

Save money and protect the environment for future generations.

In Orange County, up to 60% of household water is used for watering grass and plants. Nearly half of this water may be wasted through overwatering, runoff, and evaporation. With smart, simple choices about your sprinklers and plants, you can help preserve our water supplies and reduce harmful water runoff that eventually enters the ocean.

- Install a **Smart Sprinkler Timer** that automatically adjusts to changing weather conditions and gives your plants the correct amount of water. **Rebate level:** Up to **\$380** for single-family homes OR **\$25 per station** (up to controller capacity) for multi-family homes and businesses.
- Replace traditional sprinkler heads with **Rotating Sprinkler Nozzles**, which are especially good for watering lawns and groundcovers. **Rebate level:** **\$4 per nozzle**

You can help preserve our water resources for future generations by upgrading your old, water-guzzling clothes washer and toilets to new, water-efficient devices.

- Replace your old clothes washer with a **High Efficiency Clothes Washer**, which uses up to 55% less water and gets clothes just as clean.
Rebate level: \$85 per clothes washer
- For a limited time, rebates are available on **High Efficiency Toilets**. Get this rebate before it flushes down the drain!
Rebate level: \$50 per toilet
