site is bordered by land associated with the Carbon Canyon Dam flood control area and the Carbon Canyon Regional Park. A school, a sports park, and an electrical substation followed by East Birch Street then industrial businesses are located to the south of the 100-Acre Lease Property. Rose Drive and Blake Road followed by residential development border the 165-Acre Lease Property to the south. The Site is bordered to the west by residential development constructed in the 1980s, which was formerly utilized for agricultural purposes and oil fields.

7.0 PHASE I ESA CONCLUSIONS

This report presents the results of a Phase I ESA performed for an area referred to as the Brea 265 Property, located along Valencia Avenue at the intersections with Lambert Road, Carbon Canyon Road and Rose Drive in Brea, California. The purpose of the investigation is to identify the potential presence of RECs at the Site.

A REC refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following RECs were identified during the course of this assessment:

- The Site has historically been developed as an operating oil well field. Some oil wells are still operational and various levels of ponded oil and ground staining were observed at each well, primarily in the vicinity of the well box. The historic and current operations of the oil well field, including the oil wells, tank farms, and pipelines, are associated with potential releases that could significantly impact future residential development of the Site. It should be noted that the California Division of Oil Gas and Geothermal Resources generally prohibits construction of residences directly over active or sealed and abandoned oil wells.
- A number of historic oil sumps, including a large former oil pond or sump located in the southwestern portion of the 165-Acre Lease Property that has since been filled in and developed to include Rose Road, are present across both properties of the subject Site. These historic sumps represent a potential threat to soil, groundwater, and/or soil vapor quality at the Site.
- The Site is a defined oil/gas field and is subject to the guidelines and requirements set forth in the OCFA's *Combustible Soil Gas Hazard Mitigation* document that outlines the guidance for the investigation, remediation, and/or mitigation of potentially hazardous concentrations of combustible soil gases associated with the construction and occupancy of a building located on or within the vicinity of an oil/gas field and the OCFA specified areas.
- Petroleum and natural gas pipelines are listed to be present beneath the Site in portions of both the 100-Acre Lease and 165-Acre Lease Properties. These features can be associated with hazardous materials releases.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Northgate did not identify any CRECs during the course of this assessment.

A HREC refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following HREC was identified during the course of this assessment:

- The 100-Acre Lease portion of the Site has a documented release from a leaking diesel UST that impacted soil. No remedial actions were completed; however, soil was reported to have been impacted up to depths of 90 feet bgs. The facility received regulatory closure from the OCHCA on August 20, 1991. In our opinion, residual contamination associated with this historic release could impact future residential development of the Site, even though no regulatory action is currently required.

Our review also identified the following potential environmental concerns:

- A drainage channel that traverses the 100-Acre Lease Property from north to south that is reported to originate from the Olinda Alpha Landfill located to the north, could contain runoff from the upgradient landfill facility.
- Given the historic use of the Site for agricultural purposes, there is a possibility that pesticides and herbicides may be present in shallow soil in some areas of the Site.
- Test results from indoor air samples collected within the Site zip code area indicate that radon may constitute a potential environmental concern at the Site.
- Injection wells are present at the Site and are subject to many new regulations. Further review of specific requirements for closing out the existing injection wells may be required prior to development of the Site.

Northgate recommends that a Phase II ESA be conducted to evaluate the existing soil, groundwater, and soil vapor conditions at the Site related to these RECs and issues of potential environmental concern. The investigation should include strategic test pits and trenching as well as near surface and shallow soil testing and drilling of deep soil borings. The Phase II ESA results should be used to develop remedial cost scenarios to further understand the potential impacts associated with redevelopment of the Site.

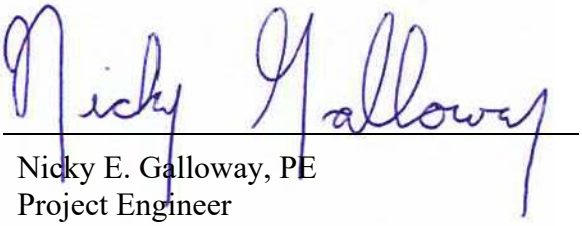
9.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.



Nicky E. Galloway, PE
Project Engineer

Derrick S. Willis
Principal

Qualifications of the Environmental Professionals are provided in Appendix H.

TABLE

TABLE

TABLE 1: SUMMARY OF SITE FEATURES, HISTORICAL OPERATIONS, POTENTIAL ENVIRONMENTAL CONCERNS, AND RECONNAISSANCE OBSERVATIONS

PROPERTY	GENERAL INFO	OTHER GENERAL FEATURES	OBSERVATIONS FROM SITE RECONNAISSANCE IN FEBRUARY 2017								POTENTIAL ENVIRONMENTAL CONCERNS REPORTED IN 2017
			DRAINAGE CHANNEL	**OIL WELLS**	**ABANDONED TANK**	**GENERAL/OTHER**	**FORMER AGRICULTURAL USE**				
100 Acre North of Lambert	**26.65** Acres **320-073-07** APN **17** Oil Wells **0** Manifolds	Drainage Channel; and Abandoned Tank	Drainage channel present in north-south orientation; traverses entire Site. Drainage channel converts to pipe to flow beneath roadways. Reported to originate from upgradient landfill. Process/production pipes cross channel. Water present during recon.	Oil wells throughout area - somer operational and other non-operational. Oil wells are primarily electric with a concrete cellar. Some reported to have been installed as early at early 1900s. Some oil wells have more visible staining around well head/sucker rod.	Old process tank appears to have been moved and abandoned in the north-central portion of the Site and does not appear to have been formerly located in this area. Tank listed to formerly contain crude oil. Appears to have been empty. Location of process tanks from historical aerials.	Historic oil well operations. Several manifolds across Site associated with oil operations. Petroleum pipelines mapped at Site.	Currently used for agricultural operations including a nursery.				- Historic oil well operations - Petroleum pipelines - Manifolds - Drainage channel and potential impacts from dumping, leaks from pipes traversing channel, and upgradient landfill
			VAPOR RECOVERY SYSTEM	**DEHYDRATION UNIT**		**DRAINAGE CHANNEL/PIPES**	**OIL WELLS**	**GENERAL/OTHER**	**FORMER SUMPS**	**FORMER AGRICULTURAL USE**	
100 Acre South of Lambert	**65.53** Acres **320-071-29** APN **26** Oil Wells **1** Injector Well **2** Manifolds	Dehydration Unit; Vapor Recovery System; Drainage Channel/Pipes; and Manifolds	Air compressor on concrete pad, 150-gallon tote of combustible liquid on platform over secondary containment filled with rain water, drip tank about half buried by soil, 55-gallon drum of gear oil about 1/4 full, motor located on soil with visible staining, scrubber, and filter present.	Operating dehydration unit - electric motor and pump on soil (not operating), large AST listed as empty and former wash tank that contained combustible gas/oil/water within broken secondary containment structure. Sump located within secondary containment for AST. Empty fiberglass AST on soil. Out of servce AST in secondary containment partially filled by rain water. Air compressor on oncrete pad in secondary containment. Two empty		Drainage channel present in north-south orientation; traverses entire Site. Drainage channel converts to pipe to flow beneath roadways. Reported to originate from upgradient landfill. Process/production pipes cross channel. Concrete lined drainage outlet structure in south-central portion of Site at border to Brea Sports Park.Water present during recon.	Oil wells throughout area - some operational and others non-operational. Oil wells are primarily electric with a concrete cellar. Some oil wells have more visible staining around well head and sucker rod.	Historic oil well operations. Several manifolds across Site associated with oil operations. Transformers on concrete pad in fenced enclosure near entry to Site from Valencia Avenue. Petroleum pipelines mapped at Site.	10 historic sumps on site between about 1938 to 1995. Former sump areas do not currently operate as sumps and no visible ponding or waste build up was present.	Currently used for agricultural operations including a nursery.	- Staining and operations at vapor recovery system - Staining and operations at dehydration unit - Historic oil well operations - Petroleum pipelines - Manifolds - Drainage channel and potential impacts from dumping, leaks from pipes traversing channel, and upgradient landfill
			OIL WELLS	**MANIFOLDS/PIPELINES/GENERAL/OTHER**	**FORMER SUMPS**						- Historic oil well operations - Petroleum pipelines - Manifolds
165 Acre Fee 2 "North"	**55.52** Acres **322-031-01 and -24** APNs **38** Oil Wells **2** Injector Well (**1** Idle) **4** Manifolds	Manifolds; Steam Pipes; and Southern California Edison Transformer Area.	Oil wells throughout area - some operational and others non-operational. Oil wells are primarily electric with a concrete cellar. Some oil wells have more visible staining around well head and sucker rod.	Southern California Edison transformers and electrical equipment lolcated within fenced enclosures along the western portion of the Site - near Valencia Avenue. Historic oil well operations. Several manifolds across Site associated with oil operations. 55-gallon drum of unknown contents open in water. Petroleum pipelines mapped at Site.	Former sump areas do not currently operate as sumps and no visible ponding or waste build up was present.						
			BREA PRODUCTION UNIT/OLINDA TANK FARM		**CARBON FILTRATION TANK AREA**	**FORMER TANK/PIPE/STORAGE YARD**	**AGRICULTURAL AREA**	**OIL WELLS**	**GENERAL /OTHER**	**FORMER SUMPS**	
165 Acre Fee 3 "South"	**109.54** Acres **322-031-12, -13, -14, -19 and -21** APNs **23** Oil Wells **2** Manifolds	Tank Farm; Carbon Filtration Area; Former Tank Area/Pipe/Storage Yard; Manifold and Steam Pipes; and Agricultural Areas	Fin fan, 30-gallon container water clarifier (~14 gallons), 2 large tanks (about 300 barrels size) in concrete lined secondary containment for curde oil, 75 hp motor within concrete containment about half full of rain water, Two 220-gallon tanks on raised platforms over secondary containment, 55-gallon drums within secondary containment of water clairifer about 60% full, 55 barrel tank (~7 barrels) of water clarifier in secondary containment, tank of "Techhni Break" in secondary containment, compressor, air tank, 110-gallon tote of combustible liquid in secondary containment about 1/3 filled with water, 60 hp motor with visible staining at base, and 165-gallon tank of cooling water (~110 gallons).		Fenced enclosure, header 6 located within the vicinity, four large tanks in secondary containment - 2 for carbon filtration and 2 for clay filtration, hydrogen peroxide tank located in secondary containment structure partially filled with liquid with a green sheen, and tank about 45 barrels in size of oxidizer in secondary containment.	Soil covered area used for the storage of pipes and scrap material. Former tank area in vicinity with concrete pad, aboveground piping, old AST, and single concrete pad within remnants of secondary containment wall.	Open space, currently vacant land covered by soil and plants. Strawberry stand (temporary/mobile structure) on the southernmost portion of the Site. Possible historic use of pesticides in agricultural operations.	Oil wells throughout area - some operational and others non-operational. Oil wells are primarily electric with a concrete cellar. Some oil wells have more visible staining around well head and sucker rod. Oil wells located in vicinity of tank farms.	Historic oil well operations. Several manifolds across Site associated with oil operations. Concrete washout area in the southern portion of the oil field portion of the Site. Dam adjacent to Site to the east. Steam pipes traverse Site. Petroleum pipelines mapped at Site.	Former sump areas do not currently operate as sumps and no visible ponding or waste build up was present.	- Staining and operations at Brea productionunit/Olinda tank farm - Staining and operations at carbon filtration tank area - Former tank area with visible pipes/broken sercondary containment - Historic well operations - Petroleum pipelines - Manifolds - Historic pesticide use in agricultural areas

SITE PHOTOGRAPHS

1. The main entry gate located on the west side of Valencia Avenue just south of Lambert Road with access to the southern portion of the 100-Acre Parcel.

2. View of the northern portion of the 100-Acre Parcel from across Lambert Road – view facing north.

3. Typical view of the northern portion of the 100-Acre Parcel with a typical oil well.

4. Typical oil well head of oil well located on the northern portion of the 100-Acre Parcel.

5. Nursery and oil well located on the eastern side of the northern portion of the 100-Acre Parcel.

6. Drainage channel located on northern portion of 100-Acre Parcel with drainage to the southern portion of the 100-Acre Parcel via a conduit under Lambert Road.

7. Fenced enclosure with apparent storage structures present in the central area of the northern portion of the 100-Acre Parcel.

8. Trailer and concrete pad present in the central area of the northern portion of the 100-Acre Parcel.

9. Abandoned former process tank present in the north central area of the northern portion of the 100-Acre Parcel.

10. Abandoned tank identified for former crude oil contents on the northern portion of the 100-Acre Parcel.

11. Typical view of southern portion of 100-Acre Parcel with typical oil wells shown.

12. Typical oil well on the southern portion of the 100-Acre Parcel.

13. Significant staining observed around oil well 126 located on the southern portion of the 100-Acre Parcel near the entry gate from Valencia Avenue..

14. Injection well located in the southwestern corner of the southern portion of the 100-Acre Parcel.

15. Drainage channel conduit under Lambert Road from the northern portion of the 100-Acre Parcel connecting to the southern portion of the 100-Acre Parcel.

16. Typical drainage channel through the central area of the southern portion of the 100-Acre Parcel.

17. Oil well field pipelines suspended over the drainage channel in the southern portion of the 100-Acre Parcel.

18. Vapor recovery system located in the north central area of the southern portion of the 100-Acre Parcel.

19. Vapor recovery system located in the north central area of the southern portion of the 100-Acre Parcel.

20. Vapor recovery system located in the north central area of the southern portion of the 100-Acre Parcel.

21. Vapor recovery system located in the north central area of the southern portion of the 100-Acre Parcel.

22. Vapor recovery system located in the north central area of the southern portion of the 100-Acre Parcel.

23. Vapor recovery system located in the north central area of the southern portion of the 100-Acre Parcel.

24. Dehydration Unit located in the north central area of the southern portion of the 100-Acre Parcel.

25. Dehydration Unit located in the north central area of the southern portion of the 100-Acre Parcel.

26. Dehydration Unit located in the north central area of the southern portion of the 100-Acre Parcel.

27. Dehydration Unit located in the north central area of the southern portion of the 100-Acre Parcel.

28. Dehydration Unit located in the north central area of the southern portion of the 100-Acre Parcel.

29. Dehydration Unit located in the north central area of the southern portion of the 100-Acre Parcel.

30. Dehydration Unit located in the north central area of the southern portion of the 100-Acre Parcel.

31. Dehydration Unit located in the north central area of the southern portion of the 100-Acre Parcel.

32. Dehydration Unit located in the north central area of the southern portion of the 100-Acre Parcel.

33. Typical manifold located on the southern portion of the 100-Acre Parcel.

34. Transformers located in the central area of the southern portion of the 100-Acre Parcel.

35. Typical view and oil wells of the northern and central portions of the 165-Acre Parcel.

36. Typical oil well located in the northern and central portions of the 165-Acre Parcel.

37. Portable well testing trailer llocated in the northern portion of the 165-Acre Parcel.

38. Typical manifold header located in the northern and central portions of the 165-Acre Parcel.

39. Steam pipes located in the northern and central portions of the 165-Acre Parcel.

40. Brea Production Unit and Olinda Tank Farm located in the central area of the northern portion of the 165-Acre Parcel.

41. Brea Production Unit and Olinda Tank Farm located in the central area of the northern portion of the 165-Acre Parcel.

42. Brea Production Unit and Olinda Tank Farm located in the central area of the northern portion of the 165-Acre Parcel.

43. Brea Production Unit and Olinda Tank Farm located in the central area of the northern portion of the 165-Acre Parcel.

44. Header and compressor station in Brea Production Unit and Olinda Tank Farm located in the central area of the northern portion of the 165-Acre Parcel.

45. Brea Production Unit and Olinda Tank Farm located in the central area of the northern portion of the 165-Acre Parcel.

46. Brea Production Unit and Olinda Tank Farm located in the central area of the northern portion of the 165-Acre Parcel.

47. Carbon filtration area located in the central area of the northern portion of the 165-Acre Parcel to the south of the Brea Production Unit and Olinda Tank Farm.

48. Carbon filtration area located in the central area of the northern portion of the 165-Acre Parcel to the south of the Brea Production Unit and Olinda Tank Farm.

49. Carbon filtration area located in the central area of the northern portion of the 165-Acre Parcel to the south of the Brea Production Unit and Olinda Tank Farm.

50. Carbon filtration area located in the central area of the northern portion of the 165-Acre Parcel to the south of the Brea Production Unit and Olinda Tank Farm.

51. Former pipe storage yard located in the south central portion of the 165-Acre Parcel.

52. Former tank farm location in the south central portion of the 165-Acre Parcel.

53. Former tank farm location in the south central portion of the 165-Acre Parcel.

54. Drainage and portion of former sump S20 located in the southern portion of the 165-Acre Parcel.

55. Former agricultural area located in the southern portion of the 165-Acre Parcel.

56. Former agricultural area located in the southern portion of the 165-Acre Parcel.

57. Residential development followed by the Olinda Alpha landfill (distance hillside) to the north of the Site.

58. Carbon Canyon Dam located east of the 165-Acre Parcel.

59. Park and flood control area located east of the 165-Acre Parcel.

IN RESPONSE TO THE ABOVE REFERENCED APPLICATION FOR A POLICY OF TITLE INSURANCE, THIS COMPANY HEREBY REPORTS THAT IT IS PREPARED TO ISSUE, OR CAUSE TO BE ISSUED, AS OF THE DATE HEREOF, A POLICY OR POLICIES OF TITLE INSURANCE DESCRIBING THE LAND AND THE ESTATE OR INTEREST THEREIN HEREINAFTER SET FORTH, INSURING AGAINST LOSS WHICH MAY BE SUSTAINED BY REASON OF ANY DEFECT, LIEN OR ENCUMBRANCE NOT SHOWN OR REFERRED TO AS AN EXCEPTION BELOW OR NOT EXCLUDED FROM COVERAGE PURSUANT TO THE PRINTED SCHEDULES, CONDITIONS AND STIPULATIONS OF THE POLICY FORMS.

THE PRINTED EXCEPTIONS AND EXCLUSIONS FROM THE COVERAGE OF SAID POLICY OR POLICIES ARE SET FORTH IN EXHIBIT A ATTACHED. COPIES OF THE POLICY FORMS SHOULD BE READ. THEY ARE AVAILABLE FROM THE OFFICE WHICH ISSUED THIS REPORT.

THIS REPORT (AND ANY SUPPLEMENTS OR AMENDMENTS HERETO) IS ISSUED SOLELY FOR THE PURPOSE OF FACILITATING THE ISSUANCE OF A POLICY OF TITLE INSURANCE AND NO LIABILITY IS ASSUMED HEREBY. IF IT IS DESIRED THAT LIABILITY BE ASSUMED PRIOR TO THE ISSUANCE OF A POLICY OF TITLE INSURANCE, A BINDER OR COMMITMENT SHOULD BE REQUESTED.

PLEASE READ THE EXCEPTIONS SHOWN OR REFERRED TO BELOW AND THE EXCEPTIONS AND EXCLUSIONS SET FORTH IN EXHIBIT A OF THIS REPORT CAREFULLY. THE EXCEPTIONS AND EXCLUSIONS ARE MEANT TO PROVIDE YOU WITH NOTICE OF MATTERS WHICH ARE NOT COVERED UNDER THE TERMS OF THE TITLE INSURANCE POLICY AND SHOULD BE CAREFULLY CONSIDERED.

IT IS IMPORTANT TO NOTE THAT THIS PRELIMINARY REPORT IS NOT A WRITTEN REPRESENTATION AS TO THE CONDITION OF TITLE AND MAY NOT LIST ALL LIENS, DEFECTS, AND ENCUMBRANCES AFFECTING TITLE TO THE LAND.

DATED AS OF **MARCH 14, 2002** AT 7:30 A.M.

BY RONALD J. GOMEZ, TITLE OFFICER
DIRECT TELEPHONE NUMBER - 714-800-4822
FAX NUMBER - 714-800-4965

THE FORM OF POLICY OF TITLE INSURANCE CONTEMPLATED BY THIS REPORT IS:

AMERICAN LAND TITLE ASSOCIATION OWNERS POLICY - WITH REGIONAL EXCEPTIONS (STANDARD COVERAGE).

TITLE TO SAID ESTATE OR INTEREST AT THE DATE HEREOF IS VESTED IN:

SWEPI LP, A DELAWARE LIMITED PARTNERSHIP WHO ACQUIRED TITLE AS SHELL WESTERN E & P, INC., A DELAWARE CORPORATION, SUCCESSOR BY MERGER TO SHELL CALIFORNIA PRODUCTION INC., A DELAWARE CORPORATION.

THE ESTATE OR INTEREST IN THE LAND HEREINAFTER DESCRIBED OR REFERRED TO COVERED BY THIS REPORT IS:

A FEE.

AT THE DATE HEREOF EXCEPTIONS TO COVERAGE IN ADDITION TO THE PRINTED EXCEPTIONS AND EXCLUSIONS CONTAINED IN SAID POLICY FORM WOULD BE AS FOLLOWS:

1. GENERAL AND SPECIAL TAXES FOR THE FISCAL YEAR 2002-2003, A LIEN NOT YET DUE OR PAYABLE.

2. SECOND INSTALLMENT GENERAL AND SPECIAL TAXES FOR THE FISCAL YEAR 2001-2002, NOW A LIEN NOT YET DELINQUENT; AMOUNT $11,945.83;
CODE AREA: 78-072 AND 02-003.
A. P. NO.: 308-011-17, 322-031-01, 322-031-12, 322-031-13, 322-031-14, 322-031-19, 322-031-20, 322-031-21, AND 322-031-24.

3. THE LIEN OF SUPPLEMENTAL TAXES ASSESSED PURSUANT TO CHAPTER 3.5 COMMENCING WITH SECTION 75 OF THE CALIFORNIA REVENUE AND TAXATION CODE.

NOTE: ALTHOUGH THE ABOVE SUPPLEMENTAL TAXES MAY BE A LIEN, THE INSTALLMENTS THEREOF ARE NOT YET DUE OR PAYABLE.

THE FOLLOWING EXCEPTIONS AFFECT PARCELS A, B AND C:

4. THE RIGHT OF WAY FOR THE CONSTRUCTION, OPERATION AND MAINTENANCE OF A RAILROAD, ETC., OVER A PORTION OF SAID LAND AS GRANTED TO THE SOUTHERN CALIFORNIA RAILWAY COMPANY BY DEED RECORDED NOVEMBER 6, 1899 IN BOOK 44, PAGE 374 OF DEEDS.

5. THE RIGHTS AND RIGHT OF WAY FOR PIPE LINES AND FOR TELEPHONE AND TELEGRAPH LINES OVER A PORTION OF SAID SECTION 8, AS GRANTED BY OLINDA CRUDE OIL CO. TO PACIFIC COAST OIL CO., BY DEED RECORDED JUNE 25, 1902 IN BOOK 75, PAGE 253 OF DEEDS.

6. THE RIGHT TO ERECT AND MAINTAIN STORAGE TANKS FOR OIL AND THE RIGHT OF WAY FOR PIPE LINES FOR THE TRANSPORTATION OF OIL OVER A PORTION OF SAID SECTION 8, AS CONVEYED BY OLINDA LAND COMPANY TO INDUSTRIAL OIL COMPANY, BY DEED RECORDED JANUARY 23, 1911 IN BOOK 3, PAGE 324 OF LEASES AND RE-RECORDED JANUARY 23, 1911 IN BOOK 7, PAGE 43 OF MISCELLANEOUS RECORDS.

7. THE RIGHT OF WAY FOR PIPE LINE FOR THE TRANSPORTATION OF WASTE WATER OVER A PORTION OF SAID LAND, AS GRANTED BY OLINDA LAND COMPANY, TO WASTE WATER DISPOSAL COMPANY, BY DEED RECORDED FEBRUARY 24, 1928 IN BOOK 134, PAGE 175 OF OFFICIAL RECORDS.

NOTE 1: BY INSTRUMENT RECORDED DECEMBER 15, 1959 IN BOOK 5016, PAGE 217 OF OFFICIAL RECORDS THE PORTION OF SAID EASEMENT LYING NORTHEASTERLY OF THE TERMINUS OF THAT CERTAIN COURSE DESCRIBED AS "NORTH 50 DEG. 08' 08" EAST 512.18 FEET TO A MANHOLE" WAS QUITCLAIMED TO THE OWNERS OF RECORD.

NOTE 2: ALL RIGHT, TITLE AND INTEREST OF WASTE WATER DISPOSAL COMPANY WAS ASSIGNED TO UNION OIL COMPANY OF CALIFORNIA BY AN INSTRUMENT RECORDED NOVEMBER 5, 1974 IN BOOK 11280, PAGE 1845 OF OFFICIAL RECORDS.

NOTE 3: THE RIGHTS UNDER SAID DOCUMENT WERE ASSIGNED TO SANTA FE ENERGY OPERATING PARTNERS BY A DOCUMENT ENTITLED "ASSIGNMENT OF RIGHTS OF WAY" RECORDED AUGUST 19, 1993 AS INSTRUMENT NO. 93-558730 OF OFFICIAL RECORDS.

8. A RIGHT OF WAY FOR ROAD PURPOSES OVER A PORTION OF THE WESTERLY 30 FEET OF LOTS 3 AND 4 OF SECTION 8, AS GRANTED BY OLINDA LAND COMPANY TO THE COUNTY OF ORANGE, BY DEED RECORDED JANUARY 21, 1914 IN BOOK 244, PAGE 260 OF DEEDS.

9. THE RIGHTS AND RIGHT OF WAY FOR PIPE LINES OVER A PORTION OF THE NORTHWEST QUARTER OF THE SOUTHEAST QUARTER OF SAID SECTION 8, AS GRANTED BY OLINDA LAND COMPANY TO GENERAL PIPE LINE COMPANY OF CALIFORNIA, BY DEED RECORDED MAY 19, 1927 IN BOOK 41, PAGE 438 OF OFFICIAL RECORDS.

10. THE EFFECT OF MAPS FILED IN BOOK 40, PAGE 30 AND IN BOOK 51, PAGE 31 OF RECORD OF SURVEYS IN THE OFFICE OF THE COUNTY RECORDER OF ORANGE COUNTY, CALIFORNIA, PURPORTING TO SHOW THE HEREIN DESCRIBED AND OTHER LAND.

11. THE EFFECT OF MAPS PURPORTING TO SHOW THE HEREIN DESCRIBED AND OTHER LAND RECORDED IN BOOK 18, PAGE 38; IN BOOK 33, PAGE 37; AND IN BOOK 87, PAGES 47 AND 48, ALL OF RECORD OF SURVEYS.

12. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED MAY 11, 1932 IN BOOK 557, PAGE 127 OF OFFICIAL RECORDS,

IN FAVOR OF:	ORANGE COUNTY.
FOR:	ROAD AND INCIDENTAL PURPOSES.
OVER:	A PORTION OF THE LAND IN ROSE DRIVE.

13. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED OCTOBER 29, 1942 IN BOOK 1170, PAGE 31 OF OFFICIAL RECORDS,

IN FAVOR OF:	SOUTHERN CALIFORNIA EDISON COMPANY, LTD., A CORPORATION.
FOR:	POLES, TOWERS AND INCIDENTAL PURPOSES.
OVER:	A PORTION OF THE LAND.

14. A 10-FOOT RIGHT OF WAY FOR A 30 INCH GAS PIPE LINE ACROSS SAID LAND AND OTHER LAND, AS CONVEYED TO SOUTHERN CALIFORNIA GAS COMPANY AND SOUTHERN COUNTIES GAS COMPANY OF CALIFORNIA, AS TENANTS IN COMMON, BY INSTRUMENT RECORDED JUNE 19, 1950 IN BOOK 2029, PAGE 102 OF OFFICIAL RECORDS.

15. A LICENSE IN FAVOR OF GENERAL PETROLEUM CORPORATION, A CORPORATION, FOR A PIPELINE FOR THE TRANSPORTATION OF OIL, PETROLEUM, GASOLINE AND/OR WATER, AND INCIDENTAL PURPOSES, RECORDED FEBRUARY 14, 1956 IN BOOK 3396, PAGE 252 OF OFFICIAL RECORDS.

16. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED FEBRUARY 26, 1958 IN BOOK 4208, PAGE 424 OF OFFICIAL RECORDS,

IN FAVOR OF:	THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA, A PUBLIC CORPORATION.
FOR:	PIPE LINE AND INCIDENTAL PURPOSES.
OVER:	A STRIP OF LAND 50 FEET IN WIDTH WITHIN THE LAND, AND OTHER LANDS MORE PARTICULARLY DESCRIBED THEREIN.

17. EASEMENTS OVER PORTIONS OF SAID LAND FOR CARBON CANYON DAM AND CHANNEL FOR PUBLIC USE AND INCIDENTS THERETO, AS DESCRIBED IN THE DECLARATION OF TAKING BY UNITED STATES OF AMERICA, RECORDED JUNE 1, 1960 IN BOOK 5269, PAGE 79 OF OFFICIAL RECORDS.

18. A PERPETUAL AND ASSIGNABLE RIGHT OF WAY AND EASEMENT OVER A PORTION OF SAID LAND FOR PIPE LINES AND INCIDENTS THERETO, AS DESCRIBED IN THE ABOVE MENTIONED DECLARATION OF TAKING.

QC filed @ doc# 20368603

19. A PERPETUAL AND ASSIGNABLE EASEMENT AND RIGHT OF WAY OVER A PORTION OF SAID LAND FOR POWER LINES, COMMUNICATION LINES AND INCIDENTS THERETO, AS DESCRIBED IN THE DECLARATION OF TAKING BY THE UNITED STATES OF AMERICA, RECORDED SEPTEMBER 6, 1960 IN BOOK 5404, PAGE 438 OF OFFICIAL RECORDS.

20. A PERPETUAL EASEMENT FOR ROADWAY SLOPES AND MAINTENANCE AND INCIDENTAL PURPOSES OVER THAT PORTION OF SAID LAND ADJOINING ROSE DRIVE, AS CONVEYED TO THE COUNTY OF ORANGE BY DEED RECORDED APRIL 4, 1961 IN BOOK 5677, PAGE 3 OF OFFICIAL RECORDS.

21. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED JULY 10, 1961 IN BOOK 5779, PAGE 696 OF OFFICIAL RECORDS,

IN FAVOR OF:	THE UNITED STATES OF AMERICA.
FOR:	ROADWAYS AND INCIDENTAL PURPOSES.
OVER:	A PORTION OF THE LAND AS MORE PARTICULARLY DESCRIBED THEREIN.

NOTE: SAID EASEMENT HAS BEEN MODIFIED BY AN INSTRUMENT ENTITLED "AMENDMENT TO DECLARATION OF TAKING" IN FAVOR OF THE UNITED STATES OF AMERICA WHICH RECORDED JULY 25, 1966 IN BOOK 7998, PAGE 741 OF OFFICIAL RECORDS.

22. THE TERMS, PROVISIONS, COVENANTS AND CONDITIONS AS SET FORTH IN A BOUNDARY LINE AGREEMENT DATED JANUARY 12, 1961 BETWEEN SHELL OIL COMPANY, A CORPORATION, CHANSLOR-WESTERN OIL AND DEVELOPMENT COMPANY, A CORPORATION, SOCONY MOBIL OIL COMPANY, INC., A CORPORATION AND HUMBLE OIL & REFINING COMPANY, A CORPORATION, RECORDED APRIL 25, 1961 IN BOOK 5700, PAGE 984 OF OFFICIAL RECORDS, ESTABLISHING A BOUNDARY LINE BETWEEN THE LANDS OF THE ABOVE PARTIES, REFERENCE BEING MADE TO THE RECORD FOR PARTICULARS OF SAID AGREEMENT.

23. A RIGHT OF WAY AND EASEMENT FOR PIPE LINES AND APPURTENANCES THERETO, TOGETHER WITH THE RIGHT OF INGRESS TO AND EGRESS FROM SAID EASEMENT, AS CONVEYED TO GENERAL PETROLEUM CORPORATION, BY DEED RECORDED SEPTEMBER 12, 1961 IN BOOK 5845, PAGE 30 OF OFFICIAL RECORDS.

24. AN EASEMENT FOR BOTH AERIAL AND UNDERGROUND ELECTRICAL LINES, CONSISTING OF POLE LINES, CONDUITS AND INCIDENTAL PURPOSES, AND APPURTENANCES THERETO, AS SET FORTH IN AN INSTRUMENT RECORDED JANUARY 16, 1968 IN BOOK 8493, PAGE 555 OF OFFICIAL RECORDS, OVER THAT PORTION OF SAID LAND INCLUDED WITHIN THE FOLLOWING:

A STRIP OF LAND, 12 FEET IN WIDTH, LYING WITHIN THE SOUTHWEST QUARTER OF SECTION 8, TOWNSHIP 3 SOUTH, RANGE 9 WEST, S.B.M., THE CENTERLINE OF SAID STRIP DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SAID SOUTHWEST QUARTER; THENCE, NORTH 89° 15' 30" EAST 2292.07 FEET; THENCE SOUTH 4° 18' EAST 220 FEET TO THE TRUE POINT OF BEGINNING; THENCE, SOUTHWESTERLY 39 FEET TO A POINT IN A LINE PARALLEL WITH AND DISTANT WESTERLY, MEASURED AT RIGHT ANGLES FROM THE EASTERLY LINE OF THE RANCHO JUAN CAJON DE SANTA ANA, 17 FEET; THENCE, SOUTH 89° 15' 30" WEST 45 FEET.

25. EASEMENTS TO CONSTRUCT AND MAINTAIN SLOPES, AS CONVEYED TO THE COUNTY OF ORANGE BY DEED RECORDED JULY 31, 1975 IN BOOK 11471, PAGE 256 OF OFFICIAL RECORDS, EVEN PORTIONS OF SAID LAND, UPON THE RESERVATIONS, COVENANTS AND CONDITIONS THEREIN CONTAINED.

26. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED NOVEMBER 30, 1988 AS INSTRUMENT NO. 88-623853 OF OFFICIAL RECORDS,

IN FAVOR OF:	SOUTHERN CALIFORNIA EDISON COMPANY, A CORPORATION.
FOR:	THE MAINTENANCE AND OPERATION OF AN ELECTRICAL SUBSTATION AND INCIDENTAL PURPOSES.
OVER:	A PORTION OF THE LAND.

THE FOLLOWING EXCEPTIONS AFFECT PARCEL D:

27. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED JULY 18, 1902 IN BOOK 75, PAGE 282 OF DEEDS,

IN FAVOR OF:	PACIFIC COAST OIL COMPANY, A CORPORATION.
FOR:	RIGHT OF INGRESS AND EGRESS AND INCIDENTAL PURPOSES.
OVER:	THE LAND.

NOTE 1: RECORDED APRIL 3, 1907 IN BOOK 155, PAGE 245 OF DEEDS, IS A DEED DATED NOVEMBER 23, 1906, EXECUTED BY STANDARD OIL COMPANY, A CORPORATION, FORMERLY KNOWN AS PACIFIC COAST OIL CO., TO BREA CANON OIL COMPANY, A CORPORATION, DESCRIBING SAID EXCEPTED PARCEL OF LAND, RESERVING TO SAID GRANTOR RIGHTS OF WAY FOR PIPE LINES AND RIGHT OF INGRESS AND EGRESS FROM SAID EXCEPTED LAND TO ADJOINING LANDS OF PACIFIC LAND IMPROVEMENT COMPANY.

NOTE 2: THE INTEREST OF BREA CANON OIL COMPANY WAS CONVEYED TO GENERAL PETROLEUM CORPORATION, A CORPORATION, BY DEED RECORDED FEBRUARY 21, 1929 IN BOOK 245, PAGE 317 OF OFFICIAL RECORDS. GENERAL PETROLEUM CORPORATION WAS MERGED WITH SOCONY MOBIL OIL COMPANY, INC., AS INDICATED BY A CERTIFICATE RECORDED JANUARY 11, 1960 IN BOOK 5049, PAGE 109 OF OFFICIAL RECORDS.

NOTE 3: RECORDED JUNE 30, 1966 IN BOOK 7977, PAGE 210 OF OFFICIAL RECORDS, IS A CERTIFICATE DATED JUNE 24, 1966 BY G. H. KETCHUM, ASSISTANT SECRETARY OF MOBIL OIL CORPORATION, RECITING THAT NAME OF SOCONY MOBIL COMPANY, INC., WAS CHANGED TO MOBIL OIL CORPORATION.

28. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED OCTOBER 3, 1904 IN BOOK 108, PAGE 309 OF DEEDS,

IN FAVOR OF:	BREA CANON OIL COMPANY.
FOR:	RIGHT OF WAY FOR PIPE LINES AND INCIDENTAL PURPOSES.
OVER:	THE LAND.

29. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED JULY 22, 1916 IN BOOK 293, PAGE 358 OF DEEDS,

IN FAVOR OF:	STANDARD OIL COMPANY.
FOR:	RIGHT OF WAY FOR PIPE LINES AND INCIDENTAL PURPOSES.
OVER:	A PORTION OF THE LAND.

30. ANY EASEMENTS FOR PIPE LINES AND INCIDENTAL PURPOSES OVER A PORTION OF THE LAND, IN FAVOR OF GENERAL PETROLEUM CORPORATION OF CALIFORNIA, AS RECITED IN A NOTICE RECORDED AUGUST 25, 1928 IN BOOK 186, PAGE 490 OF OFFICIAL RECORDS.

31. UNRECORDED AGREEMENT DATED OCTOBER 24, 1931 BETWEEN CHANSLOR-CANFIELD MIDWAY OIL COMPANY, AS FIRST PARTY, AND WEST COAST REFINING COMPANY, AS SECOND PARTY, COVERING A PORTION OF THE LAND, TOGETHER WITH CERTAIN OTHER UNRECORDED AGREEMENTS WHICH MAY OR MAY NOT AFFECT THE HEREIN DESCRIBED LAND, AS DISCLOSED IN AN ASSIGNMENT DATED NOVEMBER 30, 1964, EXECUTED BY WEST COAST REFINING COMPANY, A CALIFORNIA CORPORATION, TO ESTATE OF A. HARTWELL BRADFORD, DECEASED, RECORDED DECEMBER 2, 1964 IN BOOK 7327, PAGE 788 OF OFFICIAL RECORDS, TO WHICH RECORD REFERENCE IS MADE FOR FULL PARTICULARS.

NOTE 1: RECORDED MARCH 11, 1960 IN BOOK 5142, PAGE 449 OF OFFICIAL RECORDS, IS A QUITCLAIM DEED DATED JANUARY 20, 1960, EXECUTED BY WEST COAST REFINING COMPANY, A CALIFORNIA CORPORATION, TO UNITED STATES OF AMERICA, DESCRIBING CERTAIN PIPE LINES AND ALL RIGHTS OF WAY, PERMITS AND LICENSES UNDER WHICH SAID PIPE LINES WERE INSTALLED, MAINTAINED AND OPERATED BY SAID GRANTOR.

REFERENCE BEING MADE TO SAID DOCUMENT FOR FULL PARTICULARS.

DESCRIPTION

THE LAND REFERRED TO HEREIN IS SITUATED IN THE STATE OF CALIFORNIA, PARTLY IN THE COUNTY OF ORANGE, AND PARTLY IN THE CITY OF BREA, AND IS DESCRIBED AS FOLLOWS:

PARCEL A:

GOVERNMENT LOT 3 AND THE NORTHWEST QUARTER OF THE SOUTHEAST QUARTER OF SECTION 8, TOWNSHIP 3 SOUTH, RANGE 9 WEST, SAN BERNARDINO MERIDIAN, ACCORDING THE OFFICIAL PLAT FILED IN THE DISTRICT LAND OFFICE FEBRUARY 17, 1868.

EXCEPTING THEREFROM THAT PORTION OF THE LAND LYING NORTHERLY OF THE SOUTHERLY LINE OF THE LAND DESCRIBED IN PARCELS 122, 122.1 AND 122.2 OF DEED TO COUNTY OF ORANGE, RECORDED JULY 31, 1975 IN BOOK 11471, PAGE 256 OF OFFICIAL RECORDS.

PARCEL B:

PARCEL B1:

LOT 4 AND THE SOUTH HALF OF THE SOUTHEAST QUARTER OF SECTION 8, TOWNSHIP 3 SOUTH, RANGE 9 WEST, SAN BERNARDINO MERIDIAN, ACCORDING TO THE OFFICIAL PLAT FILED IN THE DISTRICT LAND OFFICE, FEBRUARY 17, 1868.

EXCEPTING THEREFROM THAT PORTION LYING EASTERLY OF THE WESTERLY LINE OF TRACT NO. 100 AS DESCRIBED IN THAT CERTAIN DECLARATION OF TAKING RECORDED JUNE 1, 1960 IN BOOK 5269, PAGE 79 OF OFFICIAL RECORDS OF ORANGE COUNTY, CALIFORNIA.

ALSO EXCEPTING THEREFROM THAT PORTION LYING SOUTHWESTERLY OF THE NORTHEASTERLY LINE OF ROSE AVENUE AS DESCRIBED IN THAT CERTAIN QUITCLAIM DEED RECORDED APRIL 4, 1961 IN BOOK 5676, PAGE 994 OF SAID OFFICIAL RECORDS.

PARCEL B2:

THAT PORTION OF LOT 1 AND THE NORTHEAST QUARTER OF SECTION 17, TOWNSHIP 3 SOUTH, RANGE 9 WEST, SAN BERNARDINO MERIDIAN, ACCORDING TO THE OFFICIAL PLAT FILED IN THE DISTRICT LAND OFFICE FEBRUARY 17, 1868, LYING NORTHERLY OF THE NORTHERLY LINE OF THE OLINDA TRACT, AS SHOWN ON A MAP RECORDED IN BOOK 31, PAGES 37 AND 38 OF MISCELLANEOUS RECORDS, OF LOS ANGELES COUNTY, CALIFORNIA.

EXCEPTING THEREFROM THAT PORTION LYING EASTERLY, SOUTHERLY AND SOUTHEASTERLY OF THE WESTERLY, NORTHERLY AND NORTHWESTERLY LINES OF TRACTS NO. 100 AND 119 AS DESCRIBED IN THAT CERTAIN DECLARATION OF TAKING RECORDED JUNE 1, 1960 IN BOOK 5269, PAGE 79 OF OFFICIAL RECORDS OF ORANGE COUNTY, CALIFORNIA.

ALSO EXCEPTING THEREFROM THAT PORTION LYING SOUTHWESTERLY OF THE NORTHEASTERLY LINE OF ROSE AVENUE AS DESCRIBED IN THAT CERTAIN QUITCLAIM DEED RECORDED APRIL 4, 1961 IN BOOK 5676, PAGE 994 OF SAID OFFICIAL RECORDS.

PARCEL C: (CITY OF BREA)

PARCEL C1:

THAT PORTION OF FRACTIONAL SECTION 17, TOWNSHIP 3 SOUTH, RANGE 9 WEST, OF SAN BERNARDINO MERIDIAN, ACCORDING TO THE OFFICIAL PLAT OF SAID LAND FILED IN THE DISTRICT LAND OFFICE, FEBRUARY 17, 1868, ALSO SHOWN AS SECTION 17, TOWNSHIP 3 SOUTH, RANGE 9 WEST, AS PER MAP FILED IN BOOK 33, PAGE 37 OF RECORD OF SURVEYS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT DISTANT NORTH 89 DEG. 59' 47" WEST 364.72 FEET ALONG THE NORTHERLY LINE OF LOT 1 IN BLOCK 2 OF THE YORBA LINDA TRACT, AS PER MAP RECORDED IN BOOK 5, PAGES 17 AND 18 OF MISCELLANEOUS MAPS OF SAID COUNTY; THENCE NORTH 0 DEG. 29' 53" EAST 244.38 FEET; THENCE NORTH 49 DEG. 40' 54" WEST 1300.28 FEET; THENCE WEST 400.56 FEET; THENCE NORTH 23 DEG. 20' 42" WEST 99.79 FEET; THENCE NORTH 64 DEG. 39' 18" EAST 71.92 FEET; THENCE NORTH 1000.42 FEET; THENCE SOUTH 77 DEG. 50' 44" WEST 410.02 FEET; THENCE NORTH 22 DEG. 03' 08" WEST 119.58 FEET; THENCE NORTH 65 DEG. 59' 09" WEST 69.73 FEET; THENCE NORTH 85 DEG. 14' 54" WEST 123.49 FEET; THENCE SOUTH 48 DEG. 40' 32" WEST 138.43 FEET; THENCE SOUTH 29 DEG. 16' 05" WEST 102.70 FEET; THENCE SOUTH 13 DEG. 44' 44" WEST 74.07 FEET; THENCE SOUTH 88 DEG. 00' 18" WEST 22.68 FEET TO A POINT IN THE EASTERLY LINE OF ROSE DRIVE 60.00 FEET WIDE, AS DESCRIBED IN A QUITCLAIM DEED RECORDED ON APRIL 4, 1961 IN BOOK 5676, PAGE 994 OF OFFICIAL RECORDS OF SAID COUNTY; THENCE SOUTHERLY ALONG SAID EASTERLY LINE OF ROSE DRIVE TO THE NORTHERLY LINE OF SAID LOT 1 IN BLOCK 2; THENCE EASTERLY ALONG THE NORTHERLY LINE OF THE POINT OF BEGINNING.

PARCEL C2:

THAT PORTION OF BLOCK 64 OF THE OLINDA TRACT, AS SHOWN ON A MAP RECORDED IN BOOK 31, PAGES 37 AND 38 OF MISCELLANEOUS RECORDS OF LOS ANGELES COUNTY, CALIFORNIA, LYING EASTERLY OF THE EASTERLY LINE OF ROSE AVENUE, AS DESCRIBED IN THAT CERTAIN QUITCLAIM DEED RECORDED APRIL 4, 1966 IN BOOK 5676, PAGE 994 OF OFFICIAL RECORDS OF ORANGE COUNTY, CALIFORNIA.

EXCEPTING THEREFROM THAT PORTION LYING EASTERLY OF THE WESTERLY LINE OF TRACT NO. 119, AS DESCRIBED IN THAT CERTAIN DECLARATION OF TAKING RECORDED JUNE 1, 1960 IN BOOK 5269, PAGE 79 OF SAID OFFICIAL RECORDS.

ALSO EXCEPTING THEREFROM THAT PORTION INCLUDED WITHIN PARCEL C-1 HEREINABOVE DESCRIBED.

PARCEL D:

THAT PORTION OF THE EAST 1/2 OF SECTION 8, TOWNSHIP 3 SOUTH, RANGE 9 WEST, SAN BERNARDINO MERIDIAN, ACCORDING TO THE OFFICIAL PLAT FILED IN THE DISTRICT LAND OFFICE, FEBRUARY 17, 1868, DESCRIBED AS FOLLOWS:

BEGINNING AT THE CORNER COMMON TO SECTION 8, 9, 16 AND 17, SAID TOWNSHIP AND RANGE, ACCORDING TO THE MAP FILED IN BOOK 33, PAGE 37 OF RECORD OF SURVEYS, IN THE OFFICE OF THE COUNTY RECORDER OF ORANGE COUNTY, CALIFORNIA; THENCE ALONG THE EAST LINE OF SAID SECTION 8, NORTH 1° 20' 08" EAST 833.73 FEET; THENCE NORTH 88° 33' 38" WEST 416.85 FEET; THENCE NORTH 87° 58' 26" WEST 734.97 FEET TO THE TRUE POINT OF BEGINNING; THENCE NORTH 87° 58' 26" WEST 584.44 FEET; THENCE NORTH 1° 53' 04" EAST 858.64 FEET; THENCE NORTH 72° 45' 17" EAST 41.05 FEET; THENCE SOUTH 68° 24' 00" EAST 79.78 FEET; THENCE SOUTH 50° 28' 12" EAST 74.21

FEET; THENCE SOUTH 63° 45' 39" EAST 115.87 FEET; THENCE NORTH 20° 14' 32" EAST 49.82 FEET; THENCE SOUTH 88° 29' 08" EAST 73.17 FEET; THENCE SOUTH 62° 35' 09" EAST 63.00 FEET; THENCE SOUTH 48° 20' 43" EAST 185.08 FEET; THENCE SOUTH 45° 06' 24" EAST 115.78 FEET; THENCE SOUTH 23° 51' 00" EAST 118.24 FEET; THENCE SOUTH 3° 26' 36" EAST 208.34 FEET; THENCE SOUTH 6° 39' 41" WEST 51.00 FEET; THENCE SOUTH 19° 08' 21" WEST 95.94 FEET; THENCE SOUTH 31° 42' 38" WEST 106.31 FEET; THENCE SOUTH 63° 16' 52" WEST 58.65 FEET TO THE TRUE POINT OF BEGINNING.

EXCEPTING THEREFROM THAT PORTION DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT IN THE NORTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SAID SECTION 8, DISTANT 350.00 FEET NORTH 18° 40' 00" EAST FROM THE SOUTHWEST CORNER OF THE NORTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SAID SECTION 8; THENCE NORTH 66° 25' 00" EAST 102.70 FEET; THENCE NORTH 19° 29' 00" EAST 292.40 FEET; THENCE NORTH 162.50 FEET; THENCE NORTH 82° 05' 00" WEST 152.80 FEET; THENCE SOUTH 36° 45' 00" WEST 213.40 FEET; THENCE SOUTH, PARALLEL WITH AND DISTANT 25.00 FEET EAST FROM THE WEST LINE OF THE NORTHEAST QUARTER OF THE SOUTHEAST QUARTER OF SAID SECTION 8, A DISTANCE OF 130.00 FEET; THENCE SOUTH 23° 35' 00" EAST 217.50 FEET TO THE POINT OF BEGINNING.

ALSO EXCEPTING THEREFROM THAT PORTION INCLUDED WITHIN THE LAND DESCRIBED IN THE DEED TO THE STATE OF CALIFORNIA RECORDED DECEMBER 20, 1963 IN BOOK 6853, PAGE 373 OF OFFICIAL RECORDS OF SAID ORANGE COUNTY.

ALSO EXCEPTING THEREFROM ALL OIL, GAS, AND OTHER HYDROCARBON AND MINERAL SUBSTANCES AND GEOTHERMAL RIGHTS IN AND UNDER THE LAND, BUT WITHOUT THE RIGHT TO PENETRATE, USE OR DISTURB THE PROPERTY WITHIN 300 FEET OF THE SURFACE THEREOF, AS RESERVED BY SANTA FE ENERGY RESOURCES, INC., A DELAWARE CORPORATION IN THE GRANT DEED RECORDED AUGUST 9, 1996 AS INSTRUMENT NO. 19960408949 OF OFFICIAL RECORDS.

- INFORMATION WE RECEIVE FROM A CONSUMER REPORTING AGENCY.

USE OF INFORMATION

WE REQUEST INFORMATION FROM YOU FOR OUR OWN LEGITIMATE BUSINESS PURPOSES AND NOT FOR THE BENEFIT OF ANY NONAFFILIATED PARTY. THEREFORE, WE WILL NOT RELEASE YOUR INFORMATION TO NONAFFILIATED PARTIES EXCEPT: (1) AS NECESSARY FOR US TO PROVIDE THE PRODUCT OR SERVICE YOU HAVE REQUESTED OF US; OR (2) AS PERMITTED BY LAW. WE MAY, HOWEVER, STORE SUCH INFORMATION INDEFINITELY, INCLUDING THE PERIOD AFTER WHICH ANY CUSTOMER RELATIONSHIP HAS CEASED. SUCH INFORMATION MAY BE USED FOR ANY INTERNAL PURPOSE, SUCH AS QUALITY CONTROL EFFORTS OR CUSTOMER ANALYSIS. WE MAY ALSO PROVIDE ALL OF THE TYPES OF NONPUBLIC PERSONAL INFORMATION LISTED ABOVE TO ONE OR MORE OF OUR AFFILIATED COMPANIES. SUCH AFFILIATED COMPANIES INCLUDE FINANCIAL SERVICE PROVIDERS, SUCH AS TITLE INSURERS, PROPERTY AND CASUALTY INSURERS, AND TRUST AND INVESTMENT ADVISORY COMPANIES, OR COMPANIES INVOLVED IN REAL ESTATE SERVICES, SUCH AS APPRAISAL COMPANIES, HOME WARRANTY COMPANIES, AND ESCROW COMPANIES. FURTHERMORE, WE MAY ALSO PROVIDE ALL THE INFORMATION WE COLLECT, AS DESCRIBED ABOVE, TO COMPANIES THAT PERFORM MARKETING SERVICES ON OUR BEHALF, ON BEHALF OF OUR AFFILIATED COMPANIES, OR TO OTHER FINANCIAL INSTITUTIONS WITH WHOM WE OR OUR AFFILIATED COMPANIES HAVE JOINT MARKETING AGREEMENTS.

FORMER CUSTOMERS

EVEN IF YOU ARE NO LONGER OUR CUSTOMER, OUR PRIVACY POLICY WILL CONTINUE TO APPLY TO YOU.

CONFIDENTIALITY AND SECURITY

WE WILL USE OUR BEST EFFORTS TO ENSURE THAT NO UNAUTHORIZED PARTIES HAVE ACCESS TO ANY OF YOUR INFORMATION. WE RESTRICT ACCESS TO NONPUBLIC PERSONAL INFORMATION ABOUT YOU TO THOSE INDIVIDUALS AND ENTITIES WHO NEED TO KNOW THAT INFORMATION TO PROVIDE PRODUCTS OR SERVICES TO YOU. WE WILL USE OUR BEST EFFORTS TO TRAIN AND OVERSEE OUR EMPLOYEES AND AGENTS TO ENSURE THAT YOUR INFORMATION WILL BE HANDLED RESPONSIBLY AND IN ACCORDANCE WITH THIS PRIVACY POLICY AND FIRST AMERICAN'S *FAIR INFORMATION VALUES*. WE CURRENTLY MAINTAIN PHYSICAL, ELECTRONIC, AND PROCEDURAL SAFEGUARDS THAT COMPLY WITH FEDERAL REGULATIONS TO GUARD YOUR NONPUBLIC PERSONAL INFORMATION.

NOTICE

SECTION 12413.1 OF THE CALIFORNIA INSURANCE CODE, EFFECTIVE JANUARY 1, 1990, REQUIRES THAT ANY TITLE INSURANCE COMPANY, UNDERWRITTEN TITLE COMPANY, OR CONTROLLED ESCROW COMPANY HANDLING FUNDS IN AN ESCROW OR SUB-ESCROW CAPACITY, WAIT A SPECIFIED NUMBER OF DAYS AFTER DEPOSITING FUNDS, BEFORE RECORDING ANY DOCUMENTS IN CONNECTION WITH THE TRANSACTION OR DISBURSING FUNDS. THIS STATUTE ALLOWS FOR FUNDS DEPOSITED BY WIRE TRANSFER TO BE DISBURSED THE SAME DAY AS DEPOSIT. IN THE CASE OF CASHIER'S CHECKS OR CERTIFIED CHECKS, FUNDS MAY BE DISBURSED THE NEXT DAY AFTER DEPOSIT. IN ORDER TO AVOID UNNECESSARY DELAYS OF THREE TO SEVEN DAYS, OR MORE, PLEASE USE WIRE TRANSFER, CASHIER'S CHECKS, OR CERTIFIED CHECKS WHENEVER POSSIBLE.

IF YOU HAVE ANY QUESTIONS ABOUT THE EFFECT OF THIS NEW LAW, PLEASE CONTACT YOUR LOCAL FIRST AMERICAN OFFICE FOR MORE DETAILS.

.....

NOTICE

IN ACCORDANCE WITH SECTIONS 18662 AND 18668 OF THE REVENUE AND TAXATION CODE, A BUYER MAY BE REQUIRED TO WITHHOLD AN AMOUNT EQUAL TO THREE AND ONE-THIRD PERCENT OF THE SALES PRICE IN THE CASE OF THE DISPOSITION OF CALIFORNIA REAL PROPERTY INTEREST BY EITHER:

1. A SELLER WHO IS AN INDIVIDUAL WITH A LAST KNOWN STREET ADDRESS OUTSIDE OF CALIFORNIA OR WHEN THE DISBURSEMENT INSTRUCTIONS AUTHORIZE THE PROCEEDS BE SENT TO A FINANCIAL INTERMEDIARY OF THE SELLER, OR

2. A CORPORATE SELLER WHICH HAS NO PERMANENT PLACE OF BUSINESS IN CALIFORNIA

THE BUYER MAY BECOME SUBJECT TO PENALTY FOR FAILURE TO WITHHOLD AN AMOUNT EQUAL TO THE GREATER OF 10 PERCENT OF THE AMOUNT REQUIRED TO BE WITHHELD OR FIVE HUNDRED DOLLARS ($500).

HOWEVER, NOTWITHSTANDING ANY OTHER PROVISION INCLUDED IN THE CALIFORNIA STATUTES REFERENCED ABOVE, NO BUYER WILL BE REQUIRED TO WITHHOLD ANY AMOUNT OR BE SUBJECT TO PENALTY FOR FAILURE TO WITHHOLD IF:

1. THE SALES PRICE OF THE CALIFORNIA REAL PROPERTY CONVEYED DOES NOT EXCEED ONE HUNDRED THOUSAND DOLLARS ($100,000), OR

2. THE SELLER EXECUTES A WRITTEN CERTIFICATE, UNDER THE PENALTY OF PERJURY, CERTIFYING THAT THE SELLER IS A RESIDENT OF CALIFORNIA, OR IF A CORPORATION, HAS A PERMANENT PLACE OF BUSINESS IN CALIFORNIA, OR

3. THE SELLER, WHO IS AN INDIVIDUAL, EXECUTES A WRITTEN CERTIFICATE, UNDER THE PENALTY OF PERJURY, THAT THE CALIFORNIA REAL PROPERTY BEING CONVEYED IS THE SELLER'S PRINCIPAL RESIDENCE (AS DEFINED IN SECTION 1034 OF THE INTERNAL REVENUE CODE).

THE SELLER IS SUBJECT TO PENALTY FOR KNOWINGLY FILING A FRAUDULENT CERTIFICATE FOR THE PURPOSE OF AVOIDING THE WITHHOLDING REQUIREMENT.

THE CALIFORNIA STATUTES REFERENCED ABOVE INCLUDE PROVISIONS WHICH AUTHORIZE THE FRANCHISE TAX BOARD TO GRANT REDUCED WITHHOLDING AND WAIVERS FROM WITHHOLDING ON A CASE-BY-CASE BASIS.

THE PARTIES TO THIS TRANSACTION SHOULD SEEK AN ATTORNEY'S, ACCOUNTANT'S, OR OTHER TAX SPECIALIST'S OPINION CONCERNING THE EFFECT OF THIS LAW ON THIS TRANSACTION AND SHOULD NOT ACT ON ANY STATEMENTS MADE OR OMITTED BY THE ESCROW OR CLOSING OFFICER.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (By Policy Type)

1. CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990
SCHEDULE B

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notice of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land, (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by their policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

2. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970
SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions of area of the land, or the effect of any violation of any such law, ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant; (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder, (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy, or (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.

3. AMERICAN LAND TITLE ASSOCIATION OWNERS POLICY FORM B - 1970
WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 2 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:

Part One

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims, reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material heretofore or hereafter furnished, imposed by law and not shown by the public records.

4. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970 WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE SCHEDULE OF EXCLUSIONS FROM COVERAGE

1 Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions or area of the land, or the effect of any violation of any such law ordinance or governmental regulation.

2 Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy

3 Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant; (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy or acquired the insured mortgage and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder; (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy (except to the extent insurance is afforded herein as to any statutory lien for labor or material or to the extent insurance is afforded herein as to assessments for street improvements under construction or completed at Date of Policy).

4 Unenforceability of the lien of the insured mortgage because of failure of the insured at Date of Policy or of any subsequent owner of the indebtedness to comply with applicable "doing business" laws of the state in which the land is situated.

5. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970 WITH REGIONAL EXCEPTIONS

When the American Land Title Association Lenders Policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy, the exclusions set forth in paragraph 4 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:

Part One

1 Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

2 Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.

3 Easements, claims of easement or encumbrances which are not shown by the public records.

4 Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.

5 Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.

6 Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

6. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land, (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

2 Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to the Date of Policy which would be binding on the rights of a purchaser for value without knowledge.

3 Defects, liens, encumbrances, adverse claims, or other matters:

   (a) created, suffered, assumed or agreed to by the insured claimant;

   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;

   (c) resulting in no loss or damage to the insured claimant;

   (d) attaching or created subsequent to Date of Policy (except to the extent that this policy insures the priority of the lien of the insured mortgage over any statutory lien for services, labor or material or the extent insurance is afforded herein as to assessments for street improvements under construction or completed at date of policy); or

   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage.

4 Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable "doing business" laws of the state in which the land is situated.

5 Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.

6 Any statutory lien for services, labor or materials (or the claim of priority of any statutory lien for services, labor or materials over the lien of the insured mortgage) arising from an improvement or work related to the land which is contracted for and commenced subsequent to Date of Policy and is not financed in whole or in part by proceeds of the indebtedness secured by the insured mortgage which at Date of Policy the insured has advanced or is obligated to advance.

7 Any claim, which arises out of the transaction creating the interest of the mortgagee insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:

   (i) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or

   (ii) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or

   (iii) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:

      (a) to timely record the instrument of transfer; or

      (b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

7. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 6 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

8. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992 EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land, (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part, or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to the Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (i) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
   (ii) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:
      (a) to timely record the instrument of transfer; or
      (b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

9. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 8 above are used and the following exceptions to coverage appear in the policy

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

Part One

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims, reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

10. AMERICAN LAND TITLE ASSOCIATION RESIDENTIAL TITLE INSURANCE POLICY - 1987 EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning
   - land use
   - land division
   - improvements on the land
   - environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.
   This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
   - a notice of exercising the right appears in the public records on the Policy Date
   - the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking.
3. Title Risks
   - that are created, allowed, or agreed to by you
   - that are known to you, but not to us, on the Policy Date - unless they appeared in the public records
   - that result in no loss to you
   - that first affect your title after the Policy Date - this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:
   - to any land outside the area specifically described and referred to in Item 3 of Schedule A, or
   - in streets, alleys, or waterways that touch your land

   This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

ADDENDUM TO EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (By Policy Type)

11. EAGLE PROTECTION OWNER'S POLICY

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE – 1998
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE – 1998

Covered Risks 14 (Subdivision Law Violation), 15 (Building Permit), 16 (Zoning) and 18 (Encroachment of boundary walls or fences) are Subject to Deductible Amounts and Maximum Dollar Limits of Liability

EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes ordinances, laws and regulations concerning:
   a. building
   b. zoning
   c. land use
   d. improvements on the land
   e. land division
   f. environmental protection

   This Exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.

   This Exclusion does not limit the coverage described in Covered Risk 14, 15, 16, 17 or 24.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at the Policy Date.
3. The right to take the Land by condemning it, unless:
   a. a notice of exercising the right appears in the Public Records at the Policy Date; or
   b. the taking happened before the Policy Date and is binding on You if You bought the Land without Knowing of the taking.
4. Risks
   a. that are created, allowed, or agreed to by You, whether or not they appear in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they appear in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date – this does not limit the coverage described in Covered Risk 7, 8.d, 22, 23, 24 or 25.
5. Failure to pay value for Your Title.
6. Lack of a right
   a. to any Land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

   This Exclusion does not limit the coverage described in Covered Risk 11 or 18.

12. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE WITH EAGLE PROTECTION ADDED

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any, law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the Land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the Land; (iii) a separation in ownership or a change in the dimensions or area of the Land or any parcel of which the Land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the Land has been recorded in Public Records at Date of Policy. This exclusion does not limit the coverage provided under insuring provisions 14, 15, 16 and 24 of this policy.

   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the Public Records at Date of Policy. This exclusion does not limit the coverage provided under insuring provisions 14, 15, 16 and 24 of this policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the Public Records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without Knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) created, suffered, assumed or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (this paragraph (d) does not limit the coverage provided under insuring provisions 7, 8, 16, 17, 19, 20, 21, 23, 24 and 25); or
   (e) resulting in loss or damage which would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of the Insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable doing business laws of the state in which the Land is situated.

5. Invalidity or unenforceability of the lien of the ed Mortgage, or claim thereof, which arises out of the action evidenced by the Insured Mortgage and is based upon:
   (a) usury, except as provided under insuring provision 10 of this policy; or
   (b) any consumer credit protection or truth in lending law.

6. Taxes or assessments of any taxing or assessment authority which become a lien on the Land subsequent to Date of Policy.

7. Any claim, which arises out of the transaction creating the interest of the mortgage insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (a) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or
   (b) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
   (c) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
      (i) to timely record the instrument of transfer; or
      (ii) of such recordation of impart notice to a purchaser for value or a judgment or lien creditor.

8. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This exclusion does not limit the coverage provided under insuring provision 7.

9. Lack of priority of the lien of the Insured Mortgage as to each and every advance made after Date of Policy, and all interest charged thereon, over liens, encumbrances and other matters affecting title, the existence of which are Known to the Insured at:
   (a) The time of the advance; or
   (b) The time a modification is made to the terms of the Insured Mortgage which changes the rate of interest charged, if the rate of interest is greater as a result of the modification than it would have been before the modification.

   This exclusion does not limit the coverage provided under insuring provision 7.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Environmental protection liens provided for by the following existing statutes, which liens will have priority over the lien of the Insured Mortgage when they arise: NONE.

13. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY – 1992 WITH EAGLE PROTECTION ADDED WITH REGIONAL EXCEPTIONS

When the American Land Title Association loan policy with EAGLE Protection Added is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 12 above are used and the following exceptions to coverage appear in the policy:

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

Part One:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims, reservations or exceptions in patents or in acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

Part Two:

1. Environmental protection liens provided for by the following existing statutes, which liens will have priority over the lien of the Insured Mortgage when they arise: NONE.

IN RESPONSE TO THE ABOVE REFERENCED APPLICATION FOR A POLICY OF TITLE INSURANCE, THIS COMPANY HEREBY REPORTS THAT IT IS PREPARED TO ISSUE, OR CAUSE TO BE ISSUED, AS OF THE DATE HEREOF, A POLICY OR POLICIES OF TITLE INSURANCE DESCRIBING THE LAND AND THE ESTATE OR INTEREST THEREIN HEREINAFTER SET FORTH, INSURING AGAINST LOSS WHICH MAY BE SUSTAINED BY REASON OF ANY DEFECT, LIEN OR ENCUMBRANCE NOT SHOWN OR REFERRED TO AS AN EXCEPTION BELOW OR NOT EXCLUDED FROM COVERAGE PURSUANT TO THE PRINTED SCHEDULES, CONDITIONS AND STIPULATIONS OF THE POLICY FORMS.

THE PRINTED EXCEPTIONS AND EXCLUSIONS FROM THE COVERAGE OF THE POLICY OR POLICIES ARE SET FORTH IN EXHIBIT A ATTACHED. COPIES OF THE POLICY FORMS SHOULD BE READ. THEY ARE AVAILABLE FROM THE OFFICE WHICH ISSUED THIS REPORT.

THIS REPORT (AND ANY SUPPLEMENTS OR AMENDMENTS HERETO) IS ISSUED SOLELY FOR THE PURPOSE OF FACILITATING THE ISSUANCE OF A POLICY OF TITLE INSURANCE AND NO LIABILITY IS ASSUMED HEREBY. IF IT IS DESIRED THAT LIABILITY BE ASSUMED PRIOR TO THE ISSUANCE OF A POLICY OF TITLE INSURANCE, A BINDER OR COMMITMENT SHOULD BE REQUESTED.

PLEASE READ THE EXCEPTIONS SHOWN OR REFERRED TO BELOW AND THE EXCEPTIONS AND EXCLUSIONS SET FORTH IN EXHIBIT A OF THIS REPORT CAREFULLY. THE EXCEPTIONS AND EXCLUSIONS ARE MEANT TO PROVIDE YOU WITH NOTICE OF MATTERS WHICH ARE NOT COVERED UNDER THE TERMS OF THE TITLE INSURANCE POLICY AND SHOULD BE CAREFULLY CONSIDERED.

IT IS IMPORTANT TO NOTE THAT THIS PRELIMINARY REPORT IS NOT A WRITTEN REPRESENTATION AS TO THE CONDITION OF TITLE AND MAY NOT LIST ALL LIENS, DEFECTS, AND ENCUMBRANCES AFFECTING TITLE TO THE LAND.

DATED AS OF **DECEMBER 22, 1998** AT 7:30 A.M.

BY RONALD J. GOMEZ - TITLE OFFICER

THE FORM OF POLICY OF TITLE INSURANCE CONTEMPLATED BY THIS REPORT IS:

AMERICAN LAND TITLE ASSOCIATION OWNERS POLICY.

TITLE TO THE ESTATE OR INTEREST AT THE DATE HEREOF IS VESTED IN:

CALRESOURCES LLC, A CALIFORNIA LIMITED LIABILITY COMPANY.

THE ESTATE OR INTEREST IN THE LAND HEREINAFTER DESCRIBED OR REFERRED TO COVERED BY THIS REPORT IS:

A FEE.

AT THE DATE HEREOF EXCEPTIONS TO COVERAGE IN ADDITION TO THE PRINTED EXCEPTIONS AND EXCLUSIONS IN THE POLICY FORM WOULD BE AS FOLLOWS:

1. SECOND INSTALLMENT GENERAL AND SPECIAL TAXES FOR THE FISCAL YEAR 1998-1999, NOW A LIEN NOT YET DELINQUENT; AMOUNT $149,320.63;
CODE AREA: 78-072.
A. P. NO.: 320-071-27 AND 320-073-04.

2. THE LIEN OF SUPPLEMENTAL TAXES ASSESSED PURSUANT TO CHAPTER 3.5 COMMENCING WITH SECTION 75 OF THE CALIFORNIA REVENUE AND TAXATION CODE.

3. THE RESERVATION FOR ROADS, RAILROADS AND DITCHES OF A STRIP OF LAND 30 FEET WIDE, ALONG, ADJOINING AND EACH SIDE OF THE TOWNSHIP AND SECTION LINES, AND THE RESERVATION FOR ROADS, RAILROADS AND DITCHES OF A STRIP OF LAND 20 FEET WIDE, ALONG, ADJOINING AND EACH SIDE OF THE QUARTER SECTION LINES, AND THE RESERVATION OF THE USE AND CONTROL OF CIENEGAS AND NATURAL STREAMS OF WATER, IF ANY, NATURALLY UPON, FLOWING ACROSS, INTO OR BY SAID TRACT, AND THE RIGHT OF WAY FOR AND TO CONSTRUCT IRRIGATION OR DRAINAGE DITCHES THROUGH SAID TRACT TO IRRIGATE OR DRAIN THE ADJACENT LAND, AS CONTAINED IN DEED FROM STEARNS RANCHO COMPANY TO CHARLES VICTOR HALL, RECORDED MARCH 18, 1906 IN BOOK 91, PAGE 192 OF DEEDS.

4. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED SEPTEMBER 27, 1906 IN BOOK 138, PAGE 266 OF DEEDS,
IN FAVOR OF: CHARLES A. MEYER, JR.
FOR: A RIGHT OF WAY 30 INCHES IN WIDTH FOR PIPE LINE FOR OIL OR GAS, WITH THE RIGHT TO ERECT, OPERATE AND MAINTAIN TELEPHONE POLES, AND INCIDENTAL PURPOSES.
OVER: A PORTION OF THE LAND.

SAID RIGHT OF WAY WAS ASSIGNED TO FULLERTON OIL COMPANY BY ENDORSEMENT ON SAID DEED.

5. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED SEPTEMBER 27, 1912 IN BOOK 219, PAGE 349 OF DEEDS,
IN FAVOR OF: UNION OIL COMPANY OF CALIFORNIA.
FOR: RIGHT OF WAY FOR MAINTENANCE OF A PIPE LINE FOR THE TRANSPORTATION OF OIL, AND INCIDENTAL PURPOSES.

6. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED JANUARY 21, 1914 IN BOOK 244, PAGE 266 OF DEEDS,
IN FAVOR OF: THE COUNTY OF ORANGE.
FOR: A RIGHT OF WAY FOR ROAD PURPOSES AND INCIDENTAL PURPOSES.
OVER: THE EASTERLY PORTION OF THE LAND.

7. THE EFFECT OF MAPS PURPORTING TO SHOW THE HEREIN DESCRIBED AND OTHER LAND RECORDED IN BOOK 13, PAGE 8; AND IN BOOK 51, PAGE 31, BOTH OF RECORD OF SURVEYS.

8. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED JUNE 10, 1957 IN BOOK 3936, PAGE 324 OF OFFICIAL RECORDS,
IN FAVOR OF: BREA CHEMICALS, INC.
FOR: RIGHT OF WAY FOR A ROADWAY, AND INCIDENTAL PURPOSES.
OVER: THE WESTERLY PORTION OF THE LAND AND OTHER LAND.

THE OWNER OF THE HEREIN DESCRIBED LAND DID NOT JOIN IN THE EXECUTION OF SAID DEED.

9. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED JANUARY 16, 1968 IN BOOK 8493, PAGE 555 OF OFFICIAL RECORDS,
IN FAVOR OF: SOUTHERN CALIFORNIA EDISON COMPANY.
FOR: POLE LINES, CONDUITS AND INCIDENTAL PURPOSES.
OVER: A PORTION OF THE LAND DESCRIBED AS FOLLOWS:

A STRIP OF LAND 12 FEET IN WIDTH, LYING WITHIN THE SOUTHWEST QUARTER OF SECTION 8, TOWNSHIP 3 SOUTH, RANGE 9 WEST, SAN BERNARDINO BASE AND MERIDIAN, THE CENTERLINE OF SAID STRIP BEING DESCRIBED AS FOLLOWS:

COMMENCING AT THE NORTHWEST CORNER OF SAID SOUTHWEST QUARTER; THENCE, NORTH 89° 15' 30" EAST 2292.07 FEET; THENCE, SOUTH 4° 18' EAST 220 FEET TO THE TRUE POINT OF BEGINNING; THENCE, SOUTHWESTERLY 39 FEET TO A POINT IN A LINE PARALLEL WITH AND DISTANT WESTERLY, MEASURED AT RIGHT ANGLES FROM THE EASTERLY LINE OF THE RANCHO SAN JUAN CAJON DE SANTA ANA, 17 FEET; THENCE, SOUTH 89° 15' 30" WEST 45 FEET.

10. A COMMUNITY OIL AND GAS LEASE EXECUTED BY GETTY OIL COMPANY, A DELAWARE CORPORATION, AS LESSOR, AND BY CRESTMONT OIL AND GAS COMPANY, A CORPORATION, AS LESSEE, RECORDED JULY 10, 1973 IN BOOK 10792, PAGE 435 OF OFFICIAL RECORDS, TO WHICH RECORD REFERENCE IS MADE FOR FULL PARTICULARS.

NOTE 1: THE LESSEE'S INTEREST UNDER SAID OIL AND GAS LEASE HAS BEEN ASSIGNED TO SHELL WESTERN E&P INC., BY ASSIGNMENT WHICH RECORDED FEBRUARY 16, 1989 AS INSTRUMENT NO. 89-082771 OF OFFICIAL RECORDS, REFERENCE BEING HEREBY MADE TO THE RECORD THEREOF FOR FULL PARTICULARS.

NOTE 2: VARIOUS INSTRUMENTS APPEAR OF RECORD AFFECTING OR PURPORTING TO AFFECT THE LEASEHOLD INTEREST UNDER SAID LEASE, BUT THIS TITLE EVIDENCE DOES NOT COVER AN EXAMINATION OF OR INSURANCE AS TO THE EFFECT THEREOF, OR THE PRESENT OWNERSHIP OR CONDITIONS OF SAID LEASEHOLD.

11. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED APRIL 2, 1982 AS INSTRUMENT NO. 82-115963 OF OFFICIAL RECORDS,
IN FAVOR OF: SOUTHERN CALIFORNIA EDISON COMPANY.
FOR: AERIAL AND UNDERGROUND ELECTRICAL FACILITIES, AND INCIDENTAL PURPOSES.
OVER: A PORTION OF THE LAND.

12. THE EFFECT OF A QUITCLAIM DEED, DATED JULY 26, 1982, EXECUTED BY CRESTMONT OIL AND GAS COMPANY, A CORPORATION, WHICH PURPORTEDLY CONVEYS A PORTION OF THE LAND (LAMBERT ROAD) TO THE COUNTY OF ORANGE, RECORDED NOVEMBER 3, 1982 AS INSTRUMENT NO. 82-386175 OF OFFICIAL RECORDS.

13. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED MARCH 2, 1983 AS INSTRUMENT NO. 83-091173 OF OFFICIAL RECORDS,
IN FAVOR OF: SOUTHERN CALIFORNIA EDISON COMPANY, A CORPORATION.
FOR: ELECTRICAL SYSTEMS AND COMMUNICATION SYSTEMS, AND INCIDENTAL PURPOSES.
OVER: A PORTION OF THE LAND.

14. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED MAY 6, 1983 AS INSTRUMENT NO. 83-193206 OF OFFICIAL RECORDS,
IN FAVOR OF: THE COUNTY OF ORANGE.
FOR: STREET SIGNAL INSTALLATION, OPERATION AND MAINTENANCE, AND INCIDENTAL PURPOSES.
OVER: A PORTION OF THE LAND (ADJACENT TO LAMBERT ROAD).

15. AN EASEMENT AS SET FORTH IN AN INSTRUMENT RECORDED SEPTEMBER 18, 1986 AS INSTRUMENT NOS. 86-429084 AND 86-429085, BOTH OF OFFICIAL RECORDS,
IN FAVOR OF: THE COUNTY OF ORANGE.
FOR: SLOPE PURPOSES AND INCIDENTAL PURPOSES.
OVER: A PORTION OF THE LAND (ADJACENT TO LAMBERT ROAD).

16. AN UNRECORDED LEASE, EXECUTED BY TEXACO PRODUCING INC., AS LESSOR, AND BERGEN NURSERIES, AS LESSEE, FOR THE TERM, AND UPON THE TERMS, COVENANTS AND CONDITIONS PROVIDED THEREIN, AS DISCLOSED BY A QUITCLAIM DEED RECORDED SEPTEMBER 18, 1986 AS INSTRUMENT NO. 86-429084 OF OFFICIAL RECORDS.

17. THE TERMS, PROVISIONS AND CONDITIONS CONTAINED IN A DOCUMENT ENTITLED "PIPELINE EASEMENT AND SURFACE AGREEMENT", EXECUTED BY AND BETWEEN TEXACO EXPLORATION AND PRODUCTION INC., A DELAWARE CORPORATION AND UNION OIL COMPANY OF CALIFORNIA DBA UNOCAL, A CALIFORNIA CORPORATION, RECORDED JUNE 25, 1993 AS INSTRUMENT NO. 93-0427768 OF OFFICIAL RECORDS.

NOTICE

SECTION 12413.1 OF THE CALIFORNIA INSURANCE CODE, EFFECTIVE JANUARY 1, 1990, REQUIRES THAT ANY TITLE INSURANCE COMPANY, UNDERWRITTEN TITLE COMPANY, OR CONTROLLED ESCROW COMPANY HANDLING FUNDS IN AN ESCROW OR SUB-ESCROW CAPACITY, WAIT A SPECIFIED NUMBER OF DAYS AFTER DEPOSITING FUNDS, BEFORE RECORDING ANY DOCUMENTS IN CONNECTION WITH THE TRANSACTION OR DISBURSING FUNDS. THIS STATUTE ALLOWS FOR FUNDS DEPOSITED BY WIRE TRANSFER TO BE DISBURSED THE SAME DAY AS DEPOSIT. IN THE CASE OF CASHIER'S CHECKS OR CERTIFIED CHECKS, FUNDS MAY BE DISBURSED THE NEXT DAY AFTER DEPOSIT. IN ORDER TO AVOID UNNECESSARY DELAYS OF THREE TO SEVEN DAYS, OR MORE, PLEASE USE WIRE TRANSFER, CASHIER'S CHECKS, OR CERTIFIED CHECKS WHENEVER POSSIBLE.

IF YOU HAVE ANY QUESTIONS ABOUT THE EFFECT OF THIS NEW LAW, PLEASE CONTACT YOUR LOCAL FIRST AMERICAN OFFICE FOR MORE DETAILS.

* * * * * * * * * * * * * *

NOTICE

IN ACCORDANCE WITH SECTIONS 18662 AND 18668 OF THE REVENUE AND TAXATION CODE, A BUYER MAY BE REQUIRED TO WITHHOLD AN AMOUNT EQUAL TO THREE AND ONE-THIRD PERCENT OF THE SALES PRICE IN THE CASE OF THE DISPOSITION OF CALIFORNIA REAL PROPERTY INTEREST BY EITHER:

1. A SELLER WHO IS AN INDIVIDUAL WITH A LAST KNOWN STREET ADDRESS OUTSIDE OF CALIFORNIA OR WHEN THE DISBURSEMENT INSTRUCTIONS AUTHORIZE THE PROCEEDS BE SENT TO A FINANCIAL INTERMEDIARY OF THE SELLER, OR

2. A CORPORATE SELLER WHICH HAS NO PERMANENT PLACE OF BUSINESS IN CALIFORNIA.

THE BUYER MAY BECOME SUBJECT TO PENALTY FOR FAILURE TO WITHHOLD AN AMOUNT EQUAL TO THE GREATER OF 10 PERCENT OF THE AMOUNT REQUIRED TO BE WITHHELD OR FIVE HUNDRED DOLLARS ($500).

HOWEVER, NOTWITHSTANDING ANY OTHER PROVISION INCLUDED IN THE CALIFORNIA STATUTES REFERENCED ABOVE, NO BUYER WILL BE REQUIRED TO WITHHOLD ANY AMOUNT OR BE SUBJECT TO PENALTY FOR FAILURE TO WITHHOLD IF:

1. THE SALES PRICE OF THE CALIFORNIA REAL PROPERTY CONVEYED DOES NOT EXCEED ONE HUNDRED THOUSAND DOLLARS ($100,000), OR

2. THE SELLER EXECUTES A WRITTEN CERTIFICATE, UNDER THE PENALTY OF PERJURY, CERTIFYING THAT THE SELLER IS A RESIDENT OF CALIFORNIA, OR IF A CORPORATION, HAS A PERMANENT PLACE OF BUSINESS IN CALIFORNIA, OR

3. THE SELLER, WHO IS AN INDIVIDUAL, EXECUTES A WRITTEN CERTIFICATE, UNDER THE PENALTY OF PERJURY, THAT THE CALIFORNIA REAL PROPERTY BEING CONVEYED IS THE SELLER'S PRINCIPAL RESIDENCE (AS DEFINED IN SECTION 1034 OF THE INTERNAL REVENUE CODE).

THE SELLER IS SUBJECT TO PENALTY FOR KNOWINGLY FILING A FRAUDULENT CERTIFICATE FOR THE PURPOSE OF AVOIDING THE WITHHOLDING REQUIREMENT.

THE CALIFORNIA STATUTES REFERENCED ABOVE INCLUDE PROVISIONS WHICH AUTHORIZE THE FRANCHISE TAX BOARD TO GRANT REDUCED WITHHOLDING AND WAIVERS FROM WITHHOLDING ON A CASE-BY-CASE BASIS.

THE PARTIES TO THIS TRANSACTION SHOULD SEEK AN ATTORNEY'S, ACCOUNTANT'S, OR OTHER TAX SPECIALIST'S OPINION CONCERNING THE EFFECT OF THIS LAW ON THIS TRANSACTION AND SHOULD NOT ACT ON ANY STATEMENTS MADE OR OMITTED BY THE ESCROW OR CLOSING OFFICER.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of November 24, 2008 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

Aera Energy LLC, a California limited liability company, formerly known as CalResources LLC, a California limited liability company

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2008-2009.

First Installment:	$27,751.72, PAYABLE
Penalty:	$0.00
Second Installment:	$27,751.72, PAYABLE
Penalty:	$0.00
Tax Rate Area:	53-000
A. P. No.:	320-071-29

2. General and special taxes and assessments for the fiscal year 2008-2009.

First Installment:	$11,911.97, PAYABLE
Penalty:	$0.00
Second Installment:	$11,911.97, PAYABLE
Penalty:	$0.00
Tax Rate Area:	53-000
A. P. No.:	320-073-07

3. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

4. The reservation for roads, railroads and ditches of a strip of land 30 feet wide, along, adjoining and each side of the township and section lines, and the reservation for roads, railroads and

OK (3) (12-98 PTR)

ditches of a strip of land 20 feet wide, along, adjoining and each side of the quarter section lines, and the reservation of the use and control of cienegas and natural streams of water, if any, naturally upon, flowing across, into or by said tract, and the right of way for and to construct irrigation or drainage ditches through said tract to irrigate or drain the adjacent land, as contained in deed from Stearns Rancho Company to Charles Victor Hall, recorded March 18, 1906 in Book 91, Page 192 of Deeds.

12-98 ITR Ref

21. An easement for slope construction, repair, maintenance and incidental purposes, recorded March 11, 2003 as Instrument No. 2003000262412 of Official Records.
In Favor of: County of Orange, a body corporate and politic
Affects: As described therein

Document re-recorded January 29, 2004 as Instrument No. 2004000069062 of Official Records.

22. An unrecorded lease dated February 1, 2007, executed by Aera Energy LLC as lessor and Linn Energy, LLC, Linn Energy Holdings, LLC, Linn Western Operating, Inc., and Blacksand Energy, LLC as lessee, as disclosed by a Memorandum of Oil and Gas Lease (Brea-Olinda) recorded March 20, 2007 as Instrument No. 2007000177884 of Official Records.

Defects, liens, encumbrances or other matters affecting the leasehold estate, whether or not shown by the public records.

23. Rights of parties in possession.

Prior to the issuance of any policy of title insurance, the Company will require:

24. With respect to Aera Energy LLC, a California limited liability company:
a. A copy of its operating agreement and any amendments thereto;
b. If it is a California limited liability company, that a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) be recorded in the public records;
c. If it is a foreign limited liability company, that a certified copy of its application for registration (LLC-5) be recorded in the public records;
d. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, that such document or instrument be executed in accordance with one of the following, as appropriate:
(i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such document must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
(ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
e. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

ALSO EXCEPTING THEREFROM THAT PORTION DESCRIBED IN THE DEED TO THE COUNTY OF ORANGE RECORDED MARCH 11, 2003 AS INSTRUMENT NO. 2003000262411 OF OFFICIAL RECORDS OF SAID ORANGE COUNTY.

APN: 320-071-29 and 320-073-07

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

If you have any questions about the effect of this new law, please contact your local First American Office for more details.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

1. CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990
SCHEDULE B

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notice of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by their policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

2. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970
SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions of area of the land, or the effect of any violation of any such law, ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant; (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder; (c) resulting in no loss or damage to the insured claimant; (d) attaching or

created subsequent to Date of Policy; or (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.

3. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 2 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material heretofore or hereafter furnished, imposed by law and not shown by the public records.

4. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970 WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions or area of the land, or the effect of any violation of any such law ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant, (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy or acquired the insured mortgage and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder, (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy (except to the extent insurance is afforded herein as to any statutory lien for labor or material or to the extent insurance is afforded herein as to assessments for street improvements under construction or completed at Date of Policy).
4. Unenforceability of the lien of the insured mortgage because of failure of the insured at Date of Policy or of any subsequent owner of the indebtedness to comply with applicable "doing business" laws of the state in which the land is situated.

5. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970 WITH REGIONAL EXCEPTIONS

When the American Land Title Association Lenders Policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy, the exclusions set forth in paragraph 4 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

6. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992
WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy;
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy (except to the extent that this policy insures the priority of the lien of the insured mortgage over any statutory lien for services, labor or material or the extent insurance is afforded herein as to assessments for street improvements under construction or completed at date of policy); or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any statutory lien for services, labor or materials (or the claim of priority of any statutory lien for services, labor or materials over the lien of the insured mortgage) arising from an improvement or work related to the land which is contracted for and commenced subsequent to Date of Policy and is not financed in whole or in part by proceeds of the indebtedness secured by the insured mortgage which at Date of Policy the insured has advanced or is obligated to advance.
7. Any claim, which arises out of the transaction creating the interest of the mortgagee insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (i) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or
   (ii) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
   (iii) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
   (a) to timely record the instrument of transfer; or
   (b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

7. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992
WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 6 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

8. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (i) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
   (ii) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:
   (a) to timely record the instrument of transfer; or
   (b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

9. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992
WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 8 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

10. AMERICAN LAND TITLE ASSOCIATION RESIDENTIAL
TITLE INSURANCE POLICY - 1987
EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   * land use
   * land division
   * improvements on the land
   * environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.
   This exclusion does not limit the zoning coverage described in items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:

* a notice of exercising the right appears in the public records on the Policy Date
* the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking.

3. Title Risks:
* that are created, allowed, or agreed to by you
* that are known to you, but not to us, on the Policy Date - unless they appeared in the public records
* that result in no loss to you
* that first affect your title after the Policy Date - this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks

4. Failure to pay value for your title.

5. Lack of a right:
* to any land outside the area specifically described and referred to in Item 3 of Schedule A, or
* in streets, alleys, or waterways that touch your land

This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

11. EAGLE PROTECTION OWNER'S POLICY

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE - 2008
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE - 2008

Covered Risks 16 (Subdivision Law Violation). 18 (Building Permit). 19 (Zoning) and 21 (Encroachment of boundary walls or fences) are subject to Deductible Amounts and Maximum Dollar Limits of Liability

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building
   b. zoning
   c. land use
   d. improvements on the land
   e. land division
   f. environmental protection

   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

   This Exclusion does not limit the coverage described in Covered Risk 11 or 21

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows: Covered Risk 16, 18, 19 and 21, Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A. The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount or $5,000.00 (whichever is less)	$10,000.00
Covered Risk 18:	1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 19:	1% of Policy Amount or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 21:	1% of Policy Amount or $2,500.00 (whichever is less)	$5,000.00

12. THIRD GENERATION EAGLE LOAN POLICY AMERICAN LAND TITLE ASSOCIATION EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (1/01/08)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to (i) the occupancy, use, or enjoyment of the Land; (ii) the character, dimensions, or location of any improvement erected on the Land; (iii) the subdivision of land; or(iv) environmental protection; or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b)Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage which would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.

13. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 2006

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors? rights laws, that the transaction creating the lien of the Insured Mortgage, is

(a) a fraudulent conveyance or fraudulent transfer, or

(b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.

7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

14. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 2006

WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 13 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

15. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 2006

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;

   (ii) the character, dimensions, or location of any improvement erected on the Land;

   (iii) the subdivision of land; or

   (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters

   (a) created, suffered, assumed, or agreed to by the Insured Claimant;

   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

   (c) resulting in no loss or damage to the Insured Claimant;

   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risks 9 and 10); or

   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors? rights laws, that the transaction vesting the Title as shown in Schedule A, is

   (a) a fraudulent conveyance or fraudulent transfer; or

   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

16. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 2006

WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 15 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

PRIVACY POLICY

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information – particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our parent company, The First American Corporation, we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information which you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its *Fair Information Values*, a copy of which can be found on our website at www.firstam.com.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies, and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies, or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's *Fair Information Values*. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

PHASE I ESA QUESTIONNAIRE

northgate
environmental management, inc.

Phase I Environmental Site Assessment Questionnaire

(User Provided Information Questionnaire)

Date: 4/27/17

Your Name: Rich Knowland

Your Title: Principal

Site Name: Brea / Central

Site Location: Brea, CA - County of Los Angeles

Relationship to Site: ☐ **Owner** ☐ **Occupant** ☒ **Purchaser** ☐ **Other (please explain)**

Length of Time Associated with Site: 5 mos.

Please review and complete this questionnaire which will assist Northgate in completing our site assessment. If sufficient space in not provided, please compete your response on a separate sheet of paper and attach it to this questionnaire.

1. Are you aware of any environmental cleanup liens against the Site that are filed or recorded under federal, tribal, state or local law?

   ☐ Yes ☒ No ☐ Unknown ☐ N/A

   If Yes, please explain: _____

24411 Ridge Route Drive, Suite 130, Laguna Hills, California tel 949.716.0050 fax 949.716.0055
www.ngem.com

2. Are you aware of any activity or land use limitations, such as engineering controls (for contaminant control), land use restrictions or institutional controls, that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☒ Yes ☐ No ☐ Unknown ☐ N/A

If Yes, please explain: Active oil field

3. Do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:

4. Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

a) Do you know the past uses of the Site?

☒ Yes ☐ No ☐ Unknown ☐ N/A

If Yes, please explain: Active oil field with known residual oil sumps, seeps and chemical use

b) Do you know of specific chemicals that are present or once were present at the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain:

c) Do you know of chemical spills that have taken place at the Site?

☒ Yes ☐ No ☐ Unknown ☐ N/A

If Yes, please explain: oil spills near wells

d) Do you know of any environmental cleanups that have taken place at the Site?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain: _____

e) Do you know if any fill material has been imported to the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

5. Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain: _____

6. Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

7. Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

_____

8. Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of contamination at the Site?

☒ Yes ☐ No ☐ Unknown ☐ N/A

If Yes, please explain: visual evidence of oil on surface.

9. Does the Site's purchase price reasonably reflect the fair market value of the property?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If No, do you know the reason for lower purchase price? Is it possible that the lower purchase price is because of contamination known or believed to be present at the Site?

☐ Yes ☐ No ☒ Unknown ☐ N/A

If Yes, please explain: _____

_____

10. Have any of the following documents been prepared for the Site and, if so, can copies be provided to Northgate:

- Environmental site assessment reports ☐ Yes ☒ No ☐ Copies available
- Environmental compliance audit reports ☐ Yes ☒ No ☐ Copies available
- Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, National Pollutant Discharge Elimination System permits, underground injection permits) ☐ Yes ☐ No ☐ Copies available ✓ unknown
- Registrations for underground storage tanks (USTs) and/or above ground storage tanks (ASTs) ☐ Yes ☐ No ☐ Copies available ✓ unknown
- Registrations for underground injection systems ☐ Yes ☐ No ☐ Copies available - unknown

- Material safety data sheets ☐ Yes ☐ No ☐ Copies available - unknown
- Community right-to-know plan ☐ Yes ☐ No ☐ Copies available - unknown
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc. ☐ Yes ☐ No ☐ Copies available - unknown
- Reports regarding hydrogeologic conditions on the Site or in the surrounding area
  ☒ Yes ☐ No ☒ Copies available - provided by seller
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Site or relating to environmental liens encumbering the Site ☐ Yes ☐ No ☐ Copies available unknown
- Hazardous waste generator notices or reports ☐ Yes ☐ No ☐ Copies available unknown
- Risk assessments ☐ Yes ☐ No ☐ Copies available unknown
- Recorded Activity and Use Limitations (e.g. deed restriction, asphalt cap)
  ☐ Yes ☐ No ☐ Copies available unknown

If you know of specific chemicals or other hazardous materials (e.g., PCB associated with transformers, batteries, etc.) that are present or were once present at the property, how were they used, stored, and disposed? unknown

Do you know of aboveground or underground storage tanks on the property? If yes, what did they contain? unknown

Do you have any knowledge or experience with nearby/adjacent properties? If yes, do you have knowledge of chemicals, releases, or cleanups on these properties? unknown

How long have you owned, operated, leased, or been familiar the present and past uses of the property? 6 mos.

Northgate Environmental appreciates your assistance on this project.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/10/2016 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/12/2016 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/12/2016 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the target property.

BREA-OLINDA SANITARY Facility Id: 50418	VALENCIA BL/CARBON C	0 - 1/8 (0.000 mi.)	C13	14

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2015 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
Not reported	3678 PHEASANT LN	NNW 0 - 1/8 (0.041 mi.)	E26	35

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 4 RGA LUST sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of

HARBOR TRUCK BODIES INCORPORATED (Continued) **1000164289**

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
